American Railroad Journal.

Saturday, December 3, 1864.

Stock Exchange and Money Market.

The gold market continues to be the favorite resort of the speculators, who retiring from their former business of running up and running down the railway shares of the country, find they can do better, where rumors rather than facts go much better than they do any where else. If an operator circulates a false story about a railway he can be brought up and confounded with the figures. But when he asserts that a battle is lost or won, it takes some days, or certainly some hours to arrive at the truth.

The same skill of misrepresentation serves him in other ways. He buzzes about confidentially that the Government is selling gold or has resolved to sell it at a certain price, or that Mr. Belmont, or some other broker of foreign connexions has made his arrangements to ship two or three millions, and the price of gold falls or rises accordingly. In a crowded street with numerous fashionable lunch rooms to refresh the thirsty and excited dealers, it is not difficult to put wings to fables and send them flying along. The patron of a certain class of men, was by the ancients furnished in their pictures and statues, with wings to his heels. Mercury if he were among us would find innumerable imitations of his style of sandals as he passed through William or Wall street.

Seriously, however, what can be a more convincing proof of the fact that the rise and fall of gold have no other cause at present than speculation, than this, that while the paper currency of the Government has not increased one dollar for the last month, nor the circulation of the banks, but rather the contrary, or if increased by the National banks has been in some measure counteracted by the contraction of the associated and local banks, gold was a few weeks ago 60 per cent. higher than it was but a few days since. If there be any relations at present between the price of gold, and the amount of currency afloat then the latter should have nearly doubled about three weeks since, and should have been correspondingly withdrawn at the time of the fall to 117. We, therefore, insist that they raise a false issue who would attribute any consequences either one way or the other to the fact of the fluctuations in the article. We notice that the press, both in France and England inimical to us make this fluctuation the barometer by which they would read our future. And we have also among our own journals, a most remarkable example of how political and party bias can warp the judgments of their managers, and drag them from the honorable position of impartial observers into the mud and mire of unfaithfulness to the Country, and the libellous abuse of its credit, its resources and its determination.

On Tuesday the price went up and down on the most frivolous pretexts, and before these words shall have met the eyes of our readers, there is no telling where the quotations will stop long enough to be recorded.

There are general principles which will control this, however, in spite of all combinations, all contrivances, and all ingenuity. The triumph of the Union, and the restoration of the revolted States to its fold, will have their certain effect, and there are signs more visible than ever, that that consummation is at hand.

The storm appears to be subsiding, the bow of promise extending itself; the recent divisions and angry disputes which are begun in the heart of the confederacy, even in its most vital part, the bold and triumphant march of Sherman, and the general successes every where attending our armies, seem to indicate very great and surprising changes for the better. We may even claim the hand of Providence to be visibly interposed in our behalf protecting us from the last, most desperate and diabolical attempt to lay our city in ashes.

It is evident that faith in this happy termination of our difficulties is extending abroad, since within a few weeks, even in London there has been a good demand for our National securities, and in our leading railway bonds and shares.

Our Government securities at home stand very steadily and though influenced by the temper of

the market, and the speculations in gold to a certain extent, are still the prominent favorites in the market. A tendency to an advance particularly marks the 6s of 1881 and the 5-20s. The inquiry has been frequently made as to the relative values of a 5 and 6 per cent stock. We find the answer in a cotemporary of Philadelphia, and it is deserving of the attention of investers.

"A correspondent asks what are the relative values of a five and six per cent. stock. This can be fixed exactly, if the length of time they have to run is positively known, but not otherwise. For purposes of income, while they run cotemporaneously $1000 in six per cent., bring the same as $1200 in five per cent.; and if this annual difference were the only element of the calculation the sixes should go to 120 if the fives were at par. But it will be seen that the equivalent of fives, in such a case, not only represents a larger amount of capital, while they run, but will realize a larger sum when the principal is reimbursed. Thus, if a man have $10,000 in sixes, his interest is $600 per annum. Were he to change this to $12,000 in fives he would obtain no more interest; but when his principal was paid, he would receive $2000 more. The length of time to elapse before the payment of principal is a necessary element of the calculation. In the case of the new Government loans this time is uncertain. The Treasury may allow the 5-20s to run twenty years, or may redeem them in five years; so that there is no fixed method of determining the relative value of six per cent. 5-20s, and five per cent. 10-40s.

It very evident that a considerable change is taking place in the policy or the business of the associated Banks of this city within a short time. The circulation last week was reduced by the sum of $3,615,648, and the specie, $1,240,243, and while the deposits had increased by $3,268,052, their loans were increased but $2,217,228, thus showing that they are expecting some change in our financial position which will try the banks, and for which they must be prepared. Luckily for them if peace was declared to-morrow, the much censured greenbacks would be their main perhaps their only escape from bankruptcy. To resume in specie would be at first impossible.

The Bank of England as we stated in our last issue, has reduced its rate of interest 1 per cent., and for this boon, the British Press utter loud cries of gratitude. But very large and very important failures are still occurring in England, and we do not believe the crisis is over. The recent numerous captures of blockade runners by the skillful and effective arrangements of an officer of tried brains and bravery, will add to the list of failures abroad. It is certainly a remarkable and not a very agreeable subject to reflect upon, that a numerous or respectable class of foreign merchants and shippers, should make it so regular a business as this of violating the proclamation of the Royal Lady for whom they express such affection, and to prolong rebellion, a crime which England has punished with more bloodshed than any other nation in the world.

We are now looking for the President's Message, and the reports of the various departments. It is useless to speculate upon them, and a knowledge of the future plans of the Secretary of the Treasury, does not appear to be known to any clique or circle hitherto supposed to have enjoyed the advantages of special confidences. The impression seems to prevail that heavier taxes, in the direction of increased income taxes, and taxes on sales of property will be recommended. For this last method we have always been strenuous. It is the easiest borne, it rests on the actual business transactions of the country, where the parties are making bargains, and buying and selling for profit, and a belief that they are making it. From ready money passing simply from hand to hand, considerable amounts may be taken and "no body is hurt." Besides it will fall on capital more than small means, and will always be a voluntary transaction on the part of the parties themselves. The value of the goods which have the last year passed between the Northern and Western States by railways principally, have been ascertained to have been fifteen hundred millions of dollars. A small per centage on this traffic would pay the interest of the whole of the present public debt. The recent report of the Secretary of the Treasury is a most triumphant reply to those croakers whose business as whose happiness it appears to be to underrate, in fact misrepresent the wealth and resources of the country, and yet endeavor to show that the shattered bankrupt and desperate concern which they call a confederacy, has vitality and strength.

As we predicted in our last issue a considerable amount of gold went forward from certain foreign agencies by the steamers of last week. Every effort is still made by these houses to lessen our specie reserves. As long as they can sell their bills, they can remit specie. Some of these days however these operations will end in protests. Our exports in the aggregate continue in excess of our imports.

Exchange fluctuates from a fraction below par in gold to a fraction above, and affords but little if any profit to the sellers. We notice that the receipts of gold in England from Melbourne for the month ending in Sept., were small. But for the supplies obtained artifically from this Country, the London Bankers would be at there wits ends.

The balance in the Sub-Treasury on Tuesday was $26,740,852 27.

Deposits with the Government have re-commenced on a pretty large scale.

The aggregate value of the imports of general merchandise, other than dry goods and specie, at this port for the week ending November 28, was $1,797,990, against $2,710,276 in 1863, and $2,171,389 in 1862.

The exports from New York for the week ending November 28, were $1,880,303 against $3,251,634 in 1863, and $3,903,918 in 1862. The shipments of specie since January 1, have been $44,028,130. The exports since January 1, have been $195,675,229 against $156,885,289, in 1863, an increase of $38,789,940. The customs gold revenue at New York, specially pledged to the payment of the interest on the funded and fundable debt of the United States from January 1 to November 26, was $63,263,272.

The value of foreign goods imported into the port of Boston for the week ending November 25, was $978,008, against $623,586 for the corresponding week in 1863. The exports were $448,994 against $345,685 for the corresponding week in 1863.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Brooklyn 6s, Water Loan, 112½; Illinois coupon bonds, 1862, 99; North Carolina 6s, 60; Illinois War Loan, 96; McGregor Western 1st mort., 79½; Hartford and New Haven R. ☞ The Berlin and Doon Branch of the Grand Trunk Railway was opened for traffic on the 21st ult. There will be two trains daily.

Baltimore and Ohio R. R.

We give elsewhere the report of the Baltimore and Ohio Railroad Company for the year ending September 30, 1862, which was presented at the annual meeting of the Stockholders held in Baltimore, on the 21st ult. It is an interesting document, made so by the historical position the road occupies in relation to the rebellion, since the breaking of which it having been continually subject to the raids of rebel armies and guerilla gangs—its tracks torn up, its bridges destroyed, its culverts and tunnels rendered useless by the explosion of gunpowder, its depots burned, and its locomotives and cars stolen or disabled. From May 23, 1861, to March 29, 1862, a period of ten months, more than 100 miles of the main stem was in possession of the Confederate forces, embracing chiefly the region between the Point of Rocks and Cumberland. Occasional movements were also made, accompanied by considerable destructions upon the roads between Cumberland and Wheeling, and Grafton and Parkersburg. During this period, the destruction of the property, bridges and track of the Company was of the most serious character—42 locomotives and tenders, 386 cars, chiefly coal, 23 bridges, (including three between Cumberland and Wheeling, three on the Northwestern Virginia road, and the great bridge at Harper's Ferry,) embracing 127 spans, and a total length of 4,713 feet, were also destroyed or damaged to a great extent, by fire, and numerous engines and cars were thrown into the Potomac, the Opequon and other streams. Thirty-six and a-half miles of track were torn up, and the iron and track fixtures removed for use on Southern roads. The lines of telegraph for 102 miles, two water stations, and much other valuable property, were also destroyed.

Notwithstanding all this, the Company have been enabled to pay its usual semi-annual dividends and to fully maintain the sinking fund established for the extinguishment of its funded debt.

The report states that whenever protection has been afforded the company has, with marked rapidity, reopened its route. The entire road was restored and worked from March 29th to May 25th, and from June 15th to 5th September, 1862. From which it appears that for more than seven months of the fiscal year 1861-'62, the Company was deprived of possession of important portions of its road.

At the close of the fiscal year of 1862 the Confederate forces continued in possession of a portion of the road, upon which the tracks, bridges of the Company were geneally destroyed. Much of the region between Hancock and Harper's Ferry was thus held until the 29th of December following. At the earlist practicable moment large forces commenced the work of reconstruction, which was pressed with great vigor from the East and West. On the 6th of January, 1863, the restoration of the bridges and tracks was completed, and the entire route again reopened.

☞ The bridge which is to span the Ohio river between Cincinnati and Covington will cost a million and a half of dollars, and in length will exceed the Niagara bridge some 400 feet. It will be suspended 90 feet above high water, enabling the largest steamers to pass under without difficulty.

Vermont Central Railroad.

Under decree of Court, a second payment of three and a half per cent. is to be made in the stock of the Vermont and Canada Railroad at par value, and in cash for all fractional parts of a hundred dollars, to the holders of Vermont Central First Mortgage Bonds, at the office in Boston, from Dec. 1, to Dec 10, and afterwards at St. Albans, Vt.

McGregor Western Railway.

The McGregor Western Railway has been extended to Ossian, Iowa, 40 miles west of McGregor. This is practically an extension of the Milwaukee and Prairie du Chien Railway, one of the very best roads in the northwest, and forms the most expeditious route to points in northern Iowa. Stages run from Postville to West Union, also from Ossian to Decorah and New Oregon, and all places of importance in Northern Iowa. We rejoice at the extension of railway facilities to our western neighbors, for aside from the benefit to them and the enterprising railway companies, it is increasing the volume of trade that is pouring into our own city.—*Milwaukee Wisconsin.*

Chicago and Great Eastern Railway Co.

The Circuit Court in Chicago, Judge Williams presiding, in a suit brought in the interest of the Pittsburg, Fort Wayne and Chicago Railway Company, to test the charter of the Chicago and Great Eastern Railway Company, have decided in favor of the latter Company upon every point in the case.

Southern Minnesota Railroad.

We have seen a telegraphic dispatch this afternoon (Saturday, 19th,) from President Stoddard, Vice President Thompson and Secretary Sherwood, of the Southern Minnesota Railroad Company, dated New York, 18th, addressed to Messrs. Seely, Grant & Burke, Lloyd & Supple and others, stating that the iron for the first ten miles of the road has been secured by the favorable action of the citizens of La Crosse.—*La Crosse Republican.*

Hamilton and Port Dover Railroad.

We learn from the Hamilton *Spectator* that "the Hamilton and Port Dover Road has been finally disposed of to Messrs. Choate and Kearns. Their securities have just been reported upon by the Attorney General, and accepted. They are bound at once to put the Caledonian bridge in thorough repair, and then to repair the road. This even will be good news to a great many people, the more so as the new proprietors are eminently fitted for the duties they have assumed."

Telegraph from Red River to Westminster.

Notice has been given in the British Columbian Government *Gazette* that Dr. Rae was expected in that colony by way of the Rocky Mountains, completing his survey of the proposed line of telegraph, and that the Governor requested all magistrates and other public officers to furnish him with such aid and assistance as he might require. Accounts from the mine districts state that Dr. Rae has arrived at the mouth of the Quesnelle, having come down the Fraser from Fort George in a canoe with one Indian.

Liabilities of Express Companies.

Last week, in the Supreme Court at Baltimore, in a suit by a firm against Adams' Express Company for the loss of a package, it was decided that a common carrier may, by express stipulation, limit his liability, and that the party entrusting him with goods for carriage on the conditions expressed, enters into a special contract, by which his rights are concluded. The case is to be carried to the Court of Appeals.

Railroad Earnings—Weekly.

The following is a comparative statement of the earnings of the Chicago and Northwestern Railway for the third week of November:

	1863.	1864.
Passengers	$24,383 67	$54,818 07
Freight	71,810 31	121,691 96
Express	998 39	1,433 66
Mail	1,286 12	1,405 63
Total	$98,478 49	179,349 32
Increase 82-11 per cent.		$80,870 83

For 3 weeks, from Oct. 31st to Nov. 21st, the earnings were $490,344 09, against $303,127 44 in 1863—an increase of $187,216 65.

From June 1 to November 21, 1864, (5 months and 3 weeks) the earnings were $3,454,869, against $2,271,039 02 in 1863—Total increase of $1,183,830 20—or 52-12 per cent.

The earnings of the Chicago and Alton Railroad Company for the week ending Nov. 23, were:

	1864.	1863.
Passengers	$26,481 36	$15,925 38
Freight	46,030 38	28,838 59
Sundries	1,429 35	1,709 74
Total	$73,941 04	$46,473 71
Increase 1864		$27,467 33

The traffic of the Great Western Railroad for the week ending Nov. 18, 1864, was as follows:

Passengers	$28,576 43
Freight and live stock	25,436 60
Mails and sundries	2,182 13
Total	$56,195 16
Corresponding week of 1863	58,118 43
Decrease	$1,923 27

The earnings of the Marietta and Cincinnati Railroad for the 3d week in November:

	1864.	1863.
Passengers	$8,687 74	$4,692 34
Freight	12,319 20	14,131 88
Mail, express & telegraph	1,084 48	872 00
Total	$22,091 42	$19,695 72
Total this month to date	$64,075 68	$56,613 74
Total since Jan. 1	$892,025 78	$621,212 20

The earnings of the Grand Trunk Railway for the week ending Nov. 19, 1864, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$50,197 00
Express, freight, mails and sundries	3,124 00
Freight and live stock	66,512 00
Total	$118,833 00
Corresponding week, 1863	118,294 00
Increase	$1,539 00

Lehigh Canal Company's Railroad.

The new railroad of the Lehigh Coal and Navigation Company, on the opposite side of the Lehigh, is being energetically pushed. A large gang of workmen are engaged on the section opposite our town. This road, as most of our readers are aware, is to run from Mauch Chunk to Easton, on the east bank of the Lehigh. At Easton it will connect with a new road that is being built by the Morris and Essex Railroad Company. At Bethlehem the track will run between Fetter's hotel and the stables. It is said the company intend to bridge the Lehigh above the Allentown Furnace with a view to run a branch track on this side of the river down to the East Pennsylvania junction, where it is proposed to bridge the river for both roads.—*Allentown Democrat.*

Oganization of Railroad Corporations.—Liability of Subscribers to their Capital Stock.

The late case of The Buffalo and Alleghany Railroad Company against Cary, Administrator, &c., was on appeal from the Superior Court of the City of Buffalo, and was an action upon the subscription of the intestate to the Capital stock of the plaintiff. The plaintiff undertook to become incorporated under the general railroad act of 1850. In May, 1853, its articles of association were filed, and the intestate June 8th, thereafter, became a subscriber for one thousand dollars of the capital stock, and paid ten per cent. at the time of subscribing, and died in September, 1853. The directors, after his death, made seven calls upon the stock of one hundred dollars each, and for this seven hundred dollars, claimed to be due this action was brought.

The affidavit endorsed upon and filed with the articles of association was conceded to be defective; it containing no statement of an intention in good faith to construct or operate the road mentioned in the articles.

In 1850 a law was passed by the Legislature of this State—(New York,) authorizing the plaintiff to sell its property and effects to another railroad company; and, by the second section of the act, the plaintiff was declared to be a valid corporation, duly organized under the act to authorize the formation of railroad corporations and to regulate the same, passed April 2d, 1850, and the several acts amending the same, notwithstanding any error, informality, insufficiency, act or omission, on the part of such company or any of its stockholders in the proceedings to become incorporated, and the said corporation and all the proceedings of its stockholders and officers were thereby legalized and confirmed.

By another section it was provided that nothing contained in this act should affect any suit before then commenced in any Court.

Upon the trial, the plaintiff offered in evidence certified copies of the articles of association, filed with the County Clerk and Comptroller, and they were objected to on the ground of the defect in the affidavit. The plaintiff then read in evidence the act of 1858, and thereupon the Court overruled the objection, and the articles of association were read in evidence, and the defendant excepted. The plaintiff then gave evidence of the election of directors and officers, June 1, 1853, and the purchase of the route of the proposed road after such election, and that contracts were made for its construction, and that the contractors entered upon the work, and that money was paid on various subscriptions to the capital stock, and expended on the road, and liabilities incurred in the construction. Evidence was given of the various calls for payment upon the stock, counted upon in the complaint.

At the close of the evidence, the defendant moved for a non suit, on the ground that the plaintiff had failed to prove its corporate existence at any time prior to the passage of the act of 1858, if at all; and that the defendant was not liable on the subscription of the intestate. The motion was denied, and the defendant excepted. Judgment was given for the plaintiff for the full amount claimed, which was affirmed at General Term, and the defendant appealed to the Court of Appeals, which affirmed the judgment. The reasons for such affirmance, however, were not put in writing, but those of the Court below were delivered by MASTER, J., as follows:

The defendant contends that the plaintiff's organization is defective, because the affidavit annexed to the articles of association does not contain the allegation required by the statute, "that it is intended in good faith to construct or to maintain and operate the road mentioned in the articles of association," and that it is not therefore a corporation.

The articles of association are in due form, and the affidavit annexed to them, while it does not come up to the requirement of the statute in the particular specified, is colorable. The articles and affidavit were filed and recorded in the office of the Secretary of State; the capital stock was subscribed, and partly paid in; the route of the road was surveyed and located; the right of way obtained. A contract for the construction of the whole road entered into, and liabilities incurred which have not been satisfied. This was sufficient to constitute the plaintiff a corporation *de facto* so that neither it nor its stockholders can object that it is not strictly a corporation *de jure*.

I am of the opinion that, under this and similar general acts for the formation of corporations, if the papers filed, by which the corporation is sought to be created, are colorable, but so defective, that in a proceeding on the part of the State against it, it would for that reason be dissolved, yet by acts of use under such an organization it becomes a corporation *de facto*, and no advantage can be taken of such defect in its constitution, collaterally by any person.

Any other rule it seems to me must be fraught with serious consequences and great public mischief. Most of the persons who subscribe in good faith for the stock, do not examine to see whether all the requirements of the statute in the organization of the corporation have been complied with; and if they did examine would not probably discover a defect like the one now pointed out.

The stock is sold in market from hand to hand without any such examination. The corporation may carry on its business for years, and its stock may have entirely changed hands, when its property may be destroyed by a trespasser, and in an action against him in the name of the corporation his only defence, "you are not legally a corporation by reason of a defect in your constitution," would (upon the doctrine contended for by the defendant) be successful. The doctrine of estoppel could not be applied in that case, as it has been in some cases to counteract an erroneous decision upon the question now before us.

I am aware that there are decisions in the Supreme Court, beginning with The First Baptist Church *vs.* Rapalel, (16 Wend., 605,) upon the point now presented to us, in conflict with the opinion I have here expressed. Their error is, in not recognizing the distinction between what is sufficient to constitute a corporation *de facto*, and what is necessary to constitute one *de jure*, and how and by whom a corporation *de facto* may be shown not to be a corporation *de jure*.

The State alone can take advantage of a defect in the constitution of a corporation like the one in this case. In its action it will be governed by

public policy and considerations. And it has declared that it will not take advantage of the defect in the plaintiff's constitution.

I think the Court of Appeals has settled the principle as I have stated. Eaton vs. Aspinwall, 19 N. Y., 119.

Interest and Dividends.

The Toledo and Wabash Railway Company will pay, 20th December, a dividend of 3½ per cent. on its common stock.

The Lehigh Coal and Navigation Company have declered a semi-annual dividend of two and a half dollars per share, free of State and National taxes, payable Nov. 29.

The coupons due Dec. 1st on the legal tender five per cent. notes will be paid by the First National Bank, 140 Broadway. The notes must be presented with the coupons attached.

The interest due on the bonds of the New York and New Haven Railroad Company, December 1, 1864, will be paid at the Bank of the Republic, or at the Company's Office, corner of Twenty-seventh street and Fourth avenue.

Wealth and Resources of Wisconsin.

This is another of the great Northern States looming up above the mirror waters of Lake Michigan, saluted every morning by the beams of the Eastern sun, lighting up its beautiful shores and glistening on the spires of the flourishing city of Milwaukee. It formerly constituted a part of the North Western territory, and was for a time attached to Michigan territory. It entered the Union in 1848, after a previous unsuccessful effort, and having been originally territory chiefly purchased from the Indians, never had the folly to claim any inherent and original sovereignty, or assert the right to make a majority of the States yield on all occasions to a minority on pain of civil war. The physical geography of the State, if this was the place to speak of it, would justify an elaborate description. Its bays and rivers, its mountains and prairies, its numerous lakes, its water communications by the Mississippi with New Orleans on the one side, and with the Atlantic by the lakes and canals on the other, its fertility of soil, extensive, navigable waters, and its abundance of minerals ensure its rise to a position of the first magnitude. Already it is among the foremost of its neighbors.

Its area is 53,924 square miles or 34,511,360 acres. In 1840 the population in this area was 34,945, in 1860 it had become 775,881.

It contains thirteen principal cities and towns of which Milwaukee its chief port contains upwards of 50,000 inhabitants. The others range from 3000 to 7000. Among them are the familiar names of Racine, Madison the beautiful capital of the State, Oshkosh, Beloit, Kenosha, Green Bay, Prairie du Chien, La Crosse, Mineral Point, Columbus and Portage City all prominent points in the railway system of Wisconsin.

The agricultural condition of the State may be judged of by the fact there are 3,746,036 acres of improved land, and 4,153,134 unimproved, the value of the former being $131,117,082, and of the implements of husbandry used upon them $5,738,847. The live stock consists of 116,192 horses, 1019 mules and asses, 198,996 milch cows, 93,660 working oxen, 225,210 other cattle, 832,454 sheep, 333,957 swine. The value of this stock in 1860 was $17,807,366. The products of animals were as follows: of butter 13,651,053 lbs., cheese 1,104,459 lbs., wool 1,011,915 lbs., and the value of the animals slaughtered was $3,368,710.

The cereal crops were of wheat 15,812,625 bushels, of rye 888,534 bushels, of Indian corn 7,565,290 bushels, of oats 11,059,270 bushels, of barley 678,992 bushels, and of buckwheat 67,662 bushels.

The commercial crops were as follows: Tobacco 87,595 lbs., hops 135,587 lbs., hemp 356 tons, flax 21,644 lbs.

The miscellaneous crops were:

Peas and beans, bushels	99,804
Irish potatoes "	3,848,505
Sweet " "	2,345
Wine, gallons	9,511
Hay, tons	853,799
Clover seed, bushels	3,848
Grass seed "	26,888
Flax seed "	4,256
Maple sugar, lbs.	1,584,406
Maple molasses, gallons	83,003
Sorghum, gallons	19,253
Silk cocoons, lbs.	15

The orchard products were $76,096, those of market gardens $207,153, and of home made manufactures $128,423 in value.

The number of manufacturing establishments was 3,120 with a capital of $16,580,000, the value of the raw material annually used, $17,250,000, the number of operators about 22,000 and the annual value of the products $28,500,000.

The value of the principal articles of production in 1860 more than doubled that of 1850, as follows:

Flour and meal	$8,161,183
Lumber	4,836,159
Boots and shoes	901,944
Malt liquors (124,956 bbls.)	702,812
Agricultural implements	563,855
Leather	498,268
Steam engines &c.	384,600
Iron castings	377,301
Furniture	366,355
Lead ore	325,368
Soap and candles	187,010
Printing	180,444
Woollen goods	167,600
Spirits (531,250 gallons)	101,346
Gas	94,176
White fish	83,512
Iron ore (4,500 tons) } " pig (2,000 ") }	40,000

The total movement of imports and exports was $190,536, and that of tonnage 92,657 tons. The tonnage owned in the State was 25,020.

The length of the railways in Wisconsin was in 1850 but 20 miles, and in 1864 986, and the cost for construction, of $34,445,233.

There are 14 in all, the longest being the Chicago and North Western, from Illinois state line to Fond du Lac 147 miles; Milwaukee and Minnesota, from Milwaukee to La Crosse, 199 miles; and Milwaukee and Prairie du Chien between those two places 234 miles.

The canal system is confined at present to what is known as the Fox and Wisconsin rivers improvements, which including the Portage Canal is 296 miles in length, connecting Green Bay with the Mississippi river. The locks are 35 by 165. The lower part 175 miles is finished, and the upper part not yet completed, still permits the navigation of vessels larger than those first used on the Erie Canal. Some future day this improvement will permit the passage of steamers of considerable size.

The estimated value of the real and personal property of the State was returned in 1860 at $273,671,668, when in 1850 it was but $42,000,000. The debt of Wisconsin limited by the Constitution was but $100,000, before the rebellion. This has increased it.

Milwaukee claims to export the largest amount of wheat of any other city in the North Western States, and perhaps has a better wheat producing Country of its own than any of the neighboring States. Its population in 1870, will be a million and a half at only its present rate of increase.

New York Canals.

The quantity of flour, wheat, corn and barley left at tide water from the commencement of navigation to the 22d of November, inclusive, during the years 1863 and 1864, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1863	1,304,700	19,008,000	20,532,300	2,302,100
1864	1,087,700	14,289,400	9,192,400	2,547,500
Dec.:	217,000	4,718,600	11,339,900	*245,400

* Increase.

By reducing the wheat to flour, the quantity of the latter left at tide water this year, compared with the corresponding period last year, shows a deficiency of 1,160,720 barrels of flour. The following comparative table shows the quantity of some of the principal articles of produce left at tide water from the commencement of navigation to and including the 22d of November, in the years indicated:—

	1862	1863	1864
Canal opened.	May 1.	May 1.	April 30.
Flour, bbls.	1,523,400	1,304,700	1,087,700
Wheat, bu.	29,740,300	19,008,000	14,289,400
Corn	21,187,500	20,532,300	9,192,400
Barley	1,819,100	2,302,100	2,547,500
Oats	4,907,200	9,707,900	10,524,400
Rye	743 300	382,700	550,700
Beef, bbls	36,700	37,400	35,600
Pork	175,500	229,400	56,800
Bacon, lbs.	5,923,000	3,524,500	579,600
Butter	4,141,800	4,211,300	656,700
Lard	8,759,300	19,681,500	2,046,200
Cheese	6,597,800	7,643,600	2,662,500
Wool	1,735,800	357,600	1,222,900

The Erie Canal may now be considered as closed for the season, as we see it stated that the break near Rochester will not be repaired at present.

Re-Measurement of Vessels.

Under a recent act of Congress, it is made necessary that all American vessels shall be remeasured on or before the 1st of January, 1865, and the tonnage to be carved or otherwise permanently marked on the main beam of the vessel. The penalty for non-compliance with the provisions of this act, is the forfeiture of all claims to the protection of the United States. The new measurement will greatly increase American tonnage, and put it ahead of that of any nation in the world. The law is one of importance to shipowners, and should command their immediate attention.

☞ The City Council of Cleveland, Ohio, have given permission to the Cleveland and Toledo Railroad Company to cross the Cuyahoga River, and to use certain streets in the city in order to make a connection with the Cleveland and Mahoning road.

☞ The Pittsburg, Fort Wayne and Chicago Railway Company is at present engaged in preparing the road for a double track.

☞ Mr. John W. Garrett, has been elected President of the Baltimore and Ohio Railroad Company for the seventh term. We have before us the address made by Mr. Garrett upon taking his seat, in which it is stated, that by the day of the opening of Congress, on the 5th of December, the second track on the Washington Branch will be completed and in use between that city and Baltimore. When we remember that this road is on the line separating the armies of the North and of the South, and much of it through a region of country favoring depredations by raiders the success that has attended the efforts of the President and the other officers of the company in keeping it in operation so steadily as they have, proves not only untiring industry but an administrative ability probably unequalled in the management of any other road in the country. A double track on the line of the Branch Road, between Baltimore and Washington, and the arrangements effected by the Camden and Amboy, and the Philadelphia, Wilmington and Baltimore Railroad Companies, will so perfect the route and shorten the time of travel between New York and the National capital as to remove all just cause of complaint as to the time of passage, and ought to induce Congress to throw the proposition of any rival military road out of that body.

☞ The St. Louis *Republican* states that the repairs of the damage on the main line of the Pacific Railroad, are progressing favorably and with great rapidity. "The bridges over the Gasconade River and Bailey's Creek, will be completed and ready for travel by Saturday next, when trains will run through from this city to St. Aubert's, which is the last river station on the road. A large and powerful ferry-boat has been sent from Washington to Jefferson City, to ferry live stock, of which an immense number is said to be ready for transportation from that place to St. Aubert's. The distance between these points is only twenty miles. Above Jefferson City, the railroad is in good order, and trains are running regularly to Warrensburg. The company anticipate the re-opening of the road its entire length by the middle of next month."

☞ The Philadelphia *Ledger* says that the Wyoming Valley Canal is one of the most productive and successfully managed canals in the State, and even at the present seemingly high price of its shares, the cheapest. The par value of the shares is $50; and with a quarterly dividend of four per cent. ($2 per share) some three weeks off, is firm at 78.

☞ The track of the Metropolitan (Washington City,) Railroad was laid down during last night immediately along the front of the Baltimore and Ohio Railroad depot, on New Jersey avenue. This was rather a surprise to the hackmen who congregate for passengers at that point. The railroad company, however, claim the right, under their charter, to occupy the ground, though the Washington and Georgetown street railway was formerly ousted from it.—*Baltimore Sun, Nov.* 28.

☞ The Pottsville *Miner's Journal* says: "several propositions we learn, have already been made to unite with the Schuylkill Haven and Lizard Creek Railroad which the New York and Middle Field Coal Company propose building."

Railroad from Ottawa to Arnprior.

The Ottawa *Union* states that the Brockville and Arnprior Railway has diverted a large portion of the trade of the Upper Ottawa from Ottawa city to Brockville, and urges the building of a railway from Ottawa to Arnprior or Pembroke, so as to recover the trade and permanently secure the growing business and traffic of the upper country. It says:—

"The route from Ottawa to Arnprior is only 36 miles in length, running through a most favorable country for railroad purposes. The road could probably be constructed for £6,000 per mile. A grant of land is, we believe, yet available as a basis of operations. The Grand Trunk has now an interest in tapping the Ottawa trade, and we are not aware that it has an interest in the Brockville and Ottawa road. The Ebbw Vale Company is also interested in creating traffic for the Ottawa and Prescott road, and, as dealers in railroad iron, might be induced to assist the new undertaking."

☞ The Boston and Providence Railroad Company propose to increase their capital stock by the creation of three thousand one hundred and forty shares, for the purpose of completing a double track between Boston and Providence.

Schenectady and Athens Railroad.

Are our citizens aware that the work is rapidly progressing on this road, and that by the 1st of July next there will be a railroad connection between Schenectady and Athens, thus isolating this city from the West?—*Albany Journal.*

OPPENHEIM BROTHERS,

STOCK BROKERS,

NO. 19 WALL STREET,

(BASEMENT,)

NEW YORK.

WANTED

A gentleman with a capital of $25,000 to take an interest in a Car Manufacturing Establishment at New Haven, Ct. The business is already established, with a large capital invested, and in successful operation. Address this office, or box 2287 P. O., New Haven, Ct.

Marine & Fire Insurance.

METROPOLITAN

INSURANCE CO.,

No. 108 BROADWBY, N. Y.

Cash Capital,	**$300,000**
Assets, July 1,	**$708,502**

This Company insures at customary rates of premium, against all MARINE and INLAND NAVIGATION RISKS on CARGO or FREIGHT; also, against loss or damage by Fire.

IF PREMIUMS ARE PAID IN GOLD, LOSSES WILL BE PAID IN GOLD.

The assured receive 75 Per Cent. of the net Profit, without incurring any liability, or in lieu thereof, at their option, a liberal discount upon the premium.

All losses equitably adjusted and promptly paid.

SCRIP DIVIDEND declared Jan. 12, 1864.

THIRTY-FIVE PER CENT.

CENTRAL

Petroleum Exchange Office

No. 10 Pine St., NEW YORK.

WED. W. CLARKE & CO.

OUR OFFICE IS OPEN TO THE COMMERCIAL public for the purchase and sale of Petroleum lands of the oil districts of Pennsylvania, Virginia, Ohio and Michigan, and for the sale of oil stocks, many of which are paying large dividends monthly.

We now have in hand for sale stocks of the following companies:

Blood Farm Petroleum Co., N. Y., Chas. Butler, Prest.
Home Petroleum Co., N. Y., Josiah Oakes, Prest.
Tarr Farm Petroleum Co., N. Y., Jas. Wadsworth, Prest.
Central Petroleum Co., N. Y., Jas. Bishop, Prest.
American Petroleum Co., N. Y., F. C. Clark, Prest.
Oil City Petroleum Co., N. Y., D. S. Duncomb, Prest.
Michigan Central Petroleum Co, N. Y., F. Prentiss, Prest.
Penna. Petroleum Co., Phila., John S. Young, Prest.

We have centered with us $31,000,000 of capital invested in petroleum, and can supply applicants with names and general "status," of most companies now organized, and general information of the oil market, both at home and abroad.

Special attention is called to a prospectus now offered to capitalists and others of the "United Petroleum Farms Association," which combines some of the most wonderful productions of the day, paying at this moment attractive dividends, and combining a capital of $15,000,000 in this single enterprise. Subscription list opened for a few days at this office.

This enterprise with the present development, is now paying over two and a half per cent. per month, with a positive prospective increase almost fabulous.

Krupp's Steel Works.—Essen, Rhenish Prussia.

We have received from Messrs. THOS. PROSSER & SON, a splendid photograph, 90 inches by 24, representing the Steel Works of Fried Krupp at Essen, in Rhenish Prussia. It is impossible to convey by words an idea of this establishment, a city in itself, but it is evident at a glance, that his steel manufactures are conducted on a grand scale, especially those applicable to railways. We are obliged to the gentlemen mentioned, (who are the sole agents of Mr. Krupp in this country,) for this beautiful and impressive work of art.

☞ The firm of Tillotson & Co., has been dissolved, Mr. Tillotson having retired to take charge of the Telegraph line on the Erie Railway, and a portion of the Western Union Telegraph line. By reference to the Card of J. S. KEELING, Esq., in another column, it will be seen that the business is still continued at No. 16 Broadway, where may always be found on hand, a general assortment of Railway, Telegraph and Steamship Supplies. The patronage of the customers of the old firm and others is solicited.

Commerce of the Pacific Coast.

Among the subjects treated upon in the Treasury Report on our foreign and domestic commerce (the general characteristics of which we enlarged upon last week) the section relating to the commerce of the Pacific Coast, is neither the least important nor the least interesting. It surveys the whole question of relations between our own States, and the territories of other nations bordering on that sea, minutely describing their resources, and the condition of their developement. This section we shall now proceed to reduce into the readable space of a current article.

Since the era of gold discovery in the mountain ranges which girdle the whole Pacific Coast, the United States, Great Britain and Russia, have made nearly equal advances in colonization in this part of the world. England is firmly planted in her Australian Colonies and British Columbia; Russia has annexed Chinese Manchooria and the Japanese island of Saghalien which with her possessions in America, almost constituted a dominion of the North Pacific Ocean; California and Oregon with the settlements converging to the harbors of San Francisco and Puget's Sound, have become an important section of the United States; and France probably finds a motive for Mexican intervention in the circumstance that her power in the new Pacific World is limited to the Society Islands, and her recent successful occupation of a part of Cochin China. A review of these results of Pacific colonization will be the best illustration of existing and prospective commerce.

THE AUSTRALIAN COLONIES.

The statistics of the Australian colony of Victoria, and of the State of California present many analogies. At the commencement of the golden era in Victoria (1851) that wool created colony contained 77,345 inhabitants, who owned 6,032,783 sheep, and the wool created city of Melbourne had a population of 25,000 souls. In eleven years the population of Victoria, under the gold impulse has increased to 550,000; the average imports and exports are respectively £13,000,000, ($85,000,000) and the population of the city and suburbs of Melbourne has increased to 138,000 souls.

In 1849, California had about the same population as Victoria in 1851; its industry and productions were pastoral, the chief exports being hides and cattle; and San Francisco was an insignificant seaport. In 1864 the population of California and its Colony Nevada (now a state of the Union) cannot be less than 500,000, and the average exports and imports are respectively $55,000,000 per annum.

The average exports of treasure from Victoria and California since 1854 have closely approximated, being nearly $40,000,000 annually. In both countries the aggregates have decreased with the diversion of labor to agriculture and manufactures. In Victoria the culminating point was in 1856, when the export of gold reached 2,985,696 ounces, valued at nearly $58,000,000, and the least export was in 1863, when the quantity was reduced to 1,634,377 ounces, valued at $32,000,000. In California the greatest annual export was in 1853, $57,331,034 while for the last two years California alone has not exported more than $35,000,000 per annum.

The entire gold product of Australia and New Zealand stood in 1862, as follows: Victoria 1,711,508 ounces, New South Wales 584,519 ounces, and New Zealand 445,902 ounces, making a total of 2,741,929 ounces or not quite as much as Victoria alone in 1856. So with California. When credited with the production of Nevada, Oregon and British Columbia which the course of trade brings to California for exportation to the different parts of the world, the aggregate retains and even exceeds the amount recorded in 1853. But California like Victoria has found more productive industries than gold mining.

Both countries now produce an immense number of consumable articles which they used formerly to import and pay for with gold. In 1856, the year of the greatest production of gold, the colony had only 115,135 acres in cultivation, but in 1862, 540,000 acres, and in the meanwhile the crops had increased—wheat from 1,148,000 to 4,152,000 bushels, with a saving of 60 per cent. in price, and oats from 614,000 to 2,633,000 bushels with a gain in reduction of price of $2,000,000 The same comparison extends to all agricultural production—the local supply now effecting a saving of gold export in lesser articles of $24,000,000.

Great changes may also be anticipated from the success of the vine and tobacco culture. In 1848 four acres were planted by a Swiss vigneron, near

Geelong; in 1862 there were 1,464 acres planted with 3,820,000 vines (one half bearing) from which 17,000 hundred weights of grapes were sold, and 48,000 gallons of wine manufactured. In 1862, two hundred and twenty acres were planted in tobacco and yielded 3,552 hundred weights.

The successful manufactures of Victoria are machinery for mines, iron rolling mills, carriages, refined sugar, spirits, woolens, ale, furniture, hats and caps, jewelry, leather, bricks, tiles etc.

In railroad construction Victoria is in advance of California. At the close of 1863, the colony had 351 miles of operation, yielding a revenue in 1863 of $2,160,000 against $1,489,000 in the previous year when 220 miles were open. These roads have been constructed mainly by the government, and diverge generally from Melbourne to the mines, excepting several short company lines which accommodate the immediate neighborhood of the capital and its commercial post. In the short space of ten years indeed Victoria has experienced no less than three revolutions in its means of transit—from 1862 to 1863, was the era of mud roads, from 1854 to 1858 that of macadamization and from 1859 to 1863 that of railroads. The economic effects of these roads on the progress of the colony has been very sensibly perceived, and by faciltating, shortening and cheapening travel and transportation given an impetus to every species of industry. We may liken the change to a sudden jump from the eighteenth to the middle of the nineteenth century. The proposed termini of the government railroads are the Murray and the mouth of the Goulbourne.

California has made no such progress as here represented. For several years, however, it has possessed the Sacramento Valley Railroad extending 23 miles from Sacramento towards the mining region, and within the present year has completed the first 50 miles of railroad from San Francisco, and 40 or 50 miles of the central division of the great Mississippi—Pacific project. There are also one or two city and suburban lines in and around the commercial emporium. Within the next two years it is expected that a continuous line from San Francisco to Nevada will be in operation.

The extent and population of the several colonies of the Australian group are as follows:

Colonies.	Area in sq. miles.	Populat'n by last census.
New South Wales	324,909	365,685
Victoria	87,000	548,944
Queensland	678,000	56,000
South Australia	388,000	126,830
Western Australia	978,000	15,691
Tasmania (Van Diemens L.)	26,000	90,211
New Zealand	106,000	155,070
Total	2,582,000	1,358,381

The value of the imports and exports of the same colonies, and the total revenue of each in 1860 are thus represented:

Colonies.	Value of— Imports.	Exports.	Revenue from all sources.
N. S. Wales	$37,595,000	$25,360,000	$6,545,000
Victoria	75,470,000	64,815,000	15,195,000
Queensland	3,710,000	3,550,000	895,000
S. Australia.	8,200,000	8,920,000	2,195,000
W. Australia.	845,000	445,000	305,000
Tasmania	5,030,000	5,125,000	1,340,000
New Zealand	7,740,000	2,945,000	2,325,000
	$138,590,000	$111,160,000	$28,800,000

The revenue of Victoria since 1850 has been nearly $15,000,000. In 1863 it was reduced to $13,611,000, but will reach the former point the current year. The sources of the revenue for the year ending Dec. 31, 1863, are thus presented:

Customs	$5,243,000
Excise	445,000
Public works	2,239,000
Terretorial (lands and royalties)	4,360,000
Post office	588,000
Porter and harbor dues	102,000
Miscellaneous (fees, fines, etc)	581,000
Total	$13,611,000

The expenditures of Victoria cover the whole field of what in the United States is divided into National and State expenditure. Taxation of the entire population of the Union in equal measure would produce a revenue of $800,000,000 a year.

Hittell in his "Resources of California" (1862) estimates that the inhabitants of Nevada, Oregon, Washington, the western part of New Mexico (now organized as Arizona), the north western part of Mexico, British Columbia, Vancouver's Island and the Hawaiian Islands on an aggregate population of 1,700,000 and destined to an identity of commercial interests. San Francisco and California hold the same relation to this Pacific population, which Melbourne and Victoria bear to the 1,400.000 inhabitants of the Australian group of colonies. Omitting further comparative statements it is now proposed to examine into the present nature and relations of the Pacific trade which concentrates at the city of San Francisco. This will be done chiefly by compilations showing the transactions and situation of 1863, and the two next preceding years.

Trade of San Francisco.

The distinction and value of exports from the port of San Francisco exclusive of the precious metals during the three years selected were as follows:

Exports to—	1861.	1862.	1863.
New York	$1,605,034	$2,245,633	$2,736,435
Boston	98,345	1,192,489	1,505,690
Great Britain.	2,838,004	1,855,217	1,697,822
Australia	1,056,401	332,335	489,685
Br. Columbia	1,177,152	2,195,903	1,746,801
Mexico	1,094,930	1,014,639	1,819,652
Peru	163,264	271,251	216,206
China	711,841	722,229	1,246,254
Hawaiian Is.	288,877	293,370	357,869
Japan	15,577	21,598	43,901
Other countr's.	838,647	920,630	920,584
Total	$9,888,072	$10,565,294	$12,877,399

—this table includes the productions of Oregon, British Columbia, and Northern Mexico, as well as of California. The principal articles of California production were as follows:

Productions.	1861.	1862.	1863.
Barley	$361,452	$131,282	$65,044
Bread	64,892	69,805	65,290
Copper ore	135,240	370,200	719,300
Flour	858,425	688,234	767,270
Hides	444,995	947,253	924,567
Lumber	69,981	149,560	123,084
Oats	156,879	72,045	130,602
Quicksilver	1,579,850	1,138,961	1,073,078
Silver ores	211,345	34,740	118,109
Wheat	2,702,484	1,372,572	1,754,116
Wool	519,577	1,069,194	1,119,098
—and including articles of minor importance a total of	$6,795,758	$6,211,788	$7,208,289

Including exports of treasure, the entire exports of California, productions during these three years may be classified as in the following table:

Products of—	1861.	1862.	1863.
The mine	$42,103,193	$44,105,662	$47,982,398
Agriculture	3,265,471	1,245,350	2,013,975
The herd	1,041,217	2,027,082	2,182,155
The forest	69,931	149,460	134,086
The sea	21,828	21,868	11,285
Manufactures	962,875	798,191	873,854
The vine	8,000	25,836	81,456
Total	$47,472,217	$48,773,549	$53,280,209

The following table shows the value and destination of treasure shipments from San Francisco during the years 1854 to 1863 inclusive:

Shipments of Treasure from San Francisco to—

Years.	Atlantic Ports.	England.	China.	Panama.	Other Countries.	Total.
1854	$ 46,588,166	$ 3,781,080	$ 965,887	$ 204,592	$ 560,908	$ 52,045,633
1855	38,730,564	5,182,156	889,675	280,207	128,129	45,161,731
1856	39,895,296	8,666,289	1,808,852	258,268	573,782	50,697,484
1857	35,531,778	9,347,743	2,998,264	410,929	692,978	48,976,697
1858	36,891,286	9,265,739	1,916,007	299,265	175,779	47,548,026
1859	40,146,437	3,910,930	3,100,756	279,949	202,390	47,640,462
1860	35,719,296	2,672,936	3,374,680	300,819	258,185	42,325,916
1861	32,728,011	4,081,779	3,541,279	349,769	95,920	40,676,758
1862	26,194,085	12,950,140	2,660,754	434,508	322,824	42,561,761
1863	10,389,380	28,467,256	4,206,370	2,508,296	505,667	46,071,920
Ten yrs.	341,659,147	88,306,054	24,957,524	5,267,602	3,516,010	463,706,338

The imports answering to these exports are in some measure indicated by the following statement of the tonnage arrived at San Francisco during the year 1863:

Am. vessels from domestic ports	1,516	367,980
" " foreign ports	238	214,655
" " whaling voyages	12	4,300
Foreign vessels from foreign ports	132	54,254
" " " whaling voyages	1	200
Total	1,899	641,898

By a return from the Treasury Department the total value of foreign imports at San Francisco for the year ending June 30, 1863, was as follows—in American vessels $7,348,969, and in foreign vessels $3,333,173 or a total of $10,684,142. The customs districts of Oregon and Puget's Sound made no returns, but are estimated to import from $180,000 to $200,000 yearly; and hence for the whole United States coast on the Pacific, there is indicated according to these returns and estimates an annual importation of $10,860,142 to $10,884,-142.

The present tendencies of the Pacific trade of California to the different countries are worthy of observation. To New York and Boston the leading articles are hides, wool and copper, as follows:

	1860.	1861.	1862.	1863.
Copper ore, cks.	——	11,155	72,938	109,470
Hides, number	200,116	177,998	315,751	308,189
Wool, bales	11,767	14,791	21,911	16,078

To Great Britain the exports chiefly consist of wheat and flour as follows:

	1860.	1861.	1862.	1863.
Wheat, bags...	458,495	1,022,664	590,485	844,022
Flour, barrels.	36,375	70,945	8,582	12,200

To the Sandwich Islands and Mexico, lumber is the leading export, amounting in 1863, to 772,794 feet for the former and 1,152,880 feet for Mexico. The export of lumber to Peru reach 1,936,156 feet in 1862, and 890,009 feet in 1863. China is also a considerable market for the lumber of the American Pacific coast, having taken 2,659,190 feet in 1862, and 2,709,733 feet in 1863. China also takes large quantities of flour, wheat, lumber, bacon, butter, cheese, lard, wine, etc., and is a constantly extending market.

To Australia and New Zealand the leading export is lumber; the former demand for breadstuffs being much below the exportation of 1861.

The East Indies send to California, coffee, sugar, rice, hemp, spices, etc., but taken little in return except gold and silver.

The exports to British Columbia, New Granada, Chili, Society Islands, Manilla, Japan, France, Cape of Good Hope, Central America and Russian possessions are of a miscellaneous character, flour, wheat, lumber and farm produce being the principal commodities shipped.

The table of treasure shipments indicates a great change of destination since 1861. Then the shipments to our Atlantic ports reached $32,628,011, while during 1863 they amounted to only $10,389,330. The treasure shipments to England on the contrary increased from $4,061,779 in 1861 to $28,467,256 in 1863. The cause of this revolution in the course of the carrying trade is sufficiently notorious and need not detain us by further observation in this connection. When "this cruel war is over" the whole matter will return to its normal condition.

The attention to wool-growing on the Pacific coast during the last five or six years has resulted in a very rapid increase of the crop in California. In 1857 the whole product of the State was only a million pounds. Now it is estimated at 7,600,000 pounds. The shipments of wool from San Francisco has been as follows for the four last years:

Shipments to	1860.	1861.	1862.	1863.
New York.....	11,767	13,244	13,127	9,862
Boston	....	1,547	8,784	6,216
England	315	1,193	78	319
Other countries..	....	3	626	....
Total bales.....	12,082	15,987	21,615	16,398

The export of the important article of quicksilver for the past six years is shown by the following table:

Exports to	1858.	1859.	1860.	1861.	1862.	1863.
N. Y. & Boston	3,559	250	400	600	2,265	95
Great Britain.....	....	....	....	2,500	1,500	1,032
Mexico.....	12,901	103	3,856	12,061	14,778	11,790
China.....	4,152	1,063	2,715	13,788	8,725	8,889
Peru	2,000	571	750	2,804	3,439	2,376
Chili	1,264	950	1,040	2,059	1,746	500
Central America	....	....	....	110	40	40
Japan	....	....	....	60	25	....
Australia.....	....	325	100	1,050	800	300
Panama	....	133	135	57	424	120
Victoria (Vancouver)	186	19	327	116	5	42
Total flasks (70 lbs.)	24,142	3,390	9,348	35,995	33,749	26,014

The manufactures of California are unexpectedly prosperous, and materially reduce the necessity for importations. Cordage, cement, blankets, white and colored flannels, cloths and cassimeres, gunpowder, leather, malt liquors, tar, rosin, turpentine, soap, wines, are now manufactured with a degree of success which will probably control the home market.

The California supply of coal, chiefly from the Mount Diablo mines is on the increase, reaching 3,700 tons in 1863; but the demand is so great as to warrant shipments from Vancouver Island, Bellingham Bay and Chili, and even from England and Australia.

The product of gold and silver on the Pacific coast is estimated at $55,000,000 for 1863, of which fully $7,000,000 was received from British Columbia. The total coinage at the San Francisco mint during the same year was $20,251,417 97.

It is contended by the commercial journals of San Francisco, that the currency of San Francisco, which is mostly coin is more abundant in proportion to population and wealth than that of the Atlantic States, altogether paper. The *Mercantile Gazette* of Feb. 12, 1864, represents the amount in circulation in the Pacific coast as $25,000,000; that the population of California with the adjoining State of Oregon and territories is 600,000 which gives $41.66 *per capita*. The total value of real and personal property on the Pacific coast is estimated by the *Gazette* to be $340,000,000, of which $25,000,000 is about 7 per cent. The currency of the loyal States east of the mountains, notwithstanding its expansion to meet the exigencies of the nation is below those rates to population and property. The population of the loyal States and of the insurrectionary districts which are held by our armies is about 24,000,000. If the currency was at the California standard—$41 *per capita*—its aggregate would be $984,000,00, and a proportion of 7 per centum upon the total valuation of property would give an equal aggregate.

Lake La Belle Canal.

The Lac La Belle Harbor and Improvement Company have allotted a contract for building a pier and excavating a canal to open a direct outlet from Lac La Belle to Lake Superior. The contract is to open a channel from the pier which is in 16 feet of water in Lake Superior, to 14 feet of water in Lake La Belle, the canal or channel to be 75 feet wide on bottom and 111 feet at top. The contract for the whole undertaking is $65,000. It is a stipulation in the contract that on or before September 1, 1865, the channel shall be open to a steamer drawing 10 feet of water. A steam excavator is now at work.

Peninsula Railroad.

The Peninsula Railroad is now completed a distance of sixty miles from Little Bay du Noquet towards Marquette, and trains are making regular trips. It is the design of the company to complete the road to Marquette by Christmas day, and the work is being pushed with considerable vigor. The line is now under the superintendence of Superintendent Baldwin, late of the Milwaukee and Chicago Railway. Considerable quantity of iron and copper ore are already being brought down to Escanaba, and one or two coaches have been added for the accommodation of passengers. The operation of the road renders the trip to Lake Superior, through the wilderness, speedy, easy and comfortable.

The close of navigation will not materially retard the travel by this route. Stages will form a connection between Green Bay and Escanaba through the season.—*Green Bay Advocate.*

☞ The construction of the Pacific Railroad, West of Omaha, Nebraska, is progressing rapidly. For a distance of 500 miles, there will not be a cut or a fill of five feet.

Baltimore and Ohio Railroad.

The following is the address made by Mr. Garrett upon taking his seat for the seventh time as President of the company:

Although, gentlemen, the President of the company for six years has been honored in a special degree by the support of the Board, this is the first occasion he has been so particularly honored as to receive a unanimous vote. I feel especially gratified in receiving such a vote, as evidencing that the great public interests which are directly represented in the management of this company, the city of Baltimore, and the State of Maryland, have been satisfied that the efforts made by the Executive, during a period of protracted and peculiar peril and difficulty, have been such as to meet their approval and endorsement. It is with a deep sense of the grand and onerous responsibilities and duties of the Presidency of the Baltimore and Ohio road, in the midst of the terrible war which still continues, that I again feel it my duty to accept the office.

The roads under your management traverse five hundred and fourteen miles of territory, mainly upon the border, and constantly subject to the vicissitudes and embarrassments connected with great military operations. I again accept the responsibilities, the anxieties and the labors of the position, feeling honored by your confidence and cordial co-operation and support, with the trust that, under your auspices, the company may continue to render the great services to the country, and to protect and promote the interests and prosperity of our fellow citizens, and more particularly of the community with which we are all so deeply identified, to the marked extent which has especially distinguished its recent history.

The present, gentlemen, seems to be an appropriate occasion, specially on account of the inability of the company to furnish the annual report for 1863 and 1864, in consequence of the unadjusted condition of its accounts with the Government—to sketch briefly the leading points of policy which under your management the company has pursued during the war, the results as far as accomplished, the prospects of the company, and its ability for increased usefulness in the future.

The leading and most important interest, requiring the greatest energy and effort on the part of the company, in view of the peculiar condition of the country, has been the perfection and completion of the road betwixt Baltimore and Washington. At the commencement of the war the main track of the Washington Branch road was in such condition only as suited the relatively light business of that period. The track was not of sufficient strength for the heavy traffic which the changed condition of the country threw upon it, neither was its iron sufficiently heavy, nor its organization and arrangements such as met the requirements of the crisis. Under these circumstances, and amid great difficulties under the adopted policy of the Board, the officers of the company first devoted their energies to the reconstruction of the main track for the Washington Branch road, and that light and interior track was converted, during the continuance of a heavy business, into a first class, excellent track, placed upon heavy cross ties and relaid with new iron.

I have the pleasure of stating, that, within ten days from this period, *the additional second track will be completed*, and by the day of the opening of Congress on the 5th of December next, *the entire line will be perfected and in use between Baltimore and Washington.*

It will be perfected, too, as a strictly first class double track road—a road to which there will be none superior in the country—a double track, iron bridges of the most costly and permanent character, placed upon the most solid masonry, have been constructed over Paint Branch, and over the Savage, Patuxent and Potomac Rivers. All other requisite and desirable improvements have been made of the most superior character.

At a period when accidents are common

throughout the country, in many cases in consequence of the condition of the railroad, the Baltimore and Ohio Company, in the midst of all its difficulties, presents to the public practically a *new double track* road for the business of the country. It presents this road, too, under circumstances of the most extraordinary difficulty. At four different periods the company had placed upon that track the cross ties, which had been transported 400 miles from the Western divisions of the road, and the iron and other material necessary for its construction, but in consequence of the destruction of numerous sections upon its main line by the rebel armies, this material became essential for the repair and reconstruction of the road west of Harper's Ferry, and was removed for that object. Under these circumstances, our people will appreciate the energy and determination that has enabled the company to accomplish the construction of this necessary improvement.

In that connection the Board has determined upon the construction and completion of a double track betwixt Baltimore and Cumberland, and when the double track upon the Washington Branch is finished the large force of laborers now employed thereon will be placed at the disposal of the company, and even in this difficult period the double track on the Main Stem will be prosecuted with vigor, so that the policy determined on by the Board shall be carried into the earliest practicable effect.

In the midst of the destruction of its equipment and property the company has not failed to continue its efforts, not only to maintain its strength, but to add to its equipment and power. During the past two years eleven first class ten-wheel locomotives have been built at the shops of the company, at Mount Clare, and placed upon the road; four first class locomotives have been purchased, and at this time twenty-three locomotives are under construction, all of the materials for which have been secured and are in possession of the company, and nearly two-thirds of the work on these engines is accomplished.

It is hoped that at no distant period, if the necessary mechanical force can be obtained, this large additional power will be placed upon the road.

Notwithstanding losses of train upon train of passenger cars, the company has continued effectively to supply their places, and the immense increase in the passenger business of the company has been transacted with less proportion of accidents than any road in the country, and with a result satisfactory upon the whole far beyond what could have been anticipated. At this time, too, looking to the future necessities of the company, it has under construction in its own shops and under contract, thirty large first class passenger cars, which, in the course of three months, it expects to have upon its road.

The extensive foundry which has been under construction at Mount Clare is nearly completed. This foundry is designed to enable the company to proceed with the iron bridge work upon its whole line, as well as the other bridge work which it designs to execute. It has been your determination, gentlemen, that every wooden bridge destroyed by the enemy on our road shall be substituted by a first class iron bridge. This foundry adds that additional capacity by which this result will be accomplished, and it will enable the mechanics of Baltimore to furnish at the shops of Mount Clare the immense iron structure that are to span the Ohio River at Parkersburg and Bellaire. The work upon these two great bridges has been commenced, quarries have been opened, and the largest forces that can be obtained have been engaged in quarrying the stone for these great enterprises, and thus the arrangements are being made by which the connections betwixt the Marietta and Cincinnati and Parkersburg roads, and the Central Ohio and the Baltimore and Ohio roads, will be completed at the earliest practicable period.

The surveys for the road, in which the Board decided to take an interest, to connect the Main Stem of the Baltimore and Ohio road with Hagerstown, have progressed satisfactorily. The engineers report that an admirable line of about twenty-three miles is being located *via* Antietam Creek to Hagerstown, and it will doubtless be the policy of this company, if there should prove to be some failure in regard to private subscription, that the people of Washington County and the people of Baltimore shall, within a reasonable period, have the advantages of that line.

The President regards it as important to the interests of the State and our people that the line shall be constructed, and, in this view, he believes he has the co-operation and judgment of a large majority, if not of every member of the Board.

Within the past few months a negotiation, long pending, with the city of Baltimore, has been consummated for the purchase of the interest of the city in the Northwestern Virginia Railroad. That purchase has been made on terms, and payment has been made in accordance with those terms, by which the Baltimore and Ohio Company is enabled to strengthen that corporation by giving to it the advantage of the difference betwixt the cost to the city of its interest in that road and the amount paid for that interest by the Baltimore and Ohio Company.

The reorganization of that company is progressing under the programme arranged. It has met the approval of all parties interested as far as heard from. Under those circumstances the City of Baltimore and the State of Maryland have before them the prospect of the completion, at the earliest period at which the work can be performed, of a line to the Southwest, than which none can be shorter or more advantageous to the interests of our people. The policy of the company is fixed to such arrangements as will, as rapidly as labor can be commanded, perfect that road and give it such character and importance as will cause it, in connection with the Marietta and Cincinnati line, to be the great route from the seat of National Government, and from Baltimore, to the Southwest.

During the past year, whilst rival interests were endeavoring to obtain a control of the Central Ohio Railroad—a line that was vital to the interests of the city of Baltimore and the State of Maryland, the Baltimore and Ohio has stepped forward, and, by its financial aid, has relieved that company from its embarrassments, and placed it in perfect and satisfactory relations with this company, and with our commercial interests. We have now the Central Ohio fixed as a line identified with the Baltimore and Ohio, and connecting the city of Baltimore with the capital of the State of Ohio, a point whence connections radiate in all directions to the lakes, to the West, and to the southwest.

Amidst all these grand arrangements looking to the permanent interests of our community and their prosperity, there is but a single feature of gloom. For more than a quarter of a century the most sagacious of our citizens have exhibited great anxiety and perseverance to accomplish a short and effective line to Pittsburg and the northwest. Our fathers settled that policy as the policy of wisdom, and the true policy to develop our strength and our commercial prosperity.

A line from Pittsburg to Cumberland, and a double track from Cumberland to Baltimore, assure in the future, with the routes that have been sketched, such increased business, and such effects and such impulses to the progress of our people as will cause Baltimore to leap forward in the race of prosperity, and to rival that vigor and success which have marked the progress of New York and Philadelphia.

What is necessary to accomplish this object? As was to have been anticipated, the moment the Baltimore and Ohio Company, after a period of protracted effort, and with relatively small financial ability—for you all remember that the Baltimore and Ohio road was undertaken at a period when the taxable wealth of this community was bnt $25,000,000, and the road itself has cost upwards of $30,000,000, or $5,000,000 more than the whole wealth of this community at the inception of the enterprise—had struggled on until its immediate essential objects had been realized, and then commenced to move in aid of the Connellsville road, opposition was developed.

The Pennsylvania Road and the city of Philadelphia did not touch the Pittsburg and Connellsville Railroad, felt no jealousy or apprehension regarding it, until they saw that the Baltimore and Ohio Road, with its great strength and great energy, exhibited throughout the war, under all calamities, had the ability to so arrange as to give to the people of the Northwest, and the cities of Pittsburg and Baltimore, a route that would prove a competition with the Pennsylvania Road. What then takes place? You find the Vice-President of the Pennsylvania Road, Hon. Thomas A. Scott, at the very period this Company had determined to commence by aiding the Pittsburg and Connellsville Road to the extent of one million of dollars, presenting himself at Harrisburg and doing what? Claiming that the Connellsville Road would not be built, that its charter should be rescinded because of delay in completing the road, that the Baltimore and Ohio did not intend to build it, that the city of Baltimore did not intend to build it. He desired the destruction of that charter, and asked for another charter to be granted for another line, and that same gentleman, whilst this action was taken in the Legislature of Pennsylvania, stated that he had no adverse designs to the city of Baltimore, but still stepped forward, with the enormous power and patronage of the Pennsylvania road, to destroy this right that had existed so many years. This gentleman, it is alleged, stated that he did not apprehend any difficulty from the Baltimore and Ohio Road building the Connellsville Road, and that he felt a strong interest in the city of Baltimore. How! It is asserted he stated that he would aid in building a "third" or "independent" line from Connellsville, through Hagerstown, to Baltimore. Is not this a more *ignus fatus* that is presented to our people to mislead them and destroy a right that is vital to their prosperity?

I have been struck with the interest and enthusiasm with which the friends of the Pennsylvania Road step forward to explain to the people of Philadelphia, through her leading newspapers, what they have accomplished for the interests of that city.

In the Philadelphia *Press*, during September last, the following articles appeared on this subject:

"Two railroad bills of especial significance passed last spring by the Legislature, and held unsigned by the Governor, have recently become laws under a provision in the Constitution of the State. One of these bills repeals the authority originally granted to the Pittsburg and Connellsville Railroad Company east of Connellsville, and limits their jurisdiction to the ground between Connellsville and Pittsburg.

"The other bill incorporates a new Company, with authority to build a road east from Connellsville, to connect with other roads leading to the Susquehanna and the Chesapeake. These bills, it is said, will lead to litigation, inasmuch, as it is alleged, the Pittsburg and Connellsville Railroad Company will carry the matter into the courts. But though legal issues may be invoked, the policy adopted by the State of Pennsylvania, in its legislation of last session, will, no doubt, be triumphant in the end, because its design and aim are to develop the southwestern counties of the State, a region abounding in minerals, which have been shut out from the great markets by reason of the non-completion of the Pittsburg and Connellsville Railroad.

"There is immediate and pressing need for a direct line of rail communication through the southern counties of Pennsylvania, west of the Susquehanna river, a desideratum which the new Company incorporated last session will supply, since the tail of the Pittsburg and Connellsville is now cut off at Connellsville, leaving it a serpent without rattles and without fangs. A Southern Pennsylvania Railroad across the Alleghany mountains, controlled within the State, would enhance, develop, and make available the rich coal

basins in the southwestern counties, whose better market is at the seaboard, and whose best route takes Harrisburg in its way."

Thus, gentleman, those interests denounce the Connellsville Road, when shorn of the ability to build the line to Cumberland as "the serpent without rattles and without fangs." Certainly any other system of improvement than the line to Cumberland will be harmless to Philadelphia—certainly all other systems will fail to protect the interests of Baltimore. It is astonishing when recent and continuous history constantly develops the relations of the Pennsylvania Road to Baltimore, and of the relations of the Baltimore and Ohio Company to Baltimore, that any individual interested in this community can fail to see these different relations and their effects. The Baltimore and Ohio Road is not closed by the operations of the enemy for twenty-four hours before discrimination against the city of Baltimore and discrimination against the commerce of Baltimore, on the part of Philadelphia interests and the Pennsylvania Road, commences. Rates on business to and from Baltimore are advanced, and in many cases cars cannot be furnished for transportation to Baltimore. It is well known among our merchants, especially our provision merchants, so recently as during last winter, whilst cars were offered by the Pennsylvania Road for trade to Philadelphia, no cars could be obtained for trade to Baltimore, although the Pennsylvania Road had full control of the Northern Central Road by Harrisburg to Baltimore. The Pennsylvania Road is governed by the ordinary motives of business men. The Pennsylvania Road is identified with Philadelphia as the Baltimore and Ohio Road is identified with Baltimore. Should we fail in preserving the charter of the Pittsburg and Connellsville Road, those in our community who have been in any degree instrumental in that failure will have cause for the greatest regret when it is too late. But what is the difficulty? It is stated that some parties desire an "independent" road through the territory of Pennsylvania to the Maryland line, and thence through Hagerstown to Baltimore. Shall we judge of grave business subjects by professions or by facts? What is the plain common sense of the case? are the facts not clear to the judgment of every merchant and business man?

The only hope for Baltimore in connection with the large trade of Pittsburg and the Northwest, is the completion of the Connellsville Road to Cumberland.

It is the only basis we have to obtain a position essential to the development of the future prosperity of Baltimore.

I have felt it proper in sketching the general policy of the Company, to call attention to the advantages connected with these improvements, which are in successful progress, and the difficulties in connection with a leading interest, which is threatened with destruction. This is the more important as we have found, unfortunately, that the city itself, as represented by His Honor the Mayor, does not apparently accord with these views. We have found, unfortunately, that he has yielded to the alleged statements of the Vice President of the Pennsylvania Road, identified as the latter is with the interests of Philadelphia, that a third through line shall be constructed and completed, connnecting Pittsburg with Baltimore, under the auspices of the Pennsylvania Road. If there is not coldness, if there is not worse than coldness—opposition—there is certainly no friendly or active co-operation on the part of the Mayor of Baltimore in maintaining the rights and charter of the Connellsville Road, which charter it is absolutely essential to maintain to insure the prosperity and commercial strength of our city.

At this moment the subject is about being presented up in the courts, and the Connellsville Company has been driven, in order to maintain its charter, not with the aid of the City of Baltimore, but without that aid, to rely upon its chartered rights, as a Maryland corporation, to obtain a proper *status* is the United States District Court of Pennsylvania.

It is believed that the act of the Legislature of Pennsylvania in attempting to rescind, after millions of money have been spent in constructing part of the line, the charter of the Pittsburg and Connellsville Company for the remainder will prove as illegal as it is unprecedented, and it is due to the character as well as the interests of Baltimore that efforts should be made to maintain this right and privilege, which has been viewed by many of our most thoughtful citizens as of the most vital importance.

It is believed the Legislature of Pennsylvania acted upon erroneous statements and information, and it is known that a large portion of the population of the western part of the State particularly favor the completion of the Connellsville Road.

Whilst this great danger impends it has been indicated by the Board, through its proper organs, that if the city feels any hesitation about that road being built, if it feels that its million of mortgage debt is to be lost, such is the conviction of public duty and interest on the part of the Baltimore and Ohio Road, that this Company will step forward and purchase from the city its interest in that road.

Does the Baltimore and Ohio Road desire any speculation in purchasing a lien upon a weak road that has never paid one cent of interest upon this debt? On the contrary, is it not actuated by a high sense of public duty and by a determination to maintain the interests of Baltimore, of Pittsburg, of the Northwest, and the interests of the National Capital?

If the Company succeed in its object, it will furnish a direct, superior, and convenient route for members of Congress and for all visitors to the National Capital, and will promote the interests of the whole country.

Can this Board be actuated by any but such motives when it is willing to spend more than a million of dollars in purchasing from the city this interest?

What is the inducement? Do we not know there is neither labor nor means to build that third line? Is not the very action this Board has taken in pressing forward its works under such circumstances of gloom and difficulty as the world has never seen in connection with railroad history, indicative of its high purposes? Is this Company not perfecting its line and carrying out the grandest views of its most sagacious founders and managers? Is it not pressing forward its double track? Is it not struggling when it can scarcely command the men for its present service, to build more equipments, to increase its capacity, to add to the strength and power of the city of Baltimnre and the counties upon the line, and the interests that are identified with it over its entire route? Can these potent facts be ignored? Is there any incentive to the managers of the Company in this policy but public interest? Is there aught but comprehensive views, such as should govern those entrusted with the interest of the leading institution of the State?

The facts involved in this case must be appreciated by the public, and it is to be desired that such an examination of the whole subject will occur as will produce the removal of this only shadow upon the prosperity of Baltimore and Maryland. In connection with the system of the internal improvements, it is hoped that the city will either dispose of its interest to the Baltimore and Ohio Railroad Company, or co-operate with this company in maintaining the charter and securing the construction of the Pittsburg and Connellsville Railroad. The charter is not yet out of the power of the people of Western Pennsylvania and of Maryland. The Courts are just—the ermine is unsullied. We have decided convictions that if the City of Baltimore and the other great interests connected with that work present their cases in the United States Court, that that charter, which has been wrongfully rescinded, and which can be shown to have been wrongfully rescinded, because it was rescinded on the alleged ground that there was no desire to build the road, whilst really beyond doubt the chief reason on the part of the Pennsylvania road in urging this abrogation of the charter was in the conviction that the road would be built.

Under such circumstances the hope cannot be misplaced that the city will so act as to aid in effecting the object, and that the charter of the Pittsburg and Connellsville Road will be preserved. If this anticipation be realized the Baltimore and Ohio Company can then proceed to perfect all the great lines of railway required to ensure a splendid fruition in the future of Baltimore, and in binding, with the close and cordial bands of mutual interest, the varied and extensive agricultural and commercial regions.

As the policy on which the Board has decided is broad, comprehensive and patriotic, the President will, with pride and satisfaction, give his best energies, under your auspices, and with your continued co-operation and support, to achieve the desired result.

Interest and Dividends.

The Philadelphia and Reading Railroad Company have declared a dividend of 15 per cent. on the Common and Preferred Stock, clear of National and State taxes, payable in Common Stock on 31st December next, on all Stock standing on the Books of the Company at the close of business on the 15th.

Stockholders whose names are registered on the New York Books will be paid at the Farmer's Loan and Trust Compay, No. 56 Wall street.

The Boston and Lowell Railroad Company have declared a dividend of $17 50 per share. The Northern (N. H.) Railroad Company, and the Portland, Saco and Portsmouth Railroad Company 3 per cent. each.

The Little Miami Railroad Company have declared a dividend of 5 per cent., payable on the 15th inst.

The Wyoming Valley Canal Company has declared a quarterly dividend of four per cent., or two dollars per share, payable on the 24th inst. The transfer books will be closed from the 15th to the 26th inst. There will be an issue of 1000 shares of stock at $50 per share, to stockholders, in the proportion of one share for every fourteen held by them on the 15th inst., and to be paid for on or before the 22d inst. This issue of stock is authorized for the purpose of paying off and cancelling the bonds of the Company to that amount.

☞ The Indianapolis, Pittsburg and Cleveland, and Bellefontaine and Indiana Railroads have been consolidated under the name of the Bellefontaine Railway Company. The capital stock of the joint company is stated at $3,582,500. The bonded debt at the date of their last annual report was $2,056,000.

☞ The exports of Treasure from San Francisco from October 1st to 31st, were as follows:—

Total since October 1st	$4,365,583 90
Previously this year	48,772,559 00
Total since January 1, 1864	$48,138,142 90
Corresponding period, 1863	37,661,039 79
Excess this year	$10,477,103 11

☞ Mayor Chapman, accompanied by a number of gentlemen of experience in railway matters, left this city on Wednesday for the purpose of locating the Independent Route to Cumberland, in connection with the Pittsburg and Connellsville Railroad. It is expected that he will be absent several days.—*Balt. American, Dec. 2.*

☞ The work upon the bridge over the Hudson River, at Albany, N. Y., for railroad and other purposes, is said to be progressing favorably.

American Railroad Journal.

Saturday, December 10, 1864.

Stock Exchange and Money Market.

Congress being in session, the public look to it with great anxiety for some movement in relation to the financial condition of the country. Our military affairs are in a satisfactory position; what we now want is an arrangement by which our expenditures may be reduced to the most economical standard, compatible with perfect efficiency, our currency restored to its normal condition, and the means provided for the gradual but absolute redemption of the National debt.

The most obvious and immediate retrenchment is that which can be at once applied to the Navy Department. We have now an enormous number of vessels of war, upwards of six hundred, manned by fifty thousand seamen. We are going on building a large number more, and many of them of models and with machinery condemned by scientific and practical men. When Wilmington is taken, every harbor of the enemy will be effectually closed, and of our sea-going steamers one half will be without employment. It is therefore the evident duty of Congress to stop all further outlays in this quarter, and they can thus save the country a hundred millions a year, enough in fact to form a sinking fund to discharge the public debt, without an increase of our present taxation.

Another subject which ought to be considered by Congress is an alteration or amendment of the constitution by which export duties may be levied on certain of our great staples, which are indispensable to foreign nations, and which we alone produce in quantities enough to meet the demand. These are cotton, tobacco and petroleum. It has hitherto been the policy of most Governments to avoid the imposition of this kind of duty, since it is supposed that it checks foreign demand and raises up competition. Yet where competition cannot arise, it is deemed a legitimate measure. Russia levies an export duty on its tallow, which is an article, it almost exclusively furnishes, produced from its Kalmuck sheep; the principal continental European nations levy an export duty on rags, and Mexico has long charged it on its exports of silver. Our tobacco is enormously taxed in Great Britain, and furnishes a large amount of its revenue. Its importation is a monopoly in France and known as the Regie, also furnishing a large income to the Imperial treasury. Both these nations by their insidious conduct, and underhanded support of the rebels, have prolonged the war, and of course increased the amount of our National debt. It would be perfectly fair in us to compel them to pay for some part of their own work.

Our petroleum is suddenly become an immense interest, is rapidly extending in the production, and is being sent to all parts of the world, especially where the heat of the climate prevents the extensive use of candles, and where whale oil alone has been in use. These three articles of export, cotton, tobacco and petroleum, may be safely set down as likely to amount in value in the aggregate of two hundred and fifty millions of dollars per annum, the moment peace is restored, and a duty say, of 10 per cent., would not affect the quantity exported, would give twenty-five millions per annum to the Treasury, and be paid by foreign consumers entirely. Certainly every measure which will reduce our debt and taxation, of the character mentioned should be adopted without hesitation.

With regard to our financial measures, there is a general desire that our currency may be brought as nearly as possible to a metallic basis. This can only be done by repressing inflation. But in what quarter? Must the Government, which after all gives us the best paper we have, whose promises to pay are not only specially preferred by the people, but are actually hoarded, as the safest of all kinds of paper, must the Government borrow what it wants of the local banks, and pay them 6 per cent. for the use of their promises to pay which they do not pretend to redeem either in legal tenders or specie? They are most of them already inflated in the largest degree, and no doubt would be quite ready to in-

flate still more, if they can coax or frighten the Government to borrow a few hundred millions from them, and yield to them exclusively the money issuing power. It is of course very difficult to steer between this Scylla and Charybdis; and yet it may be done. If we could turn our National and local banks into mere institutions for loans and deposits, and they were prohibited from issuing their bills at all, or were so taxed that there would be no profit in issuing them, being confined to lending money and not paper, the Government could maintain the whole of its present issue of legal tenders without difficulty, and we should have the best National currency in the world. The number of these National banks is now 601, with an aggregate capital of $115,718,870, scattered far and wide, and an aggregate circulation of $70,507,840. They certainly have kept within the limits of their capital and the restrictions of the law, and pay a large tax besides, while the local banks have not hesitated to put out every dollar of circulation in every State where their circulation is less restricted. So far, it is evident we have not much to fear from the National banks in this respect. Just as soon as the old banks come into the system they will be compelled to curtail their circulation in conformity with the act, and one reason why so many of them are opposed to it, is because they know this will be the result.

Government securities are not only firm but on the advance, as will be seen by our quotations in another place. It is believed that no more gold interest paying securities will be put out, and this causes an additional demand for those now in the market. We think this is an apparent rather than a real change in the system, for when the war is over, currency will be the same as specie. An expectation contrary to this, pre-supposes a long war or a long disorganized currency, and we do not believe in either.

Mr. Blodget in his recent financial work on the commerce of the country, asserts with every show of truth, that there has been no real balance of trade against the United States for several years past, and this we are inclined to think is true. The difference between total imports and exports is not a criterion, for if it is, Great Britain is going behindhand by her own showing hundreds of millions every year. And if there is no real balance of trade against us as claimed by Mr. Blodget, the demand for specie made on us from abroad is either no more than we choose to spare, or it is raised by foreign houses on their credit by bills of exchange, or direct loans under instructions to do so, intended to cripple our specie reserves. It is a well-known fact for which we have the best British authority obtained through the latest arrivals, that all the specie shipped from this country to England at the present time is shipped at a loss, and this is also evident from the price in gold for exchange, which is for the greater part of the time below par. The President in his very dignified and lucid message alludes to a plan of raising money on a system allied to annuities, which shall consist of securities free from taxation, and not subject to legal process for debt. This would be quite popular with a large class of persons. Fortunes, and even a competence are very insecure in this country which is full of enterprise and risk. Unforeseen involvements break down large numbers of innocent and worthy citizens. It would be a remarkable circumstance, and in some measure compensate for the want of power to make provision for families under our existing laws, if there were allowed permanent investments in at least one kind of property, which nothing but a general break down of the Government could possibly impair. The adoption of this principle if we understand it, would give great inducements to the careful and industrious to place a portion of their surplus wealth in the securities proposed. Nor would it be injurious to trade and commerce, which ought not to be founded on the security of judgments, jails and the personal degradation of men, but on mens' character, their probity and their general conduct. He who gives credit does so at his own option. No law compels him to give it, and if there can be any method devised such as that of the President, (for it amounts to this,) by which families may be saved from poverty by a judicious and provident investment in these new Government securities, when they are in good circumstances, it will prevent a vast amount of misery, and of crime. We are therefore inclined to think the suggestion of the President is worthy of serious consideration. It would certainly give an immense amount of money to the National Treasury, for which a very low rate of interest only would have to be paid, in consequence of the advantage attached to the security.

We notice in connection with this movement of the Government securities to a higher price, that the gold coinage at the mint for the month of November was principally in double eagles, with a total of $891,971 34, and the silver in half dollars, $42,223 34, and of copper 8,755,000 pieces, of one and two cents value. Notwithstanding this enormous issue very few are in circulation, and this can only be accounted for except by the theory that they are hoarded by small tradesmen and poor working people. We are informed that the conductors of our city cars lose on each trip in making change, 50 cents on the average, so that the loss on the numerous lines, with their numerous cars and eight or nine trips each per day, must be very large to the companies, which to gain the extra penny for the fare, experience considerable difficulty in supplying the demand.

It is understood that our copper coins afford a large profit to the Government, and it is to be hoped it will continue to issue them without stint so long as they are caught up and hoarded with such little grounds for it.

The demand for the National securities on the continent continues active, and is likely to continue. Foreign correspondents assured their friends here, that nothing was wanting to place our Government, and the cause of the Union in the very highest possible credit abroad, but a nearly unanimous expression of the people in favor of the President. This has been given, and we confidently expect to hear that the prediction has been verified. Financially the President's message will be of incalculable importance to the friends of the Union throughout the world.

The railway share market remains without animation, except in cases where immediate dividends are about to be realized. Railway bonds are in good oder, and a new company, (the Adirondack,) has recently had twice as much money offered it, as it advertised for. Commercial loans are negotiated easily, and at moderate rates. The associated banks the last week increased their transactions in this line $3,683,421, and did it in perfect security as their deposits increased $4,010,742, though their specie only increased the same time by $25,203, and their circulation decreased by $45,427.

With regard to the new issue of 7-30's it is understood Mr. Fessenden intends to rely on them for a time, and we think he may very properly do so, since his receipts appear to be from taxation and customs more than two hundred millions per annum. We learn that their character is as follows:

They are all dated August 15th, 1864, and have three years to run from that date. They are in denominations of $50, $100, $500 and $1,000. Each note has five coupons payable on the 15th of February and August in each year. This interest is two cents a day on every $100, and is in currency. When the notes mature, the holder can take the money, or he can convert them into the 5-20 six per cent. gold-interest bonds. The subscriptions are increasing. The option to take the money in August, 1867, or to take the 5-20 bonds, is a privilege not to be lost sight of. These notes produce in the years they have to run, $21 90, in currency, on every $100. A 5-20 bond produces $18 in gold. Then the question is, how high will gold range or average during the three years? If gold averages 200, a $100 5-20 bond notes, in currency $36, or $14 10 more than a 7 3-10 note; but if gold shall average only 150 for the three years, then a 5-20 bond will yield in currency only $5 10 more than the 7 3-10 notes. Therefore, the premium on a 5-20 bond must be estimated according to the estimated price of gold from now to August 1867.

The financial condition of the country as appears from the documents submitted to Congress with the Message, is perfectly sound, and capable of much greater power than has yet been put forth.

We observe with great satisfaction that the Post Master General, has adopted the suggestion we have for the last two years repeatedly urged on our National authorities, of employing our surplus naval steamers in carrying mails and passengers on the Ocean. This is the most recuperative measure of a commercial character of all the others before Congress. Let us have a dozen lines of armed Mail Steam Packets, and our trade will at once revive. Private associations even with heavy subsidies could not establish them in a dozen years.

The balance in the Sub-Treasury on Wednesday was $82,484,780 08.

The aggregate value of the imports of general merchandise, other than dry goods and specie, at this port for the week ending December 5, was $1,278,576, against $2,386,342 in 1863, and $2,938,554 in 1862.

The exports from New York for the week ending December 5, were $3,998,585 against $3,505,610 in 1863, and $3,349,504 in 1862. The shipments of specie since January 1, have been $45,546,385. The exports since January 1, have been $199,673,814 against $160,399,889, in 1863, an increase of $39,282,915. The customs gold revenue at New York, specially pledged to the payment of the interest on the funded and fundable debt of the United States from January 1 to December 26, was $64,137,935.

The value of foreign goods imported into the port of Boston for the week ending December 2, was $397,418, against $864,865 for the corresponding week in 1863. The exports were $518,429

against $280,243 for the corresponding week in 1863.

The foreign exports from the port of Baltimore during the past week were valued at $167,390.

Duties on Steel.

The use of steel in railways for rails, axles and tires, is beginning to be considered an imperative duty with our railway companies. Within a few months past accidents from defective rails have frightfully multiplied, and it is now evident that the ordinary iron bars can no longer be trusted. At this critical moment, comes the discovery of the superiority of steel for this purpose, and the best methods of its production. Its superior strength was not only demonstrable a priori, but is established by actual experience.

That the steel rail would come at once into use in this country as it has in Europe, there can be no doubt except for the high duty, increased by a recent decision of the Secretary of the Treasury under the tariff of July 1, 1864.

The comparative duty now levied upon iron and steel rails, axles and tires, is as follows:

Iron rails pay	60 cents	per 100 lbs.
" tires "	3 "	per lb.
" straight axles	2 "	"
" crank "	2 "	"
Steel ditto @ 45 per cent ad val., equal to	$2.50	per 100 lbs.
" " " " " "	5½ cents	per lb.
" " " " " "	3½@4½ cents.	
" " " " " "	20@25 cts.	per lb.

Formerly and under the tariff of 1862, these articles of steel came under the title of "Steel in form not otherwise provided for." Iron rails are mentioned in the tariff and specific rates of duty are laid upon them, but those manufactured of steel are not mentioned, and so they are now taxed under the head of "Manufactures of steel.' It is contended that there is an error in the view taken of the article itself. A steel rail is but one production, and not that of several processes. The formation of the material and the bringing it into shape are one process and simultaneous. It is never in the shape of merchantable steel, and this is proved by the fact that both tires and rails of steel as now manufactured cost much less than ordinary bars of steel. It would seem therefore, that the discrimination which we have pointed out is unjust, and has two bad consequences; it lessens the import and of course the amount of revenue, and it prevents us from having the best kinds of rails upon our roads.

The attention of Congress should be immediately directed to the subject.

☞ We invite attention to the advertisement of the Ninth National Bank in another column. This institution is a fiscal agent for the Government, and one of its depositaries. It offers particular advantages to purchasers of the new 7-30s, converts the old issues into 6s of 1881, and in addition to performing the functions of a Bank, acts as a Broker in all cases of Government securities for parties wishing to exchange or invest. This new feature is of great importance, protecting those who do business with them, from the dangers and losses which so often occur to those who deal with individual brokers of whose responsibility there is not always satisfactory evidence.

The Pacific States.

On this slope of the continent State after State, emerging from the chrysalis of inactivity, begins to spread its wings and wheel into the line of independent sovereignties. We shall in a very brief period of time add seven or eight new States to the galaxy, and, when they are organized and admitted, we shall form a very important and considerable portion of the American Union. The new State of Nevada will doubtless be admitted into the Union at the approaching session of Congress. The group of Pacific States will at no distant day comprise California, Oregon, Nevada, Deseret or Utah, Idaho, Washington, Arizona, and (on our eastern boundary) the States of Colorada, Dakota and New Mexico. These ten will be entitled to choose an aggregate of twenty United States Senators, and their number of Representatives in Congress will be apportioned according to their respective populations. The State of California contains a geographical area of 188,982 square miles; Oregon, 95,274 square miles; Washington, 69,002 square miles; Utah 106,854 square miles; Nevada, 85,454 square miles; New Mexico, 120,326 square miles; Arizona, 122,737 square miles; Colorado, 105,818 square miles; Idaho, 325,659 square miles, and Dakota, 143,687 square miles; an aggregate geographical area of one million three hundred and sixty-three thousand seven hundred and ninety-three square miles; a country large enough to subsist a population greater than that of all the Atlantic States combined. These States embrace every variety of climate and soil, and an exhaustless mine of wealth. Idaho, which was last year erected into a territory of the United States, already promises to rival California in its rich mineral deposits.

The condition of these States, and the advance of the tide of population, makes us more sensible every succeeding year of the want of a continental railway—the only means of communication between the East and West which can satisfy the people. We begin to think that the act of Congress, providing for the construction of this road, which was passed only after many years of effort and labor, is a dead letter upon the statute. What the country demands is active, efficient, and practical men to be engaged; we have no time to wait for the sale of the charter to foreign capitalists, but we want the road. In six months one hundred thousand laborers might be profitably employed upon it, and in three or four years from the date of the passage of the act of Congress the first locomotive might have made the pioneer trip from St. Louis to San Francisco—*San Francisco Argus.*

Liability of Common Carriers.

A decision in regard to the liabilities of railroad companies respecting freight, and one having an important bearing on common carriers generally, was recently rendered in Cincinnati. The report is given as follows:—

The case of John C. Nye, of Cincinnati, against the Baltimore and Ohio Railroad Company, to recover compensation for loss sustained by damage to fifty-two hogsheads of bacon, valued at three thousand dollars, detained at Leesburg on their transit from Parkersburg to Baltimore, in May, 1863, by reason of the railroad being in possession of the rebel army under General Lee, was recently decided, in the United States Circuit Court, in favor of the defendant. Associate Justice Giles delivered an opinion, in which he decided that contracts for the transportation of goods by carriers had reference always to those circumstances of which both parties are assumed to have due knowledge, such as the condition of the country and the season of the year; and that the carrier undertook to transport the goods in a reasonable time, taking all such circumstances into consideration; that in the present case the circumstances of the country entered into the contract, and if the railroad company transported the goods as speedily as these circumstances permitted, they were not responsible either for damages caused by delay, as regarded time or to the goods during the delay, if such damages were not caused by the negligence of the defendants. The Court further decided that the guarantee against military seizure had reference to the seizure of the road by the enemy, whereby delay was produced. The Court having pronounced its opinion told the jury that their verdict must be for the defendant on the case which had been submitted; but the plaintiff, when called, made no answer, preferring to submit to a non-suit. This decision is regarded as very important, as a number of other cases of like character are pending in the courts.

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending Nov. 25, 1864, was as follows:

Passengers	$25,778 41
Freight and live stock	26,625 83
Mails and sundries	4,035 98
Total	$56,440 21
Corresponding week of 1863	63,509 86
Decrease	$6,869 65

The earnings of the Marietta and Cincinnati Railroad for the 4th week in November:

	1864.	1863.
Passengers	$12,033 61	$5,223 70
Freight	19,853 41	14,057 70
Mail, express & telegraph	1,084 48	868 71
Total	$32,971 50	$20,150 11
Total this month to date	$97,047 18	$76,763 85
Total since Jan. 1	$924,997 28	$641,362 31

The earnings of the Grand Trunk Railway for the week ending Nov. 26, 1864, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$42,139 00
Express, freight, mails and sundries	3,124 00
Freight and live stock	84,640 00
Total	$129,903 00
Corresponding week, 1863	126,142 00
Increase	$3,761 00

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Nov. 21, 1864, were:

	1864.	1863.
Passengers	$3,173 23	$2,197 69
Freight	10,234 22	8,104 16
Express	104 16	75 00
Mails	296 58	296 58
Total	$13,808 19	$10,673 43

Receipts from January 1st to Nov. 21:

1864	$526,042 66
1863	367,581 95
Increase	$158,460 71

The earnings of the Michigan Southern and Northern Indiana Railroad for the 3d week of November, 1864, were $102,020 00
Corresponding week of previous year. 75,598 00
Increase $26,422 00

The earnings of the Cleveland and Toledo Railroad for the 3d week in Nov. were $44,476 00
Corresponding week of previous year.. 32,648 00
Increase $11,838 00

The earnings of the Toledo and Wabash Railroad Company for the third week of November 1864, were $54,968 00
Corresponding week of previous year. 31,810 00
Increase $23,157 00

The earnings of the Michigan Central Railroad for the 3d week in Nov., 1864, were $96,573 71
Corresponding week of previous year.. 74,446 09
Increase $22,127 62

The earnings of the Chicago and Rock Island Railroad for the 3d week in November, 1864, were $86,696 00
Corresponding week of previous year.. 48,174 00
Increase $38,623 00

Obligation of Railway Companies to Carry Goods. Restricting Coal Traffic. Common Carriers.

In the recent matter of the complaint of William Oxlade against The North Eastern Railway Company, the plaintiff obtained a rule calling upon the defendants to show cause why an injunction should not issue against them pursuant to the Railway and Canal Traffic Act, of 1854, "to restrain them from violating or contravening the said act, and enjoining obedience to the same; and to restrain the said company from subjecting the said plaintiff and his traffic respectively to undue and unreasonable prejudice and disadvantage in respect of the matters referred to in the said affidavit, and in particular enjoining the said company to forward the coals and trucks of the complainant from the Terry Hill Station, to the other stations mentioned in the said affidavit, that is to say, York, Leyburn, and Bedale respectively, in like manner and upon the same terms as they forward coals and trucks for other persons," with costs.

The motion was founded upon an affidavit of Mr. Oxlade, of which the following are the material paragraphs:

1. I carry on my business of a coal merchant at Farmer's Moat, York, England, and I sell considerable quantities of coal at York, Leyburn, and Bedale.

2. The North Eastern Railway Company are the company referred to in the North Eastern Railway Company's Act (17 and 18 Vict. CCCXI.) They are the owners of the North Eastern Railway mentioned in that act, and of various stations on that railway including a station called the Terry Hill Station, where the said railway joins with the Clarence railway, and stations at York, Bedale, and Leyburn aforesaid.

3. I have a contract subsisting with the owners of the Cox Hoe colliery, in the county of Durham, for the supply by them to me of 5000 tons of coal to be by them loaded in my trucks, and conveyed to the said Terry Hill Station, at the rate of not less than 60 tons per week, up to the 4th of November instant (1863), the said colliery owners have employed the said company to convey the said coals; but on that day the said colliery owners declined further to allow the company's charge for the conveyance of my coals to be charged to them.

4. In pursuance of the said contract, 16 trucks containing coals consigned to me were on the 4th of November instant, delivered by the said Colliery owners at Terry Hill Station. The said trucks and their said contents then were and still are my property.

5. On that day I requested the general manager of the company to forward the said trucks with their said contents to me at Leyburn, Bedale, and York stations respectively. I then produced to the said general manager the sum of 50*l.* in bank of England notes, and requested him to take the company's charge whatever it might be, for forwarding the said trucks as aforesaid. He then refused to accept any money, and refused to make

any arrangement for forwarding the said trucks, or to give any information as to when they would be forwarded.

6. On the 5th of November instant, I tendered 50*l.* to the station master of the company at the said Terry Hill Station (who manages the forwarding of traffic from that station), and requested him to forward the said trucks to the said stations as aforesaid, and to take the company's charge, whatever it might be, for so doing. He then refused to take any money, and refused to forward the said trucks, stating that he had instructions from the company not to receive or forward any of my trucks.

8. The said company have for years past conveyed and still convey coals in trucks which are similar in all respects to my said trucks, and belong in some cases to the said company and in others to the persons employing the said company from the said Terry Hill Station to the same stations and places to which I requested my said coals to be carried as aforesaid, for the owners of the said Cox Hoe colliery, the owners of Byers Green colliery, Whitworth colliery, and many others; and have also for several months next preceding November instant conveyed from the said Terry Hill Station to the said other stations coals supplied by the owners of the said Cox Hoe colliery, under the said contract, to me, in my trucks.

9. On or about the 4th of November instant, I was informed in writing by the owners of the said Cox Hoe colliery, that they had received a letter from the general manager of the said railway company, stating that, as the said colliery owners had declined to allow the carriage of coals conveyed to me to be charged in account to the said colliery owners, the said company would not in future receive or forward trucks containing my coals.

10. My said trucks were in all respects fitted for the purpose of conveying the said coals as requested by me, and the sum tendered by me as aforesaid far exceeded any charge which the said company can legitimately make, or in fact claim to make for the service required by me. No objection whatever was made to the said trucks, nor to the amount offered. The said company have ample means and conveniences for conveying my said trucks as requested by me, and have had ample time for so doing; and they have daily since the 4th of November instant, conveyed trucks of coals from the said Terry Hill Station to York, Bedale and Leyburn, and left my said trucks behind. The only reason assigned on behalf of the said company for not conveying coals for me, is, that I am not a colliery owner; and I verily believe that no other reason exists, I have been informed and believe that the object of the company is, to restrict the consignment of coals for sale at York, Bedale, and Leyburn, and other places on the North Eastern Railway, to colliery owners and their agents.

11. The Clarence Railway communicates with many collieries in the Durham coal field; and practically the only means of conveying coals from these collieries to York, Bedale, and Seyburn, is, by the said Clarence railway to the said Terry Hill Station, and thence by the said North Eastern Railway to the said York, Bedale, and Seyburn stations.

12. I have occasion for the coals contained in my said trucks, which still remain at Terry Hill Station as aforesaid for the purposes of my said business; and the further detention of the said trucks, and the refusal of the said company to convey my coals, will cause great inconvenience and damage to me."

The company now showed cause, upon an affidavit of their general manager.

ERLE, C. J.—As to the duty of the company as carriers at common law, the case of Johnson *vs.* The Midland Railway Company, 4 Exch. 367, is a distinct authority to show, that, as a general rule, railway companies are only bound to carry according to the profession they make. And I am of opinion, seeing the large amount of traffic in coals upon the North Eastern Railway,—upwards of 8,000,000 tons per annum,—there is very good reason for the company saying that they will carry coals for colliery owners only. These may wait until the company are ready to receive them; but coals belonging to others, when once afloat on the line, are not managed with the same facility. The first section of Mr. Cardwell's act provides that every railway company &c., shall afford all reasonable facilities for the receiving and forwarding and delivering of traffic, &c., and no such company shall make or give any *undue* or *unreasonable* preference or advantage to or in favor of any particular person or company, or any particular description of traffic, to any *undue* or *unreasonable* prejudice or disadvantage in any respect whatsoever.

It appears from the affidavit of Captain O'Brien, (the general manager of the company) that the company are carrying coals under the regulations which were approved of by this court in the year 1857. The question then before the court was raised upon the Traffic Act. It was considered a judgment and the reasons given by the court for the conclusion there come to are quite satisfactory to my mind. I think the company have a perfect right to say that they will carry coals only for colliery owners. For the reasons alleged by them in their affidavits, it is evident they could not have the same control over the traffic, if they carried coals, for the general public. Mr. Oxlade says to the company, "Make an exception in my favor, because you have hitherto carried my coals for the owners of the Cox Hoe colliery, and I will abide by all your regulations." The answer to that, is, that if the company do this for Mr. Oxlade they would be bound to do it for all the Queen's subjects, and so would deprive themselves of the benefit of the complicated arrangements which they have found it necessary to adopt, in order to insure the safe and convenient use of their railways.

I think the rule must be discharged, and with costs.

WILLIAMS, J.—I am quite of the same opinion, I think the principles laid down by this court in the case of Oxlade and The North Eastern Railway company C. B. (N. S.) 454, must govern our decision here. If the matter is to undergo any further discussion, it must be by way of appeal against the decision in that case, and also against the decision of the court of Exchequer in Johnson *vs.* The Midland Railway Company, 4 Exch. 367. I see nothing in the system which the company have adopted, to bring them under the control of the court for an infringement of the provisions of Mr. Cardwell's Act.

The rest of the court concurring.

Rule discharged, with costs.

Union Pacific Railroad.

The first excursion train of the Union Pacific Railroad started from Wyandotte, Kansas, the eastern terminus of the line, on the 28th ult., and ran through to Lawrence, 38 miles.

☞ A joint stock company has been formed in Michigan City, Indiana, to which the Louisville New Albany and Chicago Railroad company have already subscribed one hundred thousand dollars, expecting to increase the amount to two hundred thousand dollars, for the purpose of constructing a harbor and a good port of entry at that place. The State of Indiana will be asked to aid in the work, and the projectors appear to take hold of the matter with great energy.

☞ A special meeting of the directors of the Allegheny Valley Railroad Company, has been called to meet at the company's office in Pittsburg on the 16th inst., "for the purpose of considering a contract with the Mahoning and French Creek Railway Company for the lease and extension of the Allegheny Valley Railroad, and to ratify or reject the same."

☞ The Legislature of Louisiana has passed a bill for the issue of bonds to the amount of $2,500,000, for the purpose of carrying on the civil government of the State of Louisiana, said bonds not to be sold at a greater discount than ten per cent.

☞ The Three Rivers and Arthabaska Railway is thirty-six miles long, and has stations at Buissrode, Aston, St. Celestin, St. Gregoire, and Becancour, opposite Three Rivers. The buildings, says the *Defricheur*, would be an honor even to the main line of the Grand Trunk.

☞ The stockholders of the Hempfield Railroad Company have re-elected James C. Acheson, Thomas Sweeney, S. Brady, of Wheeling, C. M. Reed, Joseph Henderson, Wm. McKennan, of Washington, and James C. Clark, of Greensburg, as directors for the ensuing year.

☞ The Lynn and Boston Horse Railroad Company propose to increase their capital stock one hundred thousand dollars, for the purpose of procuring "dummy engines," and to extend their road.

West Virginia Oil Region.

The fact has been satisfactorily established that there are rich deposits of oil in this State, on the east bank of the Ohio River, between Marietta, Ohio, and Parkersburg, West Virginia, and south and west of the latter, principally in the counties of Wirt, Wood, Pleasants and Ritchie. The principal developments are near the banks of the Hughes River, which empties into the Ohio at Parkersburg, and upon Bull Creek, Hughes Run, and the smaller affluents of the Hughes. Further north, the line of Duck Creek, which empties into the Ohio a mile above Marietta, and upon Cow Creek, still further east, have been found rich indications of oil, and already the capabilities of the basin have been tested in that direction. The

principal towns and villages in that region are as follows:—In Pleasants County, St. Mary's, Vaucluse, Parkersburg, Claysville and Kanawha. In Wood County, Belleville and Murrayville. In Wirt County, Petroleum and Elizabethtown. The facilities which this section of the country has for transportation of the oil to market are unequalled; the Baltimore and Ohio Railroad traverses its centre, and by that means Petroleum may be sent East in unlimited quantities. At Pruntytown, the intersection of the Wheeling Branch, gives access to that town, and thence by branch railroad to Greensburg the great Pennsylvania Railroad is struck. Within a few months, says the Philadelphia *Commercial List*, numerous men of capital have resorted to this region, with the intention of working the oil fountains. Wells have been sunk on Cow Run, Calf Creek, Rawsons Run, Ducks Creek, Newell's Run, Bull Creek, Sledge Fork, Horse Neck, and on other streams, the chosen names of which are more forcible than elegant. The product of these wells is satisfactory, ranging from 20 to 200 barrels a day, but none of them have been sunk sufficiently deep to prove their utmost capacity. The whole region is alive with preparations. Derricks are being erected, engines are getting ready, and boring is labored at with the utmost energy. It is estimated that by the beginning of December two hundred engines will be in operation in this section—a portion of Virginia which was sparsely settled, and wild in its character, only two years ago.

Wealth and Resources of Iowa.

This State was admitted into the Union in 1846. So rapid is the formation of the Northern territories into States, that it is hardly possible to find their boundaries in the Gazettes of only a few years back; Iowa is, however, in the centre of a cluster composed of Illinois, Missouri, Illinois and Kansas, and contains an area of 55,045 square miles, or 35,228,800 acres. In 1840, the population on this area was but 43,111, in 1846 100,000, and in 1860 674,913. The rate of increase between 1850 and 1860 was 251 per cent. It contains 14 principal cities and towns, of which the principal is Dubuque, with a population in 1860 of 13,012, very considerably increased since that time. Davenport has a population of over 11,267, Keokuk 9,000 and upwards, the others varying from 2,000 to 7,000, and all flourishing in a surprising manner.

The land under cultivation is 8,780,258 acres, and unimproved 5,649,136. The value of the farms is $118,741,405, and of the implements of husbandry used upon them $5,190,042.

The live stock consists of 174,258 horses, 5,718 asses and mules, 188,546 milch cows, 56,563 working oxen, 291,145 other cattle, 258,228 sheep, and 921,161 swine. The value of these by the last census was $21,776,786.

The products of animals was as follows: of butter, 11,520,002 lbs., cheese, 901,220, wool, 658,030, of animals slaughtered the value was $4,403,473, and the amount of wax and honey, 952,552 lbs.

The cereal crops were as follows:

Wheat, bushels	8,433,205
Rye "	176,055
Indian corn "	41,116,994
Oats "	6,879,658
Barley "	454,116
Buckwheat "	216,524

The commercial crops were of tobacco, 312,919 lbs., hops, 1,997 lbs., and flax 28,888 lbs.

The miscellaneous crops were:

Peas and beans, bushels	$45,570
Irish potatoes "	2,700,515
Sweet " "	50,938
Wine, gallons	8,706
Hay, tons	707,260
Clover seed, bushels	1,564
Grass seed "	69,432
Flax seed "	6,130
Maple sugar, lbs.	248,951
Maple molasses, gallons	97,751
Sorghum, gallons	1,993,474
Silk cocoons, lbs.	217

The value of the orchard products was $131,234, of market gardens $141,549, and of home made manufactures $314,016.

The number of manufacturing establishments in 1850 was 522, and in 1860 1,790, with a capital of $7,500,000, consuming annually of raw material $8,500,000, employing 6,577 operatives, and producing in values $14,900,000.

The value of the leading articles so produced was of

Flour and meal	$6,950,949
Lumber	2,378,529
Boots and shoes	385,296
Agricultural implements	280,037
Malt liquors (36,588 bbls.)	221,495
Spirits (383,320 gallons)	81,880
Iron castings	187,425
Steam engines	186,720
Woollen goods	167,960
Lead ore	160,500
Furniture	157,491
Printing	140,218
Soap and candles	118,170
Leather	81,760
Gas	55,900
Coal (2,900 tons)	6,500

The length of the railways completed at the close of 1863, was 872⅕ miles, at a cost of $25,704,052.

The internal artificial navigation is that on the Des Moines, which has been made by locks and dams.

The funded debt of the State in 1850, was $79,442, and in 1862, including amounts raised for war purposes, $1,122,295.

J. U. ORVIS, Pres't. JOHN T. HILL, Cashier.

THE NINTH NATIONAL BANK,

NO. 363 BROADWAY,

Capital paid in.....$1,000,000.

Fiscal agent for the United States, and Government Depository in the City of New York.

Has on hand the Popular 7 3-10 Notes, and allows ¡ per cent. to all subscribers.

Also 10-40 Bonds which are payable, principal and interest in Gold. Also converts the old 7-30s into 6s of 1881. Collects Certificates of Indebtedness. Buys and sells Quarter-Master's Checks and gives every possible facility to parties wishing to transact financial business with Government. 3m-50

WANTED

A gentleman with a capital of $25,000 to take an interest in a Car Manufacturing Establishment at New Haven, Ct. The business is already established, with a large capital invested, and in successful operation. Address this office, or box 2287 P. O., New Haven, Ct.

DELAFIELD & BAXTER'S,

Late OGDEN & DELAFIELD,

ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well papered, on application at their office, by **DELAFIELD & BAXTER, 104 Wall st.**

The above CEMENT is used in most of the fortifications building by government.

NEW YORK.

Gold, Government Securities, State and Railroad Stocks and Bonds, bought and sold on Commission exclusively, at the NEW YORK STOCK EXCHANGE.

CENTRAL

Petroleum Exchange Office

No. 10 Pine St., NEW YORK.

WED. W. CLARKE & CO.

OUR OFFICE IS OPEN TO THE COMMERCIAL public for the purchase and sale of Petroleum lands of the oil districts of Pennsylvania, Virginia, Ohio and Michigan, and for the sale of oil stocks, many of which are paying large dividends monthly.

We now have in hand for sale stocks of the following companies:

Blood Farm Petroleum Co., N. Y., Chas. Butler, Prest.
Home Petroleum Co., N. Y., Josiah Oakes, Prest.
Tarr Farm Petroleum Co., N. Y., Jas. Wadsworth, Prest.
Central Petroleum Co., N. Y., Jas. Bishop, Prest.
American Petroleum Co., N. Y., F. C. Clark, Prest.
Oil City Petroleum Co., N. Y., D. S. Duncomb, Prest.
Michigan Central Petroleum Co, N. Y., F. Prentiss, Prest.
Penna. Petroleum Co., Phila., John S. Young, Prest.

We have centered with us $31,000,000 of capital invested in petroleum, and can supply applicants with names and general "status," of most companies now organized, and general information of the oil market, both at home and abroad.

Special attention is called to a prospectus now offered to capitalists and others of the "United Petroleum Farms Association," which combines some of the most wonderful productions of the day, paying at this moment attractive dividends, and combining a capital of $15,000,000 in this single enterprise. Subscription list opened for a few days at this office.

This enterprise with the present development, is now paying over two and a half per cent. per month, with a positive prospective increase almost fabulous.

Marine & Fire Insurance.

METROPOLITAN

INSURANCE CO.,

No. 108 BROADWBY, N. Y.

Cash Capital, - - - - - $300,000
Assets, July 1, - - - - - $708,502

This Company insures at customary rates of premium, against all MARINE and INLAND NAVIGATION RISKS on CARGO or FREIGHT; also, against loss or damage by Fire.

IF PREMIUMS ARE PAID IN GOLD, LOSSES WILL BE PAID IN GOLD.

The assured receive 75 Per Cent. of the net Profit, without incurring any liability, or in lieu thereof, at their option, a liberal discount upon the premium.

All losses equitably adjusted and promptly paid.

SCRIP DIVIDEND declared Jan. 12, 1864.

THIRTY-FIVE PER CENT.

JAMES LORIMER GRAHAM, President.
ROBERT M. C. GRAHAM, Vice-President.
EDWARD A. STANSBURY, 2d Vice-President.

Commerce of the Pacific Coast.

Continued from page 1187.

VANCOUVER'S ISLAND AND BRITISH COLUMBIA.

Except Australia, British Columbia and the islands adjacent to its coast would be the only important colonial occupation of the Pacific coast by Great Britain—Mauritius, Singapore, Hong Kong and Labuan, having their chief significance in the convenience of the mercantile marine. The station of England on the northwest coast of North America will prove of great value to that nation in the future struggle for commercial if not political ascendancy in the Orient.

Vancouver's Island, with its excellent harborage on Puget's Sound, is in the latitude of Ireland, and has a nearly similar climate. But little snow falls and the frosts penetrate the soil but a few inches. In summer the temperature is milder than in England and more equable. Cattle, horses, sheep and hogs are seldom housed. The arable portions of the island constituting more than half its area have an excellent soil, in which the usual staple grains and vegetables flourish luxuriantly, and the almost evergreen turf is well suited for grazing. The country now in course of agricultural settlement is within sixty miles of Victoria, the capital of the island, and is known as the district of Cowichan. The Government price is one dollar per acre, and the terms of sale remarkably liberal as to payment, etc.

The island is the naval station of England in the north Pacific. The harbor of Esquimault, three miles from Victoria and near the Straits of San Juan is a magnificent harbor. The forests are an inexhaustible resource for shipbuilding, while the mines of Nanaimo on the sheltered navigation of the Gulf of Georgia furnish the best bituminous coal. In 1863 no less than 22,000 tons of this mineral were shipped to San Francisco alone. Behind Nanaimo a remarkable natural cleft known as Albeoni Canal leads into Barclay Sound were extensive saw-mills have been established. These details indicate the great advantages of Vancouver for the construction, repair and coaling of vessels.

Northward of Puget's Sound the coast of British Columbia is so broken with inlets and sheltered by islands as to present the greatest possible advantages for fisheries and a coasting trade. The salmon, herring, and other fisheries of this region will equal those of Norway.

British Columbia in respect of agricultural capacity may be compared with Scotland, while its mineral resources are destined to a development fully equal to the gold product of the colony of Victoria.

The progress of the colony during the first four years of its organization will be illustrated by a statement of revenue, which is raised almost entirely by customs levied at New Westminster or the mouth of the Frazer River, and by a mining license of 20 shillings per year for each man. For the year 1859 the customs duties amounted to $92,320, the receipts from other sources being quite trifling; in 1860 the customs reached $152,080, and those from other sources as land sales, port and harbor dues, licenses, etc., nearly $115,000; in 1861 the customs yielded $205,885, and other sources $190,960; and in 1862 customs $294,900, and other sources $235,250. One-third of the gross revenues is devoted to the construction of roads and bridges, which are objects of first necessity in a rugged mining country; and by the improvement of the roads the cost of transportation has already been immensely cheapened.

The land system is identical with that of Vancouver's Island, the price of land being one dollar per acre, payable on easy terms.

The mineral wealth of the colony, especially the interior district called Cariboo, which parts the waters of the Columbia, Frazer, Saskatchewan, Athabaska and Peace Rivers, to every point of the compass has lately been attested by papers read at the London Geographical Society, and is confirmed by the returns of treasure exports at New Westminster and Victoria. Allen Francis, Esq., U. S. Consul at Victoria, states that the export of gold from that port in 1863, was $2,935,170, and he computes that an equal amount is carried away in private hands. Mr. Francis communicates the following statistics of the commerce of the port.

The imports for the last three years were as follows:

Imports from—	1862.	1862.	1863.
San Francisco ..	$1,288,359	$2,345,066	$1,880,117
Washington Territ'ry & Puget's Sound	228,350	224,793	242,781
Oregon	216,603	75,370	108,603
Total U. States .	$1,733,212	$2,645,229	$2,230,501
England	$516,041	$694,278	$1,432,521
Sandwich Isl'nds	54,382	112,108	113,486
British Columbia	31,454	32,424	65,870
China	.....	22,268	45,434
Melbourne	.....	32,170	.....
Valparaiso	.....	17,000	.....
Total....	$601,877	$910,248	$1,657,311

The exports consist chiefly of coal, lumber, etc., and not inclusive of treasure are comparatively insignificant. The treasure shipment of gold by express and in freight during 1862, was $2,167,183, and during 1863 $2,935,170, and the total shipments 1858'-63, amounted to $10,200,184. By far the larger portion of this amount was carried by Wells, Fargo & Company's Express.

RUSSIA IN ASIA.

In 1858, before the British and French fleets had reached the Pei Ho, the Russians had appropriated the best results of the campaign. In May of that year Gen. Monravieff concluded a convention

at Algoor with the Chinese authorities, which enlarged Siberia almost to the absorption of Manchooria, securing to Russia a region abounding with the elements of commerce. Along the Amoor River, fed by numerous navigable tributaries and capacious enough to admit steam vessels 2,000 miles from its mouth, the Russo-Chinese treaty fixed the dividing line of the two empires, only varying from its channel by a line running to the tide waters of the Pacific, at a point which gives to Russia the best harbor on the Sea of Japan. The territory thus acquired can hardly be estimated under 300,000 square miles, rich in the products of the forest, and in mineral wealth. In securing Mantchooria or the best half of the native land of the tribes whose dynasty is dominant in China, Russia has virtually pushed her frontier to the wall of China.

In the wilderness of Central Asia west and northwest of China Proper Russia is constantly making territorial acquisitions. Even Khiva, Kokand and Khorassan are dependencies of the czar. Indeed the Desert of Gobi on the east, and the Himalayan range and the frontiers of Afghanistan and Persia on the south, are natural boundaries within which Russian influence is paramount. Mongolia, Tibet, Turkestan, are at this moment less members of the Chinese Empire than the Russian. This portion of Asia, known historically as the birthplace and scene of empire of Genghis Khan, has a considerable capacity for commerce. Stretching from the Suliman range to Siberia, from the Caspian to the sea of Okhotsk, it certainly contains a considerable population, possibly a large one which wants clothing, weapons, iron instruments, most of the appliances and some of the luxuries of civilization, and can give in exchange, hides, horns, goat's wool, camel's hair, tallow, silk, borax, gems, metals, drugs, and all that wealth which is sure to be discovered in very wide tracts of earth.

The Amoor is the true practical road to the vast regions of Northern Asia from the Pacific, and by this route only can the interior of the Russian dominion be entered. In following up the initiative of 1858, Russia has been sedulously mindful of this fact, and is now making the most of it by the establishment of a system of steam navigation and telegraphy intended ultimately to connect this remote portion of its empire with Petersburg, its capital. The telegraph already connects Petersburg with Irkutsk a distance of 5,000 miles, and will be extended to the Pacific within a single year. The colonization of the valley of the Amoor has been undertaken and already eighty steam vessels are employed in the trade with the Russian possessions of the North Pacific, while the Government extends all possible encouragement to the enterprises projected by English and American capitalists to unite the telegraph lines of the United States and British America with the Russo-Siberian line now advancing to a junction across the Behring Straits and through Russian America.

The Hawaiian Islands.

The Hawaiian or Sandwich Islands should not be omitted from the consideration of the great commercial changes which the contact of European and Asiatic civilization is destined to produce. In 1863 the external commerce of the islands had reached an aggregate of $2,201,345, and its progress is indicated by the following table:

Years.	Exports. Domestic.	Foreign.	Total.	Total Imports.
1846 ...	$301,625	$62,325	$363,750	$598,382
1856 ...	466,288	204,546	670,824	1,156,423
1860 ...	480,526	326,932	807,459	1,223,749
1861 ...	476,872	182,902	659,774	761,109
1862 ...	586,542	251,882	838,424	998,239
1863 ...	744,413	281,439	1,025,852	1,175,493

The official returns of 1863 are classified as follows by the Honolulu *Commercial Advertiser*:

	Paying Debts.	Bonded
Imports from the U. S.—Pacific Coast	$304,502	$36,617
" " " Atlantic Coast	122,770	10,327
" " Bremen	194,420	62,851
" " Great Britain	63,400	9,227
" " Vancouver	32,210	2,277
" " Sea	6,291	179,454
" " Islands of the Pacific	6,457	5,468
" " Sitka (Russian America)	-----	4,586
Total	$730,061	$241,308

Of articles exported, 3,512 pounds of cotton were sent to the United States, and the export of sugar increased from 3,000,000 pounds in 1862, to 5,292,000 pounds in 1863.

The Gold District of the Pacific Coast.

The extension of British and American settlement since 1850, expressed by the foregoing statistics of Australia, California and British Columbia is the result of gold discovery. The London *Economist* estimates the production of gold from the islands and coast of the Pacific during the fifteen years, 1849–'63, at £350,000,000 sterling, or equal to 58 per cent. upon the total computed stock of £600,000,000 sterling of gold existing in various forms in Europe and America in 1848, and conjectures that the following numerical distribution of these £350,000,000 has taken place: employed and absorbed in

Great Britain	£60,000,000	
France	110,000,000	
United States	50,000,000	
		220,000,000
Australia	£30,000,000	
California	20,000,000	
Turkey and the East	40,000,000	
Brazil, Egypt, Spain, etc.	40,000,000	
		130,000,000
Total		£350,000,000

The cheapening of the price of quicksilver and the large discoveries of silver in Nevada and Arizona have increased the annual supplies of that metal, but only to a small extent compared with gold. A larger supply may be reckoned on from the more recent discoveries of silver-lead ores in Northern Michigan.

Upon the question, now elaborately discussed, of the effect of this gold production upon its exchangeable value, the London *Economist* of Feb. 20, 1864, calls attention to the evidence afforded by comparing the average annual rates from 1841 to 1863, of the foreign exchange between England, using a gold standard, and Paris, Hamburg and Amsterdam using a silver standard, and according to this statement the fall in the value of gold as compared with silver, (the best available test at present,) in no case exceeds 2½ per cent.

Conclusion.

From the premises set forth in the foregoing summaries of the progress and present condition of the countries described, it is evident that movements of immense importance are at hand. These movements, indeed, are now in their first stages of development, and have sprung almost wholly from the gold discoveries of 1848 and 1851, since which dates the countries around the Pacific have received a civilized population and developed their resources in a wonderful degree. Co-temporaneously all the commercial States of the world have been stimulated to the utmost by the golden tide that has flowed into them, their manufactures have been extended and every interest advanced. Labor, now receives everywhere a larger reward, and generally the welfare of the human race has been enhanced. The future, however, will reap the greatest benefit. It will find yet unpeopled lands the homes of prosperous millions, and the yet unfrequented harbors the scenes of busy commerce. Gold will repay the enterprise. The relations of the several nations will also be changed. The United States, Great Britain and Russia have already divided the empire of the Pacific. These nations will probably retain their political acquisitions, but from the proximity of the west coast of America to the several countries to which we have alluded, it is more than probable that the ports of the United States will attract to them the largest share of the commerce to be developed, and thus secure to themselves commercial supremacy throughout the Pacific world. The superior energy of the immigrant population of the American shore, and their natural longing for acquisition and accumulation indicate that such will be the result of the competition for the prizes to be discovered in the new empire just rising from and circling the waste of waters we call the Pacific Ocean.

The Boonton (N. J.) Railroad.

The latest information respecting the Boonton railroad project is that the Morris & Essex Railroad Co. have decided to undertake its construction, the stock required having all been subscribed.

We learn that a new route has been surveyed, and nearly all located, starting from Denville to Boonton, and thence by way of Montville to a point near Beavertown, crossing the hill at a depression, and passing down to the Passaic river, which will be crossed above Two-Bridges, where it enters Fairfield. Then it proceeds by Little Falls and Great Notch to Bloomfield, where it will connect with the Bloomfield branch of the Morris and Essex. Near Beavertown a branch to the upper valleys of Passaic county is in contemplation.

☞ The Chaudiere Gold Company, established under the general statutes of Massachusetts, for the purpose of gold mining in Canada East, has converted all its property into cash, which it proposes to divide among its stockholders, and dissolve the corporation, as soon as a decree from the Supreme Court can be obtained.

Report of the Secretary of the Treasury.

It must be admitted that the report of Mr. Fessenden does not meet the entire expectations of the public, which looked to him for some clear well-defined system of finance for the future, founded on and justified by the acknowledged wealth and resources of the country and the patriotic willingness of the people to support every needful measure for the further support of the Government.

The report begins with a history of the origin of the present debt and its initiation by the act of

July 17, 1861, authorizing a loan of $270,000,000, that of August 5, same year levying a direct tax of $20,000,000, and an income tax of 3 per cent. These sums proving to be inadequate, Congress was called on to supply the deficiency estimated at $213,904,427, and also advised that there would be wanted for the expenses of the fiscal year commencing July 1, 1862, $475,331,245 51. The banks about this time found themselves unable to continue specie payments, (and with all their clamor as to their ability to aid the Government they have never been yet able to resume the payment of their own bills.) Various laws were then passed by Congress to meet these wants of the Government. The internal revenue act of July 1, 1862, was next passed, and on the 14th of the same month and year the tariff was largely increased. Almost cotemporaneously were passed the legal tender acts authorizing the issue of $300,000,000 of paper to be equivalent to coin, and to issue bonds to the extent of $500,000,000, subsequently increased to $511,000,000, redeemable after 5 years and payable in 20. Still further deficiencies in means being apparent, another act of March 3, 1863, authorized loans, of $300,000,000 for that year, and $600,000,000 for that ensuing, the details of which it is not necessary to state, the object of which briefly expressed was to circulate about $400,000,000, give out as much more in notes bearing interest, and to retain $50,000,000 of legal tenders to be held in reserve for the purpose of redeeming temporary deposits and for further temporary resources by the act of March 1, 1862, certificates of indebtedness were also allowed to be issued bearing 6 per cent. interest.

The report next states very frankly the difficulties of ascertaining precisely the wants of the Government from time to time, and of fixing on any policy not subject to the contingencies of the hour. The problem then is to avoid the further issue of paper money, and yet meet the indispensable necessities of the Government. It is deemed to have been wise to in order to keep a specie basis in sight, to pay interest in gold.

The expenditures for the preceding fiscal year so slightly exceeded the estimates of the department, that at the last session of Congress it was not considered necessary to increase the amount authorized to be borrowed by existing laws. Experience had shown, however, that some changes of form were advisable.

By an act approved March 3, 1864, authority was given to the Secretary to issue bonds to the amount of $200,000,000, in lieu of so much of the loan authorized by the act March 3, 1863, redeemable after any period not less than five years, and payable not more than forty years from date. At a subsequent period of the session, June 30, 1864, the authority conferred by the first section of the act of March 3, 1863, was repealed, except so far as it affected an amount of seventy-five millions then advertised, and power was given to borrow five hundred millions of dollars in bonds redeemable after five years, and payable not more than forty years from date. By the second section of the same act, authority was conferred to issue in lieu of the same amount of bonds two hundred millions in Treasury notes, which might be made a legal tender on their face value, bearing interest at a rate not exceeding 7 3-10 per centum, payable in lawful money and convertible at the pleasure of the Secretary into bonds issued under the authority of said act.

The Secretary was further embowered to substitute for Treasury notes, issued under former acts, an equal amount of notes, such as were therein authorized.

A table is appended to this report showing the amounts issued under the several acts hereinbefore referred to, to the beginning of the present fiscal year, from which it appears that by the laws in force on that day the Secretary had authority to borrow on the credit of the United States the amounts following, viz:

First—Under the act of March 3, 1863, so much of $75,000,000 advertised previously to June 30, 1864, as had not been awarded to bidders, $32,459,700.

Second—Under the act of March 3, 1864, so much as had not been subscribed for and paid into the Treasury, viz: $127,603,520.

Third—Under the act of June 30, 1864, $400,000,000.

Fourth—Amount of Treasury notes issued under former acts, which had been redeemed and cancelled, and which the Secretary was authorized to replace by notes issued under the act of June 30, 1864, $62,191,400.

Total available resources under laws authorizing loans, $622,284,625.

To this may be added the actual balance in the Treasury July 1, 1864, $18,842,588 71.

Total, $641,127,213 81.

A statement of the receipts and expenditures, estimated and actual, for the year ending June 30, 1863, will show this balance in the Treasury is obtained and the increase of the public debt during the year, viz:

RECEIPTS.

	Estimated.	Actual.
Customs	$72,562,018 42	$102,916,152 99
Lands	436,102 09	588,333 29
Miscellaneous	5,641,154 20	47,511,548 10
Direct tax		475,648 96
Internal revenue	77,599,718 59	109,741,184 10
Total	$156,239,456 17	$210,632,717 44
Add bal'nce, July 1, 1863	5,329,044 21	5,329,044 21
Aggregate	$161,568,500 35	$265,961,761 65
Estimated rec'pts from loans	594,000,000 00	618,114,884 92
Total	$755,668,500 35	$884,076,646 57

EXPENDITURES.

	Estimated.	Actual.
Fiscal service	$34,267,811 52	$2,755,599 46
Pensions & Indi'ns	7,840,314 81	7,517,930 97
War Department	385,479,511 11	690,791,842 97
Navy department	112,799,186 60	85,733,292 77
Interest on debt	59,165,136 38	53,635,421 69
Total	$1,099,731,960 42	$865,234,087 56
Deduct estim'd	360,000,000 00	
	$749,731,960 42	
Estim'ted bal'nce	5,826,539 83	$18,842,558 71
From actual receipts from loans		$618,114,884 92
Deduct balance on hand July 1, '64		18,842,558 81
It shows the amount received from loans supplied to the service of the year ending June 30, 1864		599,276,326 21

The statement may be more intelligible in another form, as follows:

Actual expenditures for the fiscal year	$865,234,087 86
Deduct receipts from ordinary sources and balance from preceding year	265,961,761 65
Balance provided from loans applied to the service of the year	$599,272,326 21

The amount derived from loans specifically stated, is as follows:

Five-twenty bonds, Act Feb. 25, 1862	$321,557,253 31
Fractional currency exceeding amount redeemed	2,702,421 25
Six per cent. bonds, Act July 11, 1861	30,565,875 35
Ten-forty bonds, Act March 3, '63	7,337,600 00
Twenty years' six per cents, Act March 3, 1863	4,140,771 05
U. S. notes, Act Feb. 25, 1862	43,859,821 46
One year six per cent. notes, Act March 3, 1863	44,520,000 00
Two year five per cent. notes, Act March 3, 1863	152,864,809 00
Three year six per cent. compound interest notes	15,000,000 00
Certificates of indebtedness exceeding amount redeemed	4,098,758 35
Whole amount	$730,642,410 97
Of which amount there was applied to repayment of public debt	112,527,526 05
Which deducted, it leaves applicable to expenditures	$618,114,884 92
Deduct balance July 1, 1864	18,842,558 71
Balance applied to the service of the year	$599,272,326 21

THE PUBLIC DEBT.

The public debt, as stated by my predecessor in his report of Dec. 10, '63, was	$1,098,793,131 87
To this amount should be added amounts paid into the Treasury previous to July 1, 1863, for which evidences of debt were subsequently issued	23,782,423 20
Amount of debt July 1, 1863	$1,122,575,604 57
Add amount of loans applied to actual expenditures as above, and balance in the Treasury July 1, 1864	618,114,884 92

MISCELLANEOUS RECEIPTS.

It gives the amount of public debt July 1, 1864	$1,740,690,489 49
The very large comparative receipts from miscellaneous sources require explanation. They are accounted for as follows, viz:	
From captured and abandoned property	$2,146,715 00
Premium on gold shipped from San Francisco to London	2,799,920 64
Sales of prizes due to captors	4,088,111 42
Internal and coastwise intercourse fees	5,800,287 20
Premium on sales of gold coin	16,498,975 49
Commutation money	12,451,896 18
All other sources	3,716,342 11
Total	$47,511,448 10

The Secretary is of the opinion that not over $25,000,000 can be safely calculated upon as likely to accrue from similar sources during the current year.

The corrected estimate of the receipts and expenditures for the present year is given as follows:

Actual unexpended balances	$380,387,050 23
For the war department	625,945,741 65
For the navy department	110,647,459 96
For the civil service	21,796,572 50
For pensions and Indians	6,590,689 12
Indefinite appropriations	9,152,007 11
Total	$1,153,818,920 57
Add interest on public debt	91,810,215 18
Total	$1,245,729,135 75

Add public debt matured and maturing during the year, viz:	
Certificates of indebtedness	$160,729,000 00
Texas debt	2,149,000 00
Loan of 1842	196,808 45
Treasury notes under Act of Mar. 2, '61, and prior thereto.	278,511 64
Total	$1,409,082,455 84

The available probable resources for the current year may then be stated as follows:

From customs	$70,272,091 98
From lands	641,185 84
From internal revenue	249,562,859 92
From miscellaneous sources	24,020,171 44
From direct tax	16,079 86
From certificates of indebtedness.	75,000,000 00
Total	$419,512,389 02
To this should be added probable unexpended balance June 30, 1864	350,000,000 00
Balance of cash July 1, 1864	18,842,558 71
Total resources	$788,354,947 73
Which deduc'd from expenditures, leaves balance to be provided for by loans	$620,727,508 11
If, however, an additional sum of fifty millions should be realized as proposed by the Commissioner, from internal duties, the amount to be raised by loans would be	570,727,508 11
From this should be deducted the public debt redeemed	88,353,320 09
Leaving as increase of public debt at the close of the year	482,374,188 02

The Secretary believes that fifty millions may be added to the receipts from the interest revenue.

The public debt on the 1st of July, 1865, is estimated to amount to $2,223,064,677 81, if the amounts to be raised correspond with the estimates.

Three hundred millions are expected to be raised from the internal revenue, and $70,000,000 only from customs, although the past year were produced as much as $103,260,320 57. Increased taxation is recommended, and an alteration in the income tax so as to include all classes, and an augmentation in the rate in proportion to their amount. The mineral lands are also suggested as a basis of credit in some form to be devised by Congress, also the permanent establishment of a sinking fund. The resort to a foreign loan is discouraged. The total amount of interest bearing loans circulating as money is stated at $210,222 70. The National banks have obtained bills for circulation to the extent of $65,160,210. The circulation of the State banks in the loyal States was at latest returns $126,796,606 72. The Secretary at some length describes his embarrassments on entering upon the duties of his office, in meeting the calls in the Treasury and how far he has succeeded; and what advantages may be offered to the public for its future subscriptions to new loans, such as an increased rate of interest and an exemption from public burdens. He leaves this to the wisdom of Congress. The premium on gold is attributed to the unpatriotic and criminal efforts of speculators, and to guard against its continued rise he proposes issuing securities, the interest payable in currency, but hereafter convertible into 5-20 bonds. The 7-30's are stated to be a valuable and reliable security as they stand. The National bank system is approved, and discrimination against the local banks is recommended so as to make the former system general. The remaining portions of the report allude to the Sub-Treasuries, the prevention of smuggling, commercial intercourse with the rebel States, which as yet appears to be arranged on no permanent basis, on the missing Treasury bonds, none of which have come into circulation, being incomplete, the mint, coast survey, the bureaus, and a recommendation for the purchase of the New York Custom House at one million of dollars.

Common Carriers.—Agency.—Special Contract Limiting Liability of Carriers.—"Empties."—Dealings between Railway Companies.

The recent case of Aldredge *vs.* The Great Western Railway Company, was an action against the defendants, as carriers, for the loss of certain tubs, packages, and baskets of the plaintiff which had been delivered to them to be carried "for reward," as the complaint alleged, for the plaintiff, from Hereford to Tiverton, England, but which were lost through the defendants' negligence.

The defendants pleaded, among others, that the goods were not delivered to them to be carried on the terms in the complaint mentioned; as to the loss and detention, a special contract in writing under the Railway and Canal Traffic Act, 1854, signed by the person delivering the goods, and containing a just and reasonable condition, viz: that the defendants should not be liable for any loss or detention of or damages to goods destined for any place beyond the limits of the defendants' railway, after they should have been delivered by the defendants to another railway; that the goods in question were destined for a place beyond the limits of the defendants' railway; and that the loss and detention occurred after they had been delivered over to another carrier. Upon these, the plaintiff joined issue. The cause was tried before Byles, J., at the sittings in London after Trinity Term, (1862.)

For the defendants it was submitted, that, according to the conditions upon which they received the packages, they were not liable for any loss or detention which occurred off their own line; that they were mere gratuitous bailees, and therefore all that was incumbent on them, was to carry the goods on their line, and deliver them with reasonable care to the next line; and, further, that the plaintiff should have given some affirmative proof of negligence on the part of the company's servants—of which there was none whatever beyond the mere fact of the detention of the packages for three weeks.

For the plaintiff, it was insisted that she was not bound by the conditions, Smith & Co., who signed them, not being her agents, but the agents of the company. And it was further insisted that the conditions were not just and reasonable, and therefore not binding on the plaintiff. A verdict was found for the plaintiff, damages £20; leave being reserved to the defendants to move to enter the verdict for them, if the Court should think that under the circumstances they were not liable.

In Michaelmas Term, 1862, the defendants' counsel accordingly obtained a rule *nisi* to enter a verdict for the defendants. In Hilary Term, 1863, the plaintiff's counsel showed cause.

The facts sufficiently appear in the opinion and judgment of the Court, which were now delivered by

Williams, J.—On the trial, it appeared that the plaintiff was a fruit dealer, and had sent the tubs and baskets which were the subject of the action, full of fruit to Hereford. It was the understanding and the practice between the plaintiff and defendants that the baskets or tubs which had been delivered to the defendants *full*, should when *empty* be returned, or despatched by the defendants as "empties," without further charge. Accordingly, from Hereford, the tubs, packages, and baskets were sent by the plaintiff as "empties," and directed to the Tiverton Junction. They were delivered to the railway, and booked at Hereford for Bristol, only, by a person of the name of Smith, a general carrier who appears to have acted for both parties, and who was alleged to be the common agent of the plaintiff and defendants. He signed in the plaintiff's name a printed contract containing amongst other conditions the following:

1. "The company will not be answerable for the loss or detention of, or damage to, wrappers or packages of any description charged by the company as 'empties.'

2. "Nor in respect of goods destined for places beyond the limits of the company's railway; and as respects the company, their responsibility will cease when such goods shall have been delivered over to another carrier in the usual course for further conveyance. Any money which may be received by the company as payment for the conveyance of goods beyond their own limits, will be so received only for the convenience of the consignors, and for the purpose of being paid to the other carrier.

3. "The company will not be liable for any loss of or injury to articles, except on proof that such loss or injury was occasioned by the neglect or default of the company or its servants."

The goods were duly carried and forwarded as far as Gloucester, where the defendants' railway ends. From Gloucester to Bristol, they were carried on the Midland Railway, and from Bristol to Tiverton Junction on the Bristol and Exeter Railway. The damage and detention happened after the goods had left the defendants' line. It was not contended that the defendants were not common carriers, but it was contended that they were not in this case carriers *for reward*.

All amendments were left in the discretion of the Court, who were to draw any inferences of fact, consistent with the finding of the jury as to the amount of damages.

After argument, the Court suspended its decision until the publication of the judgment of the House of Lords in the case of Peek *vs.* The North Staffordshire Railway Company, since reported. The result of that decision, so far as it is applicable to the present case is this, that any condition limiting the liability of a railway company as carriers must be a condition just and reasonable in the judgment of the Court, and must be set out in a written contract signed by or on behalf of the consignor. The first question, therefore, which arises is, whether either the first condition, that the company will not be liable for packages charged as empties, or the second condition, that they will not be liable in respect of goods lost or damaged beyond the limits of the company's railway, be just and reasonable. Either of these two conditions, if legal, would suffice to protect the defendants.

It will be unnecessary to discuss the first condi-

tion, if the second is legal. But as to the first condition, we may observe that we are by no means prepared to accede to the suggestion, that, because no charge is made for the return of empty packages, therefore the company necessarily convey them on their own line gratuitously. The company may justly be considered as having had the carriage of the empties prepaid in the shape of the previous payment for the carriage of the same packages when full, including an obligation on the railway to carry the empties back without further charge.

We are, however, of opinion, that the second condition is legal, and does protect the defendants. The railway company do not thereby attempt to protect themselves from injuries or delay happening on their own line, or through the negligence of themselves or of their own servants, or even on a further line where they have received any compensation for carriage on that further line. Even if the full carriage down to their ultimate destination had been paid on these empties, it would by the express words of the condition, (so far as regards the excess over and above the amount of carriage on the defendants' own line,) have been received for the purpose of being handed over to the further carrier. The company therefore, when they forward goods on a further line have no control, and receive no payment. To stipulate that under these circumstances they shall not be responsible for loss or delay on the further line, seems to us just and reasonable.

It may be objected as above suggested, that the company do in the case of empties receive and retain payment for the whole transit, because payment has been previously received by them in the shape of the carriage paid for the conveyance of the packages when full, and also for the obligation on the railway company to carry or send the empties to their ultimate destination without charge. But suppose the further railway had been paid in money by the defendants for carrying the empties, then the defendants, though they might have received, yet they would retain no value for the transit on the further line. It makes no difference, if instead of paying the further railway in money, they pay by reciprocating the service, and carrying on their own line empties coming from the further line, or by any other arrangement onerous to themselves and beneficial to the further line.

The evidence in this case affords no information as to the dealings between the railways. But as we cannot assume that an ordinary tradesman furnishes goods or labor in the way of his trade gratuitously, so neither can we assume without proof that one railway is in the habit of carrying empties for another railway without any reciprocation of the benefit, or any compensation of any kind. Therefore the company in the case of empties forwarded on another line cannot be taken, either directly or indirectly, to receive for their own benefit any portion of the carriage on the further line.

The remaining question is, whether the special contract in this case was duly signed. Smith seems to have been a carrier employed both by the plaintiff and the defendant, and employed by the plaintiff in this particular instance to cart and deliver the empties to the railway. He signs the contract in the name of the plaintiff. We can discover no good reason why his signature should not bind the plaintiff. The utmost that can be said is, that the plaintiff had little choice but to employ him, and that he was agent for both parties. But the plaintiff did *in fact* employ him; and in general, the signature of a common agent binds either party. It has been repeatedly so held.

There was, therefore, in this case a protection afforded to the defendants by a reasonable condition contained in a signed contract within the true meaning of the Railway and Canal Traffic Act, as interpreted by the House of Lords.

The rule to enter a non-suit must be made absolute.

Rule absolute.

Railroad Earnings--Monthly.

The traffic of the Cincinnati and Chicago Air-Line Railroad Co. earned upon the Line from Richmond to Valparaiso, for the month of November was:

	1864.
Freight	$31,098 50
Passengers	55,882 75
Mail	1,062 50
Express	3,698 50
Total	$91,742 25
November, 1863	$51,364 15
Jan. to Nov. 30, 1864	$765,800
Jan. to Nov. 30, 1863	416,000
Gain	$349,800

The earnings of the Pittsburg, Fort Wayne and Chicago Railroad for the month of November, 1864, were $743,751 16
Corresponding month of 1863 466,299 70

Increase $277,451 46

Earnings from Jan. 1 to Nov. 30:
1864 $6,336,132 59
1863 4,645,292 15

Increase $1,690,840 44

The earnings of the Michigan Central Railroad for the month of Nov., 1864, were $405,509 77
Corresponding month of previous year 339,793 70

Increase $65,716 07

The earnings of the Chicago and Rock Island Railroad Company for the month of Nov., 1864, were $319,816 00
Corresponding month of previous year 196,435 00

Increase $123,381 00

The earnings of the Toledo and Wabash Railroad for the month of Nov., 1864 $220,208 00
Corresponding month of 1863 134,563 00

Increase $85,645 00

The earnings of the Chicago and Northwestern Railroad in Nov., 1864 $705,496 00
Same period last year 435,945 00

Increase $269,551 00

The earnings of the Cleveland and Toledo Road for the month of Nov., 1864, were $184,614 00
Corresponding month of previous year 143,836 00

Increase $40,778 00

Earnings of the Mississippi and Missouri Railroad for the month of November, 1864 $74,621 14
Corresponding month of previous year 38,159 12

Increase $36,462 02

The business of the Illinois Central Railroad for the month of November, 1864:

LAND DEPARTMENT.

Acres construction lands sold	10,865.32	for	$127,446 86
Acres Interest Fund Land sold	681.24	"	10,300 84
Acres Free Lands sold	2,212.09	"	27,118 81
Total sales during month of Oct. 1864	13,758.65	for	$164,866 51
To which add town lot sales			1,930 65
Total of all			$166,797 16
Acres sold since Jan. 1, 1864	245,562.46	for	$2,674,627.84
Cash collected in November			$263,218 71
Cash collected since 1st Jan., 1864			$2,288,901 33
Construction bonds canceled			$3,748,000 00

TRAFFIC DEPARTMENT.

Receipts from passengers	$209,467 83
" freight	391,885 00
" mails	6,358 33
" rent of road	4,000 00
" other sources	6,000 00
Total receipts in month of Nov., 1864	$617,711 16
Total receipts in month of Nov., 1863	437,679 51
Total receipts since Jan. 1, 1864	$5,657,289 94
Total receipts in correspond'g period of 1863	$4,146,497 73

The traffic receipts of the European and North American Railway for the month of Nov., 1864, compared with the corresponding month last year, is as follows:

	1864.	1863.
Passengers	$4,933 66	$4,855 50
Freight	7,246 94	6,760 06
Mails and Sundries	466 00	393 00
Total	$12,646 60	$12,008 56
Increase in 1864		$638 04

Interest and Dividends.

The New York and New Haven Railroad Company has declared a dividend of $3, free of Government tax, payable January 8, to those who shall be stockholders on the 24th day of December inst.

The Hartford and New Haven Railroad Company has declared a quarterly dividend of $3 per share, payable January 8. The transfer books will be closed December 24.

The Lynn and Boston Railroad Company will pay a dividend of four dollars per annum, free of Government tax, Jan. 1, 1864.

New York and Boston Railroad.

The New York and Boston Railroad Company will petition the Legislature of Massachusetts at its coming session, for authority to increase their capital stock to the amount of one hundred thousand shares, for the purpose of enabling them to connect their road by extension, from the main line in Newton or Brighton through the north part of Brookline and Cambridge, to the Union or Grand Junction Railroad. They will also ask power to construct a portion of a railroad extending from some convenient point in their line in Brookline in a northeasterly direction, or near to or upon the bed of the Brookline Branch Railroad, and through Roxbury and Cambridge, and parallel to or on the bed of the Grand Junction Railroad, and so by either mode to the company's line in Somerville, and to some convenient point on the Eastern and Boston and Maine railroads. Also power to acquire any property or rights in connection with the proprietors of the Grand Junction Railroad.

American Railroad Journal.

Saturday, December 17, 1864.

Stock Exchange and Money Market.

The news from abroad by the last arrivals in relation to United States securities, is that in the principal monied centres on the continent, they stood from 3 to 4 per cent higher than they do in New York, and the supply was short. There is no doubt that the clear headed German bankers especially in the Free towns comprehend this matter perfectly, and at a distance take in the whole proportions of the war, and the great strength of the loyal states with more accuracy of vision than those who are in the turmoil and confusion of immediate and surrounding events.

It is evident from Mr. Fessenden's report that a large loan in Europe has at any time been practicable, but it has been for the best that the money wanted to defend the country should be provided by the country itself. The people of the North are now their own principal creditors, and their interests are homogeneous and permanent. This is a strong security for the full liquidation and payment of the National debt in due season.

The Government has paid out seventeen hundred millions to the people in various forms, and it is idle to say that they cannot afford to lend a large portion of it back again, or that a fair per centage of it may not be returned from year to year in the shape of taxes.

It is now stated that the Secretary of the Treasury reserved his plans of finance for a proper opportunity, and that they will when presented to Congress, be found of a most decisive and efficient character. All the rumors of late origin as to his intentions put afloat to influence operations in the street are now positively contradicted. We can afford to await the truth.

There is no doubt that if the present military movements in the South are successful, our system of finance will be a very simple one. If Richmond with its "insurgent leader," and his Congress representing nobody but themselves, are captured, our National debt will never be very much larger, while the revenues which it is now believed, can under the present system be increased to three hundred millions per annum, will very soon place the finances of the Government on an impregnable basis. And is this expectation a visionary one? We think not. In Richmond lies all the remaining power of the Confederates, both of brains and men, and both these seem to be on the decline.

Never did the loyal states stand in a grander position. They were dragged into this war, they were reluctant combatants, they had no vindictive feelings against the South, they would gladly receive back their "erring sisters" even now, but they are resolved that the causes of all future disturbances shall be thoroughly removed. The value of the Union, the success of industry, the pursuits of commerce can alone be established in a permanent manner by the overthrow of every combination which can hereafter disturb the body politic. We cannot have two nations between the Gulf and the lakes with hostile systems. The will of the majority is in fact the security of minorities, otherwise the latter would have an unsafe power of disturbance, and this is precisely the difficulty which has always menaced us from the South. It is not possible to anticipate the future greatness of this nation when it is once more united. And financially we shall find that our present burdens will be easily borne and in a few years will not be felt.

The money market is easy, and offers large opportunities for speculation. Innumerable projects are continually offered to the public. Petroleum wells are still favorites with a numerous class of speculators, and many companies continue to pay monthly dividends on a large scale. We notice also that gold companies are again attracting attention, and the recent accounts from Montana, Idaho and Colorado, are awaking operators to a sense of their permanent value. Large lumps of gold are exhibited as proofs of what may be expected, and even the attention of Government is being directed to the mineral wealth of our Territories, as a resource which may be aptly and promptly brought to the aid of the Treasury. On

a former occasion we have made the suggestion that Gold mine warrants might be made like land warrants, articles of value and be disposed of in large amounts.

Gold has again fluctuated during the past week with its usual caprice. If the public at a distance believe that there is any reality in most of the reported transactions in the street, they are mistaken. On repeated inquiry we learn that they are mostly speculative and carried on by means of margins. Any one who can raise a hundred dollars as a margin may buy or sell a thousand, and so in proportion any larger sum. To call this a legitimate commercial transaction is to mistake terms. The real value of gold is one thing, but a broker's option is another. It is nothing but gambling, and depends not on the laws of trade, but on men's credulity or audacity. It is this view of the subject which no doubt leads such men as Mr. Stevens to propose restraining laws, such as areestablished against any other practices on the welfare) and security of life and property. But as experience shows that no laws can reach certain classes of offences, they must be left to punish themselves.

And it is a curious fact that the men who do most to keep up the speculations in gold are soonest obliged to leave the street. The few who succeed are like those who indulge in faro. If they win too much they invariably break the bank. When large profits are made out of any party in gold, the latter is sure to go under.

Exchange is not in very brisk demand. Good merchant bills may be bought at from 2 to 3 per cent. below par. Those who ask par and above par, act on the same principle as those who sell a fancy brand of flour, and always find some purchasers. Otherwise the quotations would be constantly below par, a most suggestive fact and demonstrative of a position we have frequently taken, that many of the shipments of specie abroad are unprofitable, and purely part of a scheme to injure the National currency, and to produce disorder in our finances.

It is stated with some show of sincerity that we are to have in this city a Bullion Bank, and that the Bank of New York is to be the depositary, where specie is to be deposited and drawn for, exclusively. The expense of the operation is to be paid through voluntary subscription by its customers.

Certainly it is a most ludicrous as it is a most unsafe practice, of shouldering bags of coin every fifteen minutes and rushing with them through the streets in order to make an eighth per cent. for the broker and to deliver to a customer, who as many more minutes afterwards has to go through the same process. If the entire business of the city had to be transacted in this way, the most profitable employment a man could engage in would be to carry these bags.

The associated banks are just now great lenders. During the past week their depositors lent them $3,516,646, and thereupon the banks loaned out $6,108,342, which is quite like inflation. Their own circulation was $3,516,372, a slight diminution from the previous week. The whole amount of specie on hand is returned at $20,743,208, about one dollar for eight of their whole deposits which were $161,916,344. Certainly these institutions are not competent to take the National finances into their keeping.

The operations at the clearing house to which we sometimes allude, continue to give evidence of immense activity in the money transactions of the city. The clearances for the week ending December 3, amounted to $549,927,689, and on the 10th, to $557,185,959. Here in a week an amount of money equal to one-third of our whole National debt is handled and transferred without the least difficulty. On every check drawn for the component sums, the Government gets a share to swell its revenue.

It has been attempted in unfriendly quarters to show that we are losing our specie faster than it comes to us. This would not seem to be the case if the figures can be relied on. In this city on the 1st of December, 1861, the banks held $18,541,762, and the Sub-Treasury $3,702,751. On the 1st of December, 1864, the amounts held respectively were $20,273,919 and $8,687,349. Total $28,961,268. Increase $6,716,755.

When these people talk about our exports of gold, they always choose to leave California and the territories out of the question as producers, just as if they were alien or foreign States. But it happens they are all in and parts of the United States, and we can count them in.

Now taking what they have produced the present year and what we have parted with, it is found there is a gain of $18,185,638, the total amount remaining in the country up to December 1. And this is more than England has been able to gain for herself during the same period of time.

Our export trade continues large and the imports are light. Foreign goods which have been forced on the market for foreign account do not go off as well as expected, and are sold at a decline. This circumstance is another favorable symptom for the country and will tell in due time.

The exports for the last week for New York were $3,998,585, and the imports $2,014,944.

The balance in the Sub-Treasury was on Monday last $32,328,787 07, and on Tuesday $31,460,007 91.

Government securities are in active demand on advancing rates, and railroad securities are firm. They seem to be entirely lost sight of except for permanent investments, yet they bear a high premium. An Illinois Central bond will bring 120; Hudson River bonds of 1865 sell at 120; New York Central 6s of 1883 bring 109, and the 7s of 1876, 117½; convertible ditto 120; New York and Erie 7s of 1879, bring 118; Milwaukie and Prairie du Chien 7s, 1891, 112; Pittsburg, Fort Wayne and Chicago 7s of 1912, 111; Reading 6s of 1886, bring 135½. All the principal railway bonds rule above par. Shares are steady, and the best of these are above par as will be seen by our quotations.

On the whole the market is fair and promising, and public expectation is buoyant in consequence of the apparent caving in of the great cause of all our difficulties.

It is stated very authoritatively that the remainder of the 10-40's 5 per cent. gold interest stock, being about one hundred millions is to be withdrawn from the market.

The aggregate value of the imports of general merchandise, other than dry goods and specie, at this port for the week ending December 12, was $1,706,340, against $3,278,562 in 1863, and $1,032,562 in 1862.

The exports from New York for the week ending December 12, were $3,444,886 against $2,908,444 in 1863, and $3,938,353 in 1862. The shipments of specie since January 1, have been $46,628,893. The exports since January 1, have been $203,118,700 against $168,294,348, in 1863, an increase of $39,824,357. The customs gold revenue at New York, specially pledged to the payment of the interest on the funded and fundable debt of the United States from January 1 to December 10, was $65,036,935.

The value of foreign goods imported into the port of Boston for the week ending December 9, was $398,046, against $401,768 for the corresponding week in 1863. The exports were $437,234 against $625,756 for the corresponding week in 1863.

The foreign exports from the port of Baltimore during the past week were valued at $718,781.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Chemung R. R., 95½; New Jersey R. Goodyear Brothers & Durand.

We publish in another place the card of a new banking house at No. 18 Broad street, composed of the above named gentlemen, founders and partners. Their references are of the very best character; and in addition to those named in their advertisement are Thomas Olcott, Esq., of Albany, L. Candee, Esq., President of the New Haven Company Bank, E. D. Tiffany, Esq., President of the 1st National Bank of Hartford, and Benj. E. Bates, Esq., President of the National Bank of Commerce, Boston. We are assured that their capital is large, and that their ability as financiers is of the very highest order.

New Telegraph Line and Railway.

We learn from a published communication from the citizens of Phillipsburg, C. E., to those of Montpelier, that a telegraph line and the Montreal and Vermont Junction Railway have been completed, connecting the two places. The Canadians in their telegraphic dispatch express the hope that they will more "closely unite in the bonds of fraternal intercourse, the people on either side of the border."

☞ The Central Railroad Company of New Jersey is constructing a third track, from their depot in Elizabeth up town to the sound, for the especial accommodation of city passengers, and to prevent any interference with coal and other trains.

☞ A rich mine of nickel and plumbago has been discovered in Morris Co., N. J., and is about to be worked by New York capitalists.

Mississippi and Missouri Railroad.

The Mississippi and Missouri Railroad is completed and running one hundred and seventy-five miles. Earnings of last quarter of year 1864, compared with same time in 1863:—

	1863.	1864.	Increase.
September..	$30,240 69	73,612 00	43,371 31
October	33,177 68	71,811 74	38,634 06
November ..	38,159 12	74,621 14	46,462 02
Total .	$101,577 49	220,044 88	118,467 39

—or 117 per cent.

INDEBTEDNESS.

First division first mortgage bonds	$1,000,000
First division second mortgage bonds..	400,000
Oskaloosa first mortgage bonds	590,000
Land grant first mortgage bonds..	2,740,000
Land grant second mortgage bonds ...	650,000
Income bonds	511,000
Capital stock	3,000,000
Total	$8,891,000

The company has on hand one thousand tons of iron, owns one million one hundred thousand acres of land granted by the Government, a large portion containing coal and iron of great value. The road, when completed to Council Bluffs, will be three hundred and thirty miles long. About fifteen miles more will be opened in about ten days, and the road completed to Des Moines early in the spring. The President of the United States has fixed the eastern terminus of the Union Pacific Railroad at Omaha, on the Missouri River, directly opposite the western ending of the Mississippi and Missouri Railroad, where a bridge is to be built connecting the two roads.

☞ The annual meeting of the stockholders of the Cleveland and Pittsburg Railroad Company will be held in Cleveland on the 4th of January next for the election of directors; also to vote upon a proposition to lease that portion of the railroad known as the Tuscarawas Branch for a term of years; also to vote upon a proposition to purchase the half interest in the late Cleveland, Zanesville and Cincinnati Railroad (formerly known as the Akron Branch of the Cleveland and Pittsburg Railroad;) also whether to increase their capital stock under the acts of April 11th, 1858, and April 9th, 1863.

☞ We invite attention to the advertisement of GEORGE QUACKENBUSH, Esq., Stock Commission Broker, No. 30 Broad street. Mr. Quackenbush has been about twenty years with the Bank of State of New York, twelve years as paying teller, and has acquired an experience in financial affairs which will be of great value to him in his present enterprise. Is well known in the street.

☞ From eight hundred to nine hundred men are constantly at work on the Hoosac Tunnel. The dam which is building across the Deerfield river on the east side of the mountain, in order to furnish power to keep the tunnel supplied with pure air, will cost $100,000.

☞ The extension of the track of the Chicago, Alton and St. Louis Railroad, between Alton and St. Louis, is nearly completed, and trains will probably run over the new track to East St. Louis before the end of December.

☞ Contracts have been awarded for grading nearly the whole line of the Dighton and Somerset Railroad.

Report of the Postmaster General.

By the annual report of Mr. Dennison, Postmaster General, it appears that the postal revenues for the year ending the thirtieth of June last were $12,438,253 78, and the expenditures of the department during the same period were $12,644,-786 20, showing an excess of the latter of $206,-532 42. The excess of receipts in 1864 over 1861, the first year of the rebellion, was $4,088,957 38. Although the proportion of receipts against the expenditures has doubtless been increased on account of the suspension of the postal service in the insurrectionary States, the exhibit furnishes the evidence of an improving financial condition of the department.

The increase of expenditure in 1864, compared with those of 1863, is 11⅝ per centum, and the increase in the revenue for the same year 11⅜ per cent. The estimates for 1865 are expenditures of all kinds, $14,098,500; gross revenue, including foreign postage and miscellaneous receipts, is estimated at an increase of six per centum on the revenue of 1864 making $13,184,547 79. Estimated deficiency of revenue compared with estimated expenditures, $913,952 21. From this sum must be deducted the amount of the permanent appropriations to compensate the department for crrryiug free mail matter, under acts of March 3, 1847, and March 3, 1851, $700,000. By which the estimated deficiency is reduced to $213,952 21.

During the fiscal year 334,054,610 postage stamps of the value of $10,177,327; 26,644,300 stamped envelopes, amounting to $765,512 50, and 1,574,500 newspaper wrappers, amounting to $31,-490 were issued. The total value of these issues was $10,974,329 50, which, compared with the issue of the previous year ($10,338,750) shows an increase of $635,569 50, or about 6⅛ per cent. The value of the stamps and stamped envelopes sold was $10,776,589 58, and the amount used in the prepayment of postage was $9,878,155 61. Notwithstanding this enormous issue, the losses of stamps in the mails amounted only to $1,206, and of envelopes to $31 80.

The report gives a table of the service as it stood on the 30th day of June last in the States of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, Ohio, West Virginia, Michigan, Indiana, Illinois, Wisconconsin, Iowa, Missouri, Minnesota, Kentucky, California, Oregon, Kansas, and the territories of New Mexico, Utah, Nebraska, Washington, Colorado, Dakota, and Nevada, at which time there were in operation in those States and Territories 6083 mail routes, the number of contractors being 1853. The length of these routes was 139,173 miles, and the service as follows:—Railroad 22,616 miles; steamboat 7278 miles; "celerity, certainty and security," 109,278 miles—costing $5,818,469, divided as follows:—Railroad 23,301,942 miles of transportation, at $2,567,044, about 11 cents a mile; steamboat, 2,112,134, at $253,274, about 12 cents a mile; "celerity, certainty and security," 30,901,281 at $2,998,151, about 9 7-10 cents a mile.

The length of routes was decreased 425 miles, while there was an increase in the annual transportation of 89,342 miles, and in the cost of $77,-893.

The Postmaster-General says that notwithstanding an express provision of law, but few of the railroad companies engaged in carrying the mails are under contract. Attention has been called to this subject by his predecessors for the purpose of securing additional legislation, investing the head of the department with power to compel compliance with the law by prohibiting payments except on executed contracts. The matter is discussed by Postmaster-General Holt in his report of December 3, 1859, and again alluded to December 1, 1860, and also by his immediate predecessor in his reports of December 2, 1861, and December 1, 1862; but believing that the law is sufficiently explicit as it now stands, Postmaster-General Dennison does not propose further legislation, in the hope that the several railroad companies will no longer refuse to enter into the obligations assumed by all other persons contracting with the government. Should he be disappointed in this reasonable hope, he will not fail to call upon Congress for such legislation as the necessities of the service require.

The Postmaster-General says upon the subject of "Overland Mails;" that under an advertisement dated March 22, 1864, inviting proposals for service from Atchison, Kansas, or St. Joseph, Missouri, to Folsom City, California, John H. Heistand of Lancaster, Pennsylvania, was the lowest bidder at $750,000 per annum; but his bid having been subsequently withdrawn, contracts have been made with Ben Halladay of New York for the service between Atchison or St. Joseph, and Salt Lake City, at $365,000, and with Wm. B. Dinsmore, president of the Overland Mail Company, also of New York, from Salt Lake City to Folsom City at $385,000, making an aggregate of $750,000 per annum. These parties are believed to be able to fulfil their obligations. The contracts are from October 1, 1864, to September 30, 1868; the trips to be made in sixteen days eight months in the year, and in twenty days the remaining four months; to convey through letter mails only, mail matter prepaid at letter rates, and all local or way mails. Paper and document mails for the Pacific coast are to be carried by sea, *via* New York and Panama, temporary arrangements having been made for their conveyance within the sum named in the law of March 25, 1864, viz.;—$160,000 per annum, making the whole expense of territorial and Pacific mails not over $910,000 per annum, or $90,000 less than under the former contract.

The contract for the California and Oregon route—Sacramento to Portland—terminating September 16, 1864, proposals were invited for the continuance of the service to 1866 and 1868. But one bid was received, that of the California Stage Company, at $250,000 per annum, which was deemed extravagant for the service required, and accepted to June 30, 1865, only, with a view to again invite competition, which has been done.

Inquiry has been made of Lieutenant-General Grant relative to the existing arrangements for supplying our armies with mails, with the assurance of the earnest purpose of the Postmaster-General to co-operate with him in carrying into effect any desired improvements of that service; and he is gratified to learn from his reply that the system of receiving and forwarding mails now in operation is entirely satisfactory; and that "our soldier's receive their mail matter with as much regularity and promptness as is possible for armies in the field, and with, perhaps, as much celerity and security as the most favored portions of the country." General Grant also informs the Postmaster-General that the policy originally adopted of excluding civilians from the mail service within the lines of the army, and detailing for that duty enlisted men of intelligence and reliability, will be continued.

The Postmaster-General speaks at some length of the experiments commenced with railway or travelling post offices, and suggests that in order to make them effective, a change in the mode of mailing letters is necessary. Additional clerks as well as superintendents and traveling postmasters will be required, for whom he recommends provision be made by law.

THE FOREIGN MAIL SERVICE.

It appears from the statistics for the fiscal year ending June 30, 1864, that the aggregate postage (sea, inland and foreign) upon the correspondence exchanged with Great Britain, Prussia, France, Hamburg Bremen, and Belgium, amounted to $1,399,605 69, being an increase of $174,-930 48, as compared with the last year, and $21,-458 37 in excess of the largest amount realized in any previous fiscal year. The collection in this country amounted to $881,730 68, and in Europe to $517,875 01; excess of collections in the United States $363,855 67. The result is significant and gratifying, showing a largely increased correspondence with Europe, notwithstanding the civil troubles agitating the country and the interruption of postal communications with the Southern States.

To protect the postal revenues from losses incident to the unauthorized conveyance of letters by private ships or vessels departing from the United States for foreign countries, the Postmaster-General recommends the passage of a law requiring as a condition of clearance that the master or commander of any steamship, or other vessel departing for a foreign port or ports, shall make oath or affirmation that he has not received on board, and has not under his care or within his control, any letters addressed to a foreign country which have not been received directly from the post office at the port of departure, except such as are directed to the consignee of the ship or vessel.

The provisions of article three of the United States and Canada postal Convention have been so modified by agreement between the respective post departments, as to abolish the international letter postage of fifteen cents per single rate, heretofore levied upon letters passing between Canada and California, Oregon and Washington Territory, thus establishing a uniform international postage for letters of ten cents the single rate, prepayment optional between Canada and all parts of the United States, without regard to distance or route of conveyance; and the benefit of the same uniform international rate of ten cents has also been extended to the correspondence exchanged with the province of New Brunswick. Our arrangement with Canada adopts the principle of optional prepayment, in both countries, of the combined rate of international postage, each country retaining all the postage which it collects.

With the view of securing uniformity in our postal relations with those provinces, a recent effort was made to obtain the concurrence of New-

foundland in a like arrangement, which the Postmaster General regrets to say was unsuccessful; the British post department declining to give its assent to the measure, on account of the additional British packet postage of four pence sterling, which is levied for the sea service to and from the island, and accrues to Great Britain. The initiatory steps taken to conclude similar postal arrangements with the colonies of Vancouver's Island and British Columbia have not as yet been attended with the success anticipated. Additional articles to the United States and British postal convention have been agreed upon, constituting the British packet agency at Colon an office for the exchange of mails with the post office of New York, by means of the United States packets plying between those ports; the object being to prevent the delay to correspondence forwarded from the United States to ports and places on the Atlantic coast and interior of New Granada, previously caused by its transit across the isthmus to and from Panama.

An arrangement has also been concluded for expediting the transmission to destination of unpaid letters addressed to the United States, received at Panama by British packets from countries on the west coast of South America, this department agreeing to collect and account to Great Britain, through the office of the British Packet Agency at Panama, for the unpaid postage charged thereon. An additional article to the United States and Bremen, and to the United States and Hamburg Conventions, respectively, was executed on the 28th of March last, authorizing the conveyance of the international correspondence in time of war, or threatening war, by steamships sailing under neutral flag, wherever the same cannot be safely conveyed by United States, Bremen, or Hamburg steamships. In view of the apprehension then felt that the war pending in the north of Europe might interrupt the mail service so long and advantageously performed by the Bremen and Hamburg lines of mail packets, steps were taken to ascertain whether the neutrality of the said steamers might not be secured by means of diplomatic correspondence, but the Post Office Department has been advised of the result.

Our postal conventions with Great Britain and Mexico, respctively, recognize the principle that even in time of war between the contracting parties their respective mail packets shall continue their navigation without impediment or molestation until six weeks after a notification given by either of the two governments, and delivered to the other, that the service is to be discontinued, and as all governments have a common interest in claiming exceptional treatment for mail packets in case of war, to the end of maintaining regularity in international postal communication, it is a subject worthy of consideration, whether by treaty stipulations between nations or otherwise, like principle might not be established between all governments, with proper safeguards against the transportation of persons or articles contraband of war.

A correspondence has been opened with several of the post departments represented by Commissioners at the Paris international postal conference, on the basis of the Paris resolutions, with those countries on the continent of Europe with which the United States has hitherto sustained no direct postal relation, as well as for the revision and amendment of existing postal conventions, so as to make them conform as nearly as possible to the liberal principles of postal progress recommended by that conference as the basis of international arrangements. Favorable responses have been received from the several post departments interested in this subject.

The Postmaster-General's Report contains additional interesting facts in relation to the establishment of new lines of packets and kindred subjects; in which it is stated the contract for ocean mail steamship service between the United States and Brazil was awarded to the New York, Nuevitas and Cuba Steamship Company, at the sum of $240,000 per annum, to be divided equally between the two governments. The act authorizing the establishment of this line of American steamships was the beginning of a new era in the history of our ocean mail service, which is being performed principally by steamers sailing under foreign flags.

There are other ocean routes besides the one to Brazil, which can be safely and profitably occupied by American lines of mail steamers, among which the route between San Francisco, Japan and China, at present unoccupied by foreign mail packets, is perhaps the most important in a commercial point of view, and may be made available in securing to us a large participation in the commerce of the East, the greater portion of which is now enjoyed by Great Britain through her mail steamship connections, *via* Suez, in the Indian ocean and China seas. The central position of the United States between Eastern Asia and Western Europe, affording routes but little longer, if any, than those now traversed between these distant regions, aided by the superior expedition of railway transportation between the Atlantic and Pacific coasts, will furnish such facilities as will make their adoption a practical necessity for the commercial intercourse between Europe and the populous countries of Eastern Asia. These considerations and others which will readily suggest themselves, render it important that the Pacific routes, properly belonging to us, should be occupied by American mail steamers, the profits of which, with the addition of a small subsidy for mail service, would justify the establishment of one or more steamship lines, which would be remunerative to the proprietors.

The number of dead letters of every description received and examined during the year was 3,508,825, being an increase of 958,409 over the preceding year, attributable mainly to the return of large numbers of army and navy letters, which it was found impracticable to deliver.

In speaking of the postal money order system, the Postmaster-General says, its establishment in this country will no doubt lead to arrangements for the interchange of international money orders with the several foreign countries with which we have direct postal relations.

Washington County Railroad.

The engineers engaged in locating this proposed important branch of the Baltimore and Ohio Railroad from Weverton to this place, arrived here on Tuesday last, the same day that we noticed the appearance in our midst of the engineers of the Western Maryland project. This is the second survey of the Washington County road, this time bringing it through Boonsboro. The other surveys passed through Keedsville. We hear it stated that this last survey is deemed the most practicable route, but of this fact we are not positive. At all events pass through what particular neigborhood it may, we should like to see the road constructed, and wish it every success.—*Hagerstown Mail.*

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending Dec. 9, 1864, was as follows:

Passengers	$22,176 25
Freight and live stock	32,999 89
Mails and sundries	4,037 58
Total	$56,613 72
Corresponding week of 1863	60,329 30
Decrease	$3,715 58

The earnings of the Grand Trunk Railway for the week ending Dec. 3, 1864, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$40,884 00
Express, freight, mails and sundries	3,124 00
Freight and live stock	79,926 00
Total	$123,934 00
Corresponding week, 1863	125,873 00
Decrease	$1,939 00

The following is a comparative statement of the earnings of the Chicago and Northwestern Railway for the first week of December:

	1863.	1864.
Passengers	$28,198 40	$35,770 13
Freight	74,842 66	95,239 17
Express	1,851 52	1,433 66
Mail	1,286 12	1,405 62
Total	$106,178 70	133,848 58
Increase 26-05 per cent.		$27,669 88

From June 1 to December 7, 1864, (6 months and 1 week) the earnings were $3,803,870 60, against $2,510,035 29 in 1863—increase $1,293,835 31—or 51-54 per cent.

The earnings of the Michigan Central Railroad for the 1st week in Nov., 1864, were $89,395 18
Corresponding week of previous year 72,070 60
Increase $17,324 58

The earnings of the Chicago and Rock Island Railroad for the 1st week in November, 1864, were $71,375 00
Corresponding week of previous year 57,931 00
Increase $13,444 00

The earnings of the Toledo and Wabash Railroad Company for the first week of December 1864, were $50,661 00
Corresponding week of previous year. 28,773 00
Increase $21,888 00

The earnings of the Cleveland and Toledo Railroad for the 1st week in Dec. were $44,733 00
Corresponding week of previous year 39,321 00
Increase $5,414 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the 1st week of December, 1864, were. $91,306 00
Corresponding week of previous year. 75,693 00
Increase $15,713 00

The receipts of the Racine and Mississippi and Northern Illinois railroads during the week ending Nov. 30, amount to $14,840, against $11,454 for the same time in 1863.—Increase, $3,396.

Boston, Hartford and Erie Railroad.

AN ACT to consolidate the Boston, Hartford and Erie, the Boston, Hartford and Erie Extension, and the Boston, Hartford and Erie Ferry Extension Railroad Companies. Passed April 25, 1864.

The people of the State of New York, represented in Senate and Assembly, do enact as follows:

SEC. 1. The Boston, Hartford and Erie Extension Railroad Company, and the Boston, Hartford and Erie Ferry Extension Railroad Company, may both, or either, sell and convey to the Boston, Hartford and Erie Railroad Company the franchise and property of said several corporations, upon such terms as may be mutually agreed upon; and whenever certificates, under oath, of said Boston, Hartford and Erie Railroad Company, and a like certificate, under oath, of the other contracting corporation shall be lodged in the office of the Secretary of State, showing such sale and conveyance, and containing a full description of the rights and property conveyed, then, and in such case, such sale and conveyance shall be effectual in law to pass title to the franchise and property sold, conveyed and described in such certificate, without other or further registry of the instrument of conveyance. And on the leaving of such certificate as above provided, the Secretary of State shall file and record the same, and said Boston, Hartford and Erie Railroad Company shall become possessed of the rights of charter and property sold, conveyed and described in said certificates, and may have, hold and use the same in their own name and right as a portion of their railway line and property, and have all the rights the corporation making sale and conveyance had at the time of such conveyance, to construct and operate a railway within the terminal points designated in the charter of the company making the conveyance, and subject to the laws of this State, passed, or that may be passed, concerning railroad corporations.

SEC. 2. This act shall take effect immediately, and may be altered, amended or repealed at the pleasure of the legislature.

The Hoosac Tunnel.

The Joint Special Legislative Committee, to which was referred the subject of the Troy and Greenfield Railroad and the Hoosac Tunnel, met in Boston on the 6th inst. In accordance with the vote of the committee, Gen. Herman Haupt submitted his claims on his memorial substantially as follows: 1st, asking the payment in full of certain claims embraced in Schedule C, House Doc. 212, amounting to $166,148 21, of which eighty-five per cent. has been paid, and that he be released from further liabilities; 2d, that the claims of J. A. Griswold for cash advanced for day laborers at the time of the suspension of work, amounting to $20,000, more or less, but upon which no payment has been made, shall be paid in full; 3d, that the suit against Herman Haupt to recover the amount of an alleged over-issue of State scrip to the Troy and Greenfield Railroad Company, be withdrawn, and the attachment of $100,000 be released; 4th, that the shaft at the west end of the Hoosac tunnel, which is the property of Herman Haupt & Co., and located on and owned by them, shall be paid for, cost and interest, amounting to $32,000.

Another Air Line Railroad.

The citizens of the upper Districts of Baltimore county were, a few days ago, thrown into quite an excitement in consequence of the appearance of a party of engineers &c., in their midst, surveying or running out a route for a railroad from the city of New York to Washington city, as direct or as near an air line as the surface of the country will admit. The route enters Maryland between the village of New Market, in the Seventh District, and Freedom, immediately above the Pennsylvania line, and crosses the Northern Central between Freedom and Freeland's Station, thence to the village of Middletown in the Sixth District, passing through about the centre of the village, thence through the Fifth district, also the Fourth, Third, Second and First Districts to Howard county, &c. Where the route runs after entering the Fifth District we have not been informed. We feel assured that should a railroad be made through the upper Districts of our county the enterprising people in the vicinity of the road would avail themselves of advantages arising from it more than any class of people through whose neighborhood such improvements might be made, they being for some years greatly in advance, in the way of energy and improvement of their country, of their brethern of the Districts surrounding or adjoining Baltimore city.—*Towsontown American.*

Finances of Vermont.

From a report of the Senate Committee on Finance of the Vermont Legislature, it appears that the debt of Vermont amounts to $1,640,845, or $5.21 for each person in the State. A claim of $90,000 against the general government, if collected and paid, will reduce the debt by that sum. The debt is principally funded, and is payable in 1871, 1874 and 1876. The total expenditures last year, including interest on the debt and war expenses, were $1,228,998, and the receipts were $931,853, making the increase of the State debt for the year $238,447. Upon an examination of the financial resources of the State, it is found that, in increase of population and in many of the branches of industry, Vermont is far behind the other New England States. The last census shows that the ratio of increase in population is only 0.31 per cent. while the other New England States range from 2.65 to 42.10 per cent. In manufactures Vermont also compares unfavorably with the other New England States, but makes a better record in flour, meal and lumber. The valuation of the State was increased but 32.83 per cent. In the other States the increase has been from 42 to 185 per cent. The committee attribute this unfavorable condition of affairs to the laws of Vermont, which do not encourage business enterprise. They allow the seizure of property by attchment and afford no relief to the unsuccessful man of business by laws of insolvency. Hence many of the enterprising business men of the State have sought homes elsewhere.

Western Maryland Railroad.

We are gratified to learn that there is some earnestness on the part of the Western Maryland Railroad Company to have this road extended from its present termination to this place. We learn that the preliminary surveys have been completed, and that Mr. Joseph S. Gitt, the chief-engineer of the road, with his assistants, the Messrs. McCrery, are actively engaged on the permanent location, and that they will complete it this week, as they have already passed Hagar's Mill, and by this time, no doubt, have gained the depot grounds, back of the court-house.

We learn from Mr. Gitt that a good location has been obtained from Union Bridge to Mechanicstown, and from that point to the summit of the mountain the location remains to be made, but all of which will be completed by New Year. From Mount Zion summit the line runs around what is called Buzzard's Knob and down Raven Rock Hollow to Smithsburg. From this place to Cavetown and Chewsville; thence touching the Antietam at Horine's Mill and following it to Mr. Joseph Ground's house, where it crosses that stream and following it again as far as Stonebraker & Co.'s paper mill, where it leaves the stream. The line then crosses the Smithsburg and Hagerstown turnpike at Samuel Gollinger, and again strikes the Antietam following it to Hager's lower mill, and passes close by the upper mill, crossing the Shaapsburg turnpike at the old Fulling Mill, thence to the old Show Ground in the rear of the court house. A location and connection with the Franklin Railroad is intended and will be made before the party leaves here. We may have some thing more to say on this subject when the entire location is completed.—*Hagerstown Mail.*

No. 10 Pine St., NEW YORK.

WED. W. CLARKE & CO.

OUR OFFICE IS OPEN TO THE COMMERCIAL public for the purchase and sale of Petroleum lands of the oil districts of Pennsylvania, Virginia, Ohio and Michigan, and for the sale of oil stocks, many of which are paying large dividends monthly.

We now have in hand for sale stocks of the following companies:

Blood Farm Petroleum Co., N. Y., Chas. Butler, Prest.
Home Petroleum Co., N. Y., Josiah Oakes, Prest.
Tarr Farm Petroleum Co., N. Y., Jas. Wadsworth, Prest.
Central Petroleum Co., N. Y., Jas. Bishop, Prest.
American Petroleum Co., N. Y., P. C. Clark, Prest.
Oil City Petroleum Co., N. Y., D. S. Duncomb, Prest.
Michigan Central Petroleum Co, N. Y., F. Prentiss, Prest.
Penna. Petroleum Co., Phila., John S. Young, Prest.

We have centered with us $31,000,000 of capital invested in petroleum, and can supply applicants with names and general "status," of most companies now organized, and general information of the oil market, both at home and abroad.

Special attention is called to a prospectus now offered to capitalists and others of the "United Petroleum Farms Association," which combines some of the most wonderful productions of the day, paying at this moment attractive dividends, and combining a capital of $15,000,000 in this single enterprise. Subscription list opened for a few days at this office.

This enterprise with the present development, is now paying over two and a half per cent. per month, with a positive prospective increase almost fabulous.

American Railroad Journal.

New York, Saturday, December 24, 1864.

Two New Railroads in Nova Scotia.

On St. Andrew's day the people of Pictou, N. S., inaugurated with a celebration the work of building the road which is to connect Pictou with Truro. There is a railway already existing between Truro and Halifax. This is an important matter, as the Pictou coal will be loaded into cars at the mines, and delivered at the wharves in Halifax without transhipment, saving a long, circuitous, and generally difficult water journey that is now performed from Pictou to Halifax *via* Belleisle.

At the inauguration, the Hon. Provincial Secretary, Dr. Tupper, announced it as the policy of the present administration of Nova Scotia, to build a new road 85 miles long in another direction, viz., from Halifax southwest to Annapolis. To secure this they proposed to give a bonus of $84,000 a year for 20 years. This road will shorten the St. John route to Halifax some forty to fifty miles, as Annapolis is directly opposite St. John, on the Bay of Fundy, and on a fair day St. John can be distinctly seen across it. The country around Annapolis is the richest and most fertile in the province.

New York Central Railroad.

The annual statement of the operations of this company for the fiscal year ending September 30, 1864, was submitted at a meeting of the stockholders held on the 14th inst. The following is an abstract:

EARNINGS AND RECEIPTS.

From through passengers		$1,128,101 48
" way "		2,795,050 32
" through freight		5,711,896 24
" way "		2,758,074 31
" express		95,790 00
" rents, storage, etc		435,577 48
Total		$12,997,889 83

PAYMENTS OTHER THAN FOR CONSTRUCTION.

For transportation expenses, viz:

For passenger business	$3,060,234 51	
" freight "	6,285,949 85	
	$9,346,184 36	
For interest including interest on Debt Certificates held for the sinking fund	$1,026,765 38	
For sinking funds	111,182 38	
For rent of Niagara bridge and Canandaigua railroad	60,000 00	
For U. S. Tax on earnings	84,959 88	
		1,282,907 64

For dividends, viz:

No. 20, Feb., 1864, 5 per cent.	$1,218,450 00	
No. 21, Aug., 1864, 4 per cent.	975,400 00	
U. S. tax on same	85,323 50	
		2,279,173 59

The transportation expenses for the year ending September 30, 1864, were 71.91 per cent. of the gross earnings for the same period.

The net earnings for the year ending September 30, 1864, were $2,368,797 88, equal to 9.25 per cent. (and U. S. Tax thereon) on the amount of the capital stock of the company.

SUMMARY *of all transportation expenses for the year ending September* 30, 1864, *as shown by the following tables:*

	Amount.	Allotted to Passenger Transp.	Allotted to Freight Transp.
Maintaining roadway and real estate	$3,170,750	$1,212,782	$1,957,968
Repairs of machinery	2,672,635	726,970	1,945,665
Operating the road	3,502,799	1,120,483	2,382,316
Total	$9,346,184	$3,060,235	$6,285,949

COST OF OPERATING THE ROAD.

	Amount.	Allotted to Pass. Transp.	Allotted to Fg't Transp.
Office exp., stat'ery, etc.	$33,937 48	$17,817 11	$16,120 37
Agents and clerks	293,623 84	113,807 82	179,816 02
Handling freight	486,105 64		486,105 64
Porters, watchmen, etc.	241,983 55	92,558 71	149,424 84
Wood and water station attendance	59,009 74	22,571 23	36,438 51
Conductors, etc.	229,070 96	98,162 59	130,908 37
Engtnemen and firemen	311,907 84	104,235 81	207,672 03
Fuel and preparing	1,300,359 01	216,931 25	497,387 32	802,971 69
Oil and waste			82,975 80	133,955 45
Loss & damage of goods	103,859 79	318 13	103,541 66
Damages for injuries of persons	15,718 94	11,789 20	3,929 74
Damages to property including damages by fire and cattle killed	6,260 71	2,347 77	3,912 94
Gen'l superintendence	75,794 39	28,422 89	47,371 50
Contingencies	128,238 23	48,088 59	80,147 64
Totals	$3,502,799 37	1,120,482 97	2,382,316 40

MAINTENANCE OF ROAD AND MACHINERY.

	Amount.	Allotted to Pass. Transp.	Allotted to Fg't Transp.
Repairs of road, etc.:			
Repairs of road bed and railway, except'g cost of iron	$1,159,214 53	$439,957 17	$719,257 36
Cost of iron (including the cost of chairs and spikes) used in repr's	1,144,214 12	437,661 90	706,552 22
Repairs of buildings	525,217 10	200,895 54	324,321 56
Rep'rs of fences & gates	20,633 63	7,872 37	12,761 26
Taxes on real estate	327,884 80	125,386 81	203,447 99
R'p'rs of Mob'k turnp.	2,635 83	1,008 20	1,627 63
Totals	$3,170,750 31	1,212,781 99	1,957,968 32
Repairs of machinery:			
Rep. of eng'es & tend'rs	$652 241 90	$244,590 71	$407,651 19
Do. pass. and bag. cars	418,399 35	418,399 35	
Do. freight cars	1,481,381 48		1,481,381 48
Do. mach'y, etc., in shops	83,833 27	31,437 48	52,395 79
Incidental expenses	86,778 68	32,542 01	54,236 67
Totals	$2,672,634 68	726,969 55	1,945,665 13

Comparative statement of the funded debt and capital stock on the 30th September, 1863 and 1864.

	1863.	1864.
Debt certificates less am't of sinking fund	$7,146,104	$6,917,598

		$42,275,999 36

The following is a detailed statement of the funded debt:

Debt certificates, or premium bonds, issued to stockholders in 1853, under the consolidation agreement, payable May 1, 1883, with interest at 6 per cent. per annum, payable semi-annually, on 1st May and November	$8,892,600 00	
Deduct the amount of the sinking fund provided for their payment under the consolidation agreement, consisting of $1,591,100 in said certificates, duly cancelled, $243,000 in U. S. 6 per cent. bonds, and $140,902 17 in U. S. indebtedness for which certificates are due	1,975,002 17	
		$6,917,597 83
Amount outstanding of the debts of the former companies, assumed under the consolidation agreem'nt		224,920 59
Bonds for funding the principal of the debts assumed for the former companies, at consolidation, payable August 1st, 1876, interest at 7 per cent. per annum, payable semi-annually, on 1st February and August	$1,680,000 00	
Less in S. F., cancelled	282,000 00	
		1,398,000 00
Bonds to stockholders in Buffalo and Niagara Falls Railroad Company, under the lease of that company's road, payable May 1st, 1883, interest at 6 per cent. per annum, payable semi-annually, on 1st May and November	$110,800 00	
Less in S. F., cancelled.	32,800 00	
		78,000 00
Bonds for railroad stock, payable May 1st, 1883, interest at 6 per cent. per annum, payable semi-annually, on 1st May and November	$817,000 00	
Less in S. F., cancelled.	154,000 00	
		663,000 00
Bonds for real estate purchased, payable May 1st, 1883, interest at 6 per cent. per annum, payable semi-annually, on 1st May and November	$235,000 00	
Less in S. F., cancelled.	70,000 00	
		165,000 00
Bonds and mortgages, for real estate purchased, with interest at 7 per cent. per annum, excepting $45,550 50, the interest upon which is at 6 per cent. per annum		235,823 15
Bonds of August, 1859, payable August, 1876, interest at 7 per cent. per annum, payable semi-annually, on 1st February and August, with convertible privilege, at par, for ten years	$990,000 00	
Less converted into capital stock	386,000 00	
		604,000 00
Bonds of October, 1863, payable December, 1887, interest at 6 per cent. per annum, payable semi-annually on 15th June and December—issued in renewal of 7 per cent. Bonds, due 15th June, 1864*	$3,000,000 00	
Less in S. F.† cancelled	75,000 00	
		2,92
Total amount of funded debt, September 30th, 1864		$13,211,341 57

* Of these Bonds $247,300 in amount had not been presented for payment at the close of the fiscal year—the funds to meet them having been appropriated, they are not included in the statement of debt.

† The contribution to be made to this sinking fund is 2 per cent. per annum upon the whole amount of bonds issued.

The company has no floating debt.

During the year acceptances have been given as heretofore; those outstanding at the close of the fiscal year (amounting to $52,568 26), have all been paid before the verification of this Report, at the date of which the company has none outstanding.

The average rate per annum of interest on funded debt, is 6.15 per cent., and all interest, except on mortgages, is payable in the city of New York.

ADDITIONAL STATEMENTS.

During the year there has been charged to construction account, for land for additional freight and cattle accommodations, principally at Albany and Buffalo, $139,183 36.

All the other expenditures during the year have been charged to transportation expenses, and include, besides the ordinary items of general repairs, the following:

The addition of 2 locomotive engines and 601 cars to the equipment. The addition of 6.36 miles to the second track between Syracuse and Rochester, and 3.92 miles to the sidings and turnouts at various points along the line. The cost of erections and improvements at cattle yards at Buffalo and Suspension Bridge. Enlargements and improvements to depot buildings at Rome, Buffalo and Niagara Falls. The substitution of an embankment and culvert for the wooden bridge (five spans of 109 feet each) at Allen's Creek. The completion of a stone arch and earth filling over Canal Basin at West Troy. The construction of an iron bridge over the Erie Canal at Rome, and material for and part construction of iron bridge over the Erie Canal at Schenectady.

The length of iron bridging now upon the line, reduced to single track, amounts to 5,299.8 feet.

The renewal of iron rails, during the year, amounted to 13,308 tons, equal to 133.43 miles of single track; the number of ties renewed during the same period was 284,894.

The amount of income used for the construction and investment accounts, to the close of the year, was $2,990,452 64, as shown by the following statement:

Construction account		$32,879,251 38
Investment		712,945 00
		$33,592,196 38
Capital stock	$24,386,000 00	
Funded debt, less debt certificates and bonds to Buffalo and Niagara Falls Railroad Co., for premiums allowed at consolidation	6,215,743 74	
		30,601,743 74
		$2,990,452 64

The amount of fuel and supplies not included in the assets of the company, as shown by the inventory and balance sheet herein contained, is $1,000,000 00.

The capital stock has been increased during the year $177,000, by the conversion of an equivalent amount of 7 per cent. bonds due in 1876. In 1863, $209,000 of these bonds were converted, making the amount to date $386,000. During the year, the funded debt of the company has been reduced $568,306 79. Deducting increase of capital stock, as above, will make a net decrease of stock and debt of $391,306 79. The total decrease of indebtedness since 1861 has been $1,015,663 93.

The increase in gross earnings over the previous year has been $2,100,258 45; with an increase in expenses of $2,616,258 58—making the decrease in net earnings $516,000 13. The decrease of fuel and supplies on hand is $28,072 66.

The equipment of the road consists of 241 locomotives; 188 first-class passenger cars; 68 second-class and emigrant cars; 78 baggage, mail and express cars; 4,596 freight cars; and 360 cars for gravel and other service.

Miles run by passenger trains, 2,123,580; by freight trains, 3,452,275; by other trains 414,353, total, 5,990,208, an increase over 1863, of 296,985. Aggregate miles run by passenger cars in passenger trains, 8,434,547. Do. by baggage, mail and express cars, 3,132,980. Aggregate miles run by all cars in passenger trains, 11,567,527; an increase over the previous year of 2,306,827.

Number of passengers carried eastward, 1,826,597; of which 96,245 were through and 1,730,352 way. Do. carried westward 1,727,657; of which 105,115 were through and 1,622,542 way. Aggregate both ways 3,554,254; of which 201,360 were through and 3,352,894 way. Total miles travelled by passengers 193,447,735, an increase over the previous year of 46,209,767.

Tons of freight carried eastward 1,144,162; of which 588,207 were through and 555,955 way. Do. carried westward 412,986; of which 178,362 were through and 234,624 way. Aggregate both ways 1,557,148; of which 766,569 were through and 790,579 way. Total movement of freight, or number of tons carried one mile, 314,081,410, an increase over the previous year of 1,885,614.

Length of main line from Albany to Buffalo, 297.75 miles; length of side or parallel branch lines, 258.13—total length of first track, 555.88 miles; length of second track on main line and branches 262.86; length of sidings, turnouts and switches 145.43—total length of equivalent single track 964.17 miles.

Length of Niagara Bridge and Canandaigua railroad (leased) 98.46 miles; branch line to Elevator at Tonawanda, 1.63 miles; sidings, turnouts and switches 3.42 miles—total length of equivalent single track 103.51 miles.

Finances of Ohio.

The following is a recapitulation of the receipts and disbursements of the State Treasury for the fiscal year ending November 15, 1864:

RECEIPTS.

General revenue fund	$1,450,663 17
Canal Fund	36,742 84
Sinking fund	2,127,378 34
State common school fund	1,279,571 39
Soldiers' Allotment Fund	2,376,716 20
Military fund	451,632 47
Volunteer Relief fund	955,966 52
National road	26,977 49
Bank redemption	928 25
District school library	83 15
Canal bank, Cleveland	890 07
Seneca county bank	971 08
City Bank, Cincinnati	1,618 85
Total	$8,710,139 82

DISBURSEMENTS.

General revenue	$824,152 27	
Canal fund	14,175 25	
Sinking fund	1,407,542 04	
State common school fund	1,220,841 70	
Soldiers' allotment f'd.	1,622,850 46	
Military fund	680,520 50	
Volunteer relief fund.	916,078 05	
National road	19,538 88	
Canal Bank, Cleveland	342 30	
Seneca County Bank	360 79	
City Bank, Cincinnati.	69 46	
		$6,706,471 70
Balance in Treasury, Nov. 16, 1864.		$2,003,668 12

The amount of the increase in receipts over 1863 is $2,896,525 82; in the disbursements, $1,344,784 70: and in balance on hand at the close of the fiscal year, $1,051,741 12.

The following funds present an increase in receipts, as compared with last year:

General revenue	$199,780 36
Sinking fund	210,538 76
State common school	62,341 11
Soldiers' allotment	1,334,514 45
Military	152,937 43
Volunteer relief	437,964 28
National road	1,682 82
	$2,399,759 21

There is a decrease in receipts as follows:

Canal	$2,302 08	
Bank redemption	25 50	
District school library	102 14	
Canal Bank, Cleveland	589 48	
Seneca County Bank	50 03	
City Bank, Cincinnati	164 16	
		3,233 39
Making the net increase as stated above		$2,896,525 82

The disbursements from the following funds are larger than they were in 1863:

State common school	$80,197 94
Soldiers' allotment	705,814 45
Military	381,825 47
Volunteer relief	427,109 90
Seneca county Bank	310 76
	$1,595,258 52

The decrease in the disbursements are as follows:

General revenue	$2,943 63	
Canal	11,733 49	
Sinking	234,979 93	
National road	347 25	
Bank redemption	25 50	
District school library	102 14	
Canal Bank, Cleveland	247 18	
City Bank, Cincinnati	94 70	
		250,473 82
Net increase, as stated above		$1,344,784 70

The receipts and disbursements during the past five years have been as follows:

	Receipts.	Disbursements.
1860	$4,031,147	$3,950,701
1861	5,657,727	5,524,514
1862	6,512,807	6,027,566
1863	6,313,614	5,361,687
1864	8,710,139	6,706,471

Raritan and Delaware Bay Railroad.

At the annual meeting of this company, held at Red Bank, N. J., on the 14th inst., the following gentlemen were elected directors: H. M. Alexander, N. Y.; Samuel G. Wheeler, Jr., N. Y.; H. H. Boody, N. J.; Elisha Riggs, N. Y.; John Humphrey, N. Y.; Jos. C. Potts, N. J.; Wm. Torrey, N. J.; F. B. Chetwood, N. J.; Robt. Campbell, N. Y.; Z. W. Scriven, N. J.; W. C. Patterson, N. J.; Ezra Nye, N. J., and H. A. Bowen, N. Y.

☞ A "monster improvement" is nearly completed at Chicago by the Dock Company, who have planned a magnificent system of docks, embracing a water front of five miles, the whole connected by seven ship canals cut at right angles with the river. These canals are 100 feet wide, 12 deep, and average 1,760 feet in length. By the same plan, a connection is made with a complete railway system. The capital of the company is $650,000.

Continental Railroads.

A GRAND PERSPECTIVE OF NATIONAL DEVELOPEMENT.

The Government of the United States has assured the construction of a central Pacific railroad, by gifts of public lands along its route, and by pledges of the public credit as the great work advances. We perceive in the closing pages of the report from the Treasury Department upon the Foreign and Domestic Commerce of the United States, that the population of Nebraska, Kansas, Colorado, Utah, Nevada, and Northern California, has advanced in such a ratio since 1850, with corresponding increase of internal trade and transportation, as to render it highly probable that those great interior States, threaded upon the Union Central railroad, will, by the year 1870, be sufficient for its support—vindicating the gigantic enterprise in a financial sense. Statistics are given of the rapid self-support of railways in India, and particularly in Australia, which fully justify the American scheme. The people of the United States thus far have constructed and sustained railway construction at the rate of one mile to every thousand of population, and there is no reason to doubt that the communities organized over the great plains and mountains between the Missouri river and the Pacific will demand and support continental railways in the same proportion.

The author of this branch of the Report (James W. Taylor of Minnesota), assuming that emigration, the encouragement of loyal governments in the South, and the progress of Western commerce, will require an early recognition of a Southern Pacific railway when peace is again reached, proceeds as follows:

When, in 1853, the initiative of Pacific railroad exploration was presented to the United States Senate, resulting in a Congressional appropriation of $150,000 for the purpose, attention was directed to three routes—the northern, the central, and the southern. Legislation has followed in behalf of one—the central—not so much so from any demonstration of greater feasibility, but because the mineral discoveries of the interior, followed by population, suggested the selection. The same causes are now active on the two other routes. Discoveries, not only of gold and silver, but of coal, iron, lead, and salt, diversify the map of the Rocky mountain region everywhere within our boundaries; and an emigration from the Pacific coast meets the Atlantic column even upon the great plains which are drained by the Missouri, the Platte, and the Rio Grande.

The necessity of more than one route between the Mississippi States and the Pacific coast will appear from an enumeration of the railroad lines which are indispensable to the commerce between the Atlantic and interior States. These are seven well-defined thoroughfares: (1) From Portland, by the Grand Trunk, to Detroit, and thence, with a traverse of the State and Lake of Michigan to Milwaukee and La Crosse; (2) by the New York Central, the Great Western, of Canada, and the Chicago and Northwestern railroad, to Prairie du Chien; (3) by the New York and Erie, the lines of Ohio and Indiana south of the great lakes, and the Illinois Central, to Galena; (4) the Pennsylvania Central, and its western connections, to Rock Island; (5) the Baltimore and Ohio, by way of Cincinnati, to St. Louis; (6) from Richmond, through the Cumberland valley, to Memphis; and (7) from Charleston and Savannah, traversing the States of Georgia, Alabama, and Mississippi to Vicksburg and New Orleans. All these highways are thronged and prosperous, and, with a wonderful impulse to colonization and commerce induced by mining investments, a period of twenty-five years will probably witness the completion of four great continental communications within the limits of the north temperate zone, and upon the following lines:

1. Through the southern tier of States, on or near the parallel of 35 deg., which is central to the region of cotton, the sugar cane, and the vine, and which will be supported by the populations of Louisiana, Arkansas, Neosho (or the territory occupied by the Cherokee and Choctaw Indians), Texas, New Mexico, Arizona, Sonora and Southern California. This may be called the Gulf route, from its relation to the Gulfs of Mexico and California.

2. The central, which is now in course of construction, on the average latitude of 40 deg. With its present prestige and aid from the Federal Government, soon to be increased by the intervention of State Governments in its behalf, the speedy construction of this road may be anticipated. If in operation at the present moment, the road would be financially successful. All the resources of Kansas, Nebraska, Colorado, Utah, Nevada, and in a great degree, of Missouri and California, are pledged to such a result.

3. The Lake route, hitherto designated in Congressional debates as the Northern Pacific route, connecting the western coast of the great lakes, and the navigable channel of the Columbia river, by the most direct and feasible communication with which the Territories and future States of Dakota, Montana, Idaho and Washington, as well as the States of Minnesota and Oregon, are identified.

4. The international route, or an extension of the Canadian railway system across the Peninsula of Michigan, and through Wisconsin and Minnesota, to the English colony of Selkirk in latitude 50 deg., and thence, through the valleys of the Saskatchewan and upper Frazer rivers, to the Pacific coast in latitude 54 deg.

The prediction is hazarded that the year 1890 will witness the consumation of the 8,000 miles of interior railroad above indicated. A more accurate statement would be, that whenever, along either of these routes, a population shall be assembled of two millions of souls, then will follow, by an irresistible social law, the construction and support of two thousand miles of railroad. The probability of that aggregate of population by the year 1870 has been considered on the central line. The situation of the more southern communication has been also referred to, and some space will now be given to the probabilities that, by the year 1890, the great lakes will be connected by railroad with the Columbia river and Puget's sound, while 1880 is likely to witness the completion of the international railroad upon the average latitude of 52 deg. north.

THE NORTHERN OR LAKE ROUTE.

The latitude of 45 degrees north, extended west of Minnesota, is not only central to the lake coast and the railroads of Northern Illinois and Iowa, Wisconsin and Minnesota, but in its traverse of the Great Plains and the Rocky Mountains it is most accessible from the mining districts now developed, or soon to be occupied, in the Territories of Dakota, Montana, and Idaho. Other conditions being favorable, the future emigrant route will follow the parallel of 45 or 46 degrees, and, when population warrants, that will be the general direction of the northern or lake railroad route.

Explorations by officers of the General Government, and publications of their reports, have made the general features of this route quite familiar. Fully nine-tenths of the area between the 100th meridian of longitude and the Cascade range of Oregon will never be available for agriculture, although districts far more extensive will support herds and flocks. The climate, owing to the reduced altitude, is not more severe than in the corresponding districts of Colorado and Utah. The Great Plains are characterized geologically by a development of the cretaceous formation, which is observed over large Asiatic areas, and, concurring with aridity, constitutes the American desert. Population would have been slowly attracted to those localities, except for the discovery of gold. The "northern mines," as they are termed, upon the sources of the Columbia and Missouri, were discovered not more than two years since, and now have a population of 30,000, of which 12,000 are east of the mountains.

In addition to the Salmon River mines of Idaho, and the Missouri and Yellowstone mines of Montana, under the average longitude of 108 degrees, it is now well ascertained that the black hills of Dakota Territory, situated on the 44th parallel of latitude, and between the 103d and 105th meridians of longitude, are rich in gold and silver, as well as coal, iron, copper, and pine forests. With the pacification of the Sioux nation, and the establishment of emigrant roads, Dakota will be the scene of great mining excitement, as the gold field of the Black hills is within two hundred miles of the steamboat navigation of the Missouri River, at the intersection of its channel with the 45th parallel of latitude. Admitting the general sterility of the Great Plains, and the physical difficulties of the mountains, yet the great productiveness of the northern mines warrants the opinion that the Territories of Idaho, Montana, and Dakota will advance in population in a ratio fully equal to that observed in Nevada and Colorado since their first settlement. The discoveries at Washoe and Pike's Peak date from 1859. Five years is the whole period of the settlement and progress of Nevada and Colorado, and within that period each Territory has reached a permanent population of 60,000. Both have been subject to the mutations of a mining population, but each has increased at the rate of twelve thousand souls per annum. So with the Salmon River district, twenty months of productive gold mining having assembled 20,000 people, while East Idaho, or Montana, at the expiration of twelve months from the first discovery of gold on the Jefferson fork of the Missouri, had a population of 12,000. If such a rate of accretion is accepted, the result in the year 1890 will be indicated as follows:

	1863.	1870.	1880.	1890.
Idaho	20,000	104,000	224,000	344,000
Montana	12,000	96,000	216,000	336,000
Dakota	10,000	94,000	214,000	334,000
	42,000	294,000	654,000	1,014,000

An estimate of the increase of population in Oregon and Washington is annexed. Oregon in 1850, had a population of 13,294, which was increased in 1860 to 52,465, or a ratio of increase of 294.65. Assuming a ratio of increase from 1860 to 1870 of 200 per cent.; for the decade closing with 1880, of 100 per cent., and of 50 per cent. from 1880 to 1890, the population of Oregon during and at the expiration of twenty-seven years will be as follows:

1860	52,465
1870	157,395
1880	319,490
1890	472,185

The population of Washington is estimated on the hypothesis that the ratio of increase during the first decade will be 300 per cent., (or about the same as that of Oregon from 1850 to 1860;) then 200 per cent. for ten years closing with 1880, and 100 per cent. for the decade of 1890, as follows:

1860 (by census)	11,168
1870 (assumed)	44,672
1880 "	134,016
1890	268,032

The ratio of increase registered as to Michigan and Wisconsin, from 1830 to 1860, far exceeds these estimates.

	1830.	1840.	1850.	1860.
Michigan	31,639	211,560	397,654	749,113
Wisconsin	....	....	30,945	305,391	775,881

An American railroad from the west border of Minnesota to the Columbia River may be anticipated by the year 1890, on the following basis of population, ascertained as above:

Dakota	334,000
Montana	336,000
Idaho	344,000
Oregon	472,185
Washington	268,032
	1,724,217

THE INTERNATIONAL ROUTE.

Public sentiment in Canada and England has long demanded measures for the colonization of Central British America, as that fertile belt of territory is now called, which extends from Canada and Lake Superior to the Rocky Mountains. It includes the valleys of the Red River of the North and the Saskatchewan River, which belong to the hydrographical system of Hudson's Bay, and are covered by the charter of the Hudson Bay Company.

Selkirk settlement, on the Red River of the North, was founded in 1812, and has a population of 10,000—an industrious, moral, and well-ordered community. Fort Garry, in this settlement, is the North American headquarters of the Hudson Bay Company. The posts of this company, more than fifty in number, occupy very commanding situations over the immense area bounded by Hudson's Bay and Lake Superior on the east, the Rocky Mountains on the west, and the Arctic Ocean on the north. The fur trade of this immense territory concentrates its annual product on the Red River of the North at Fort Garry, from which point, by the annual voyages of brigades of batteaux, merchandise and supplies are distributed to the most distant post. Prior to 1858 the imports and exports of the Hudson Bay Company were principally transported by the difficult and dangerous route of Hudson's Bay and Nelson's River, or over the numerous obstacles intervening from Lake Superior to Red River, on the British side the international line. In 1858, however, materials were transported from the navigable waters of the Mississippi River to construct a steamer on the Red River, and in 1862 two such vessels navigated that stream. The trade previously existing between St. Paul and Selkirk has been greatly increased in consequence. The imports of Central British America for the use of the Hudson Bay Company and the Selkirk settlers amount to $500,000 annually, while the average annual exports, almost exclusively furs, amount to $1,000,000.

It is now well known that, northwest of Minnesota, the country reaching from the Selkirk settlement to the Rocky Mountains, and from latitude 49 deg. to 58 deg. on the longitude of 94 deg., and to latitude 55 deg. on the Pacific Coast, is as favorable to grain and animal production as any of the Northern States; that the mean temperature for spring, summer and autumn, observed on the 42d and 43d parallels, in New York, Michigan, and Wisconsin, has been accurately traced through Fort Snelling and the valley of the Saskatchewan, to latitude 55 deg. on the Pacific Coast, and that from the northwest boundary of Minnesota, this whole district of British America is threaded in all directions by the navigable water lines which converge to Lake Winnipeg.

These facts, however favorable to agricultural settlement, would have failed to revolutionize the policy of the Hudson Bay Company, except for the violent excitement of gold discovery. The year 1858 directed a column of adventurers to the channel and sources of Frazer River; the organization of British Columbia followed, and it was soon ascertained that the richest and most extensive gold fields of northwest British America—the Cariboo mines—are so far within the Rocky Mountains, so far up to the utmost sources of Frazer River, as to be practically more accessible from Selkirk than from the coast of Puget's Sound. At length, in 1862, the tributaries of the Saskatchewan and Peace Rivers, on the eastern flank of the Rocky Mountains, were discovered to be auriferous; while eastward stretched, towards Canada and Lake Superior, not less than 100,000,000 acres of fertile lands destined to cereal cultivation, whenever reached by emigration. English and Canadian exploration also established, in favor of this district, that its average elevation above the sea was far less than in American territory; that the Rocky Mountains were diminished in width, while the passes were not difficult; that the supply of rain was more abundant, and the carboniferous and silurian formations were of greater extent than further south; and, owing to the greater influence of the Pacific winds through the mountain gorges and the reduced altitude, that the climate was no material obstacle to civilized occupation.

The Hudson Bay Company, in 1863, was reorganized to meet the exigencies of imperial and provincial policy in Central British America, "in accordance (to quote the circular of the new directory) with the industrial spirit of the age, and the rapid advancement which colonization has made in the countries adjacent to the Hudson's Bay territories."

While the present most effective organization of the fur trade will be continued and even extended, the company now proposes to avail itself of all possible agencies for the rapid colonization of the Saskatchewan basin and the gold districts at the sources of the Columbia, Frazer, Saskatchewan, and Peace Rivers. A telegraph line from St. Paul to Pembina, and thence through Selkirk and the Rocky Mountains to the Pacific Coast, is first announced as the special enterprise of 1864. Then a connexion of the Selkirk settlement by railroad with St. Paul, and by a direct emigrant road with Fort William, on the British coast of Lake Superior, will receive effective aid, concurrently with the prosecution of American and Canadian enterprises. Steamboat navigation is to be extended upon Lake Winnipeg and the Saskatchewan River. The systems of land survey and gratuitous allotments of land to colonists which prevail in the United States are proposed, the company reserving alternate blocks or sections to support future railroad construction, since, at the earliest practicable moment, a railroad will be undertaken traversing the colonies of Central British America and British Columbia. It is in the power of the modernized Hudson Bay Company, and it is its well-defined purpose, to connect Lake Superior and the Pacific Coast by a cordon of settlements, and to carry forward the construction of two thousand miles of railroad simultaneously with the advent of population, and as the sure means to encourage the settlement of Northwest British America, or the interval which separates the lake coast of Canada from the coast of the North Pacific ocean.

This international railroad (as it may properly be called, until the development of British America warrants a direct communication with Canada) will be the favorite object of English capitalists on this continent, as the Union Pacific Railroad will combine in its behalf the energies of the Government and citizens of the United States. These two enterprises will therefore precede the construction of railroads on the gulf and lake routes, but only by a decade of years. All four routes will be demanded by the wants of 8,000,000 of people, which the next twenty-five years will witness permanently seated on the average latitudes of 35, 40, 45, and 50 degrees, between longitude 95 degrees and the Pacific Ocean.

Interest and Dividends.

The Chicago and Northwestern Railway Company give notice that the dividend of three and one half per cent., subject to Government tax, declared payable on and after the first of December instant, on the preferred stock of the Chicago and Northwestern Railway Company, will also be paid on and after this date, at the Company's office in New York or Chicago to the parties in whose name the unconverted shares of the Galena and Chicago Union Railroad Company, now stands, upon the presentation of the certificates at either of said offices for the indorsement thereon of the payment of the dividend, such unconverted shares amounting to 3,186 out of 60,264 shares, and much of which is understood to be held in trusts or by agents and persons not as yet enabled to convert the same.

The Pittsburg, Fort Wayne and Chicago Railway Company, have declared a dividend of 2½ per cent. (free of Government tax) on the capital stock, for the quarter ending Dec. 31 inst., and of 3½ per cent (less the Government tax) on the Third Mortgage Bonds, for the six months ending Dec. 31, inst.; the latter in anticipation of that due April 1, 1865, both payable on and after Jan. 17, 1865, at the Company's Office in Pittsburg, and by the Transfer Agents, Winslow, Lanier & Co., No. 52 Wall street, New York, to the holders as registered at the respective offices. The Transfer Books will close on the 31st inst., at 2 o'clock p. m., and will re-open on the 17th day of January thereafter.

The Michigan Central Railroad Company have declared a dividend of $6 per share, free of U. S. tax, payable in New York, Boston and Detroit, on the 3d of January next.

The interest due January 1, 1865, on the Preferred Certificates of the Ohio and Mississippi Railroad Company (Eastern Division), will be paid on the 3d prox. at the office of the company in this city.

The Northern Central Railroad Company has declared a dividend of 2 per cent., clear of National and State taxes, for the quarter ending December 31st payable to the stockholders on the 20th Jan.. 1865.

The Boston and Worcester Railroad Company have declared a semi-annual dividend of 5 per cent. payable December 31.

The Western (Mass.) Railroad Company have declared a dividend of 5 per cent., payable January 2.

The Boston and Providence Railroad Company has declared a dividend of 5 per cent., free of Government tax, payable Jan. 2.

The Old Colony and Newport Railroad Company has declared a dividend of $4 per share, payable Jan. 2.

The Boston and Maine Railroad Company has declared a semi-annual dividend of 5 per cent.

The interest warrants due January 1, 1865, on the bonds of the Sandusky, Mansfield and Newark Railroad Company, will be paid at maturity by E. T. H. Gibson, 54 William street.

Interest on the public debt of Illinois will be paid by the Treasurer of the State at the American Exchange Bank, this city, from the 2d to the 16th of January, and thereafter at his office in Springfield, Ill.

The New Bedford and Taunton Railroad Company have declared a dividend of 4 per cent. payable January 2.

The Connecticut River Railroad Company have declared a dividend of 4 per cent.

☞ The following is a statement of the movement of specie at New York during the month of November, 1864:

Specie in banks and Sub Treas. Nov. 1	$33,955,867
Received from California in Nov.	882,276
Imported from foreign ports in Nov.	161,627
Gathered in from hoards in Nov.	1,229,160
Supply	$36,228,930
Exported in Nov	7,267,662
Leaves in banks and Sub Treas. Dec. 1	$28,961,268

American Railroad Journal.

Saturday, December 24, 1864.

Stock Exchange and Money Market.

The gold operators during the past week have received a very severe shock. The victorious march of Sherman, the defeat and route of Hood, and the probabilities of other results still more decisive, let in a flood of light upon the speculators, and they began to think that gold was not going up as high as many of them had so confidently predicted. There was quite a scramble on Monday to sell before a further fall could take place, and the pressure was so strong that a decline of 15 per cent. was submitted to.

That gold has been selling above its relative value for some time past no one coversant with values or prices, has any doubt. That combination has had much to do with the advance cannot be denied, and it is asserted that foreign houses unfriendly to the Union have taken an active part in keeping up the premium, in the hope of further deranging the National currency.

There has been another element at work in this business which has not been generally understood. It is a fact that almost all classes of retailers, tradesmen and manufacturers have been anxious to keep up the price of specie. It has constantly given them an excuse for raising the prices of the articles they themselves have to dispose of. If gold went up 2 or 3 per cent., then every article of prime necessity could be put up, not merely 2 or 3 per cent., but from 5 to 10 per cent. Every man who sold a pound of butter, or cheese, or coffee, every retail dry goods man who had a yard of cotton or silk to dispose of, added what he pleased, and excused himself by saying gold had gone up, and there is not much doubt that these persons have been using in a small way a portion of their means to keep gold up as long as possible. This system has worked hard on consumers, who have had to submit to extortion in every form in consequence, and to none therefore have the recent successes of our arms been more grateful. It is an unpleasant task to censure those who ordinarily bear the character of good citizens, but it is a melancholy fact that too many of them have been pleased with disaster, since it enabled them through the fluctuations in the gold market, to realize profits wholly illegitimate and unjust.

It is to be hoped, however, that in a few weeks more this business will be effectually brought to a conclusion. One striking example of the unfairness of which we complain in regard to the article of coal is worthy of being noticed. The very best Nova Scotia coal is brought to this city by the importing houses, and sold by wholesale at from $13 to $15 per chaldron. The retailers ask from $25 to $35 for this very article!! In one respect at least, the reciprocity treaty with Canada has been of great service to our principal cities and towns. The Nova Scotia mines are largely owned by Americans, and it is their capital and enterprise which work them. One house in this city has imported no less than 126,000 chaldrons during the present year, and the price of gas has been kept down by this means alone. The companies supplying us are monopolists of a necessity to our comfort, and though they make large dividends and their stock bears an enormous premium, they show little desire to lessen their charges or increase their accommodation. We may be thankful that we are not charged $5 per 1000 feet.

The great question of the day is the financial one. By this, we mean the condition of the public debt and the National currency. The people feel strong and confident in themselves and their resources, and they look to the Government for corresponding action. The general opinion appears to be that no more securities of a gold interest paying character should be issued. Greenbacks are believed in and are acceptable to every one. Let peace be restored, and the difference between them and gold will rapidly disappear. The revenue will then be equal to all the wants of the Government. Three hundred millions a year may be collected even on the present basis of taxation and imposts. One year's absorption of legal tenders without any further issues would take up all the floating circulation. Millions, however, will be hoarded and kept out of sight

for years, just as is the case with gold. And that peace is close at hand is scarcely to be doubted. There now remains but one port to be closed and one army to be captured. After that, little more of the rebellion will be left.

Our foreign relations gives us but little anxiety. We have again from Lord Russell a fresh assurance of strict neutrality, and though expressed in his usual *gauche* manner, it is nevertheless to be depended on. Our Canadian affairs are already in the way of a peaceful solution. We personally know that the Canadian ministers are grieved at the course of the Magistrate and Police Chief of Montreal, and efficient steps have been taken by the Government to do us justice. We are also pleased to observe the conservative and statesmanlike conduct of Mr Sumner in relation to this subject. War is a weapon costly and bloody. We were forced into the present one, and have no call to engage in another. We have no doubt but that in "sixty days" time the Border difficulties will have passed away, and we shall be ready to arrange a new treaty with the British provinces which will be mutually beneficial, and in conformity with the requirements of commerce.

The censures so freely bestowed on the present as well as late Secretary of the Treasury, are often without justice. Nor do they emanate always from sources entitled to very great consideration.

Commercial editors talk very loudly and dogmatically sometimes, but are they all men of experience, talent, and influence? On the contrary are they not generally mere professional writers, and with but temporary employment? Certainly their opinions are no better than those of whose remarks they catch up and disseminate. The writers most of them would be very soon nonplussed, if the finances of the nation were left to their management.

The balance of the 10-40's is supposed to be taken, and the subscriptions to the 7-30s will probably re-commence on a large scale.

The National Banks are found to be active supporters of the National credit, as it was foreseen they would be, and not its enemies, as too many of the local banks have been. The continued efforts of the former may be calculated upon to carry through all the future loans of the Government, and especially the 7-30s when they are again set afloat with fresh vigor.

From the last week's report of the operations of the associated Banks of this city it appears they have increased their loans $2,008,167, and their specie reserves $150,500. At the same time their deposits have decreased $2,851,009 and their circulation $59,333.

The Africa which brings us late dates from Liverpool, puts us in possession of some interesting facts. The failures abroad continue, and there is every probability of a continental war owing to the Danish and Italian difficulties, an opinion prevailing generally in the German diplomatic circles. It is really wonderful to see with what docility the people of Europe submit to the aggressive ambition of a few reigning families.

We learn that the Atlantic and Great Western Railroad Company has placed its late issue successfully on the London market to the extent of $14,000,000, and that they already bear a premium of 2 per cent. This large sum is of course to be expended in this country for labor and materials, and will have a beneficial influence. If that amount is realised by exchange, it should have a decided effect on the price of exchange, which is even now below par.

The Money market is active and the price rules on the best class paper at 7½ per cent.

Railway securities are dull but stand very firmly. Governments have a general tendency towards a rise, foreign orders still coming in, and an active inquiry for them is arising in the London Market.

The balance in the Sub-Treasury was on Tuesday $33,056,147 62.

The aggregate value of the imports of general merchandise, other than dry goods and specie, at this port for the week ending December 19, was $1,085,768, against $1,732,359 in 1863, and $1,831,410 in 1862.

The exports from New York for the week ending December 19, were $5,012,979 against $2,606,118 in 1863, and $3,457,636 in 1862. The shipments of specie since January 1, have been $47,857,728. The exports since January 1, have been $208,131,679 against $165,900,456, in 1863, an increase of $42,231,223. The customs gold revenue at New York, specially pledged to the payment of the interest on the funded and fundable debt of the United States from January 1 to December 17, was $65,680,935.

The value of foreign goods imported into the port of Boston for the week ending December 16, was $430,290, against $645,437 for the corresponding week in 1863.

The foreign exports from the port of Baltimore during the past week were valued at $428,771.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Brooklyn 6s, Water Loan, 112; Illinois coupon 6s, of 1879, 102½; do., 1862, 98; North Carolina 6s, 58; Stonington R. R., 130; Central R. The Albany Bridge in Congress.

On the 12th inst., Mr. Davis, of New York, introduced a bill in the House of Representatives, declaring it lawful for the Hudson River Bridge Company at Albany, to construct and maintain a bridge over the Hudson River at Albany, and that in accordance with an act of the New York Legislature, and that when said bridge is constructed it shall be a lawful structure and also a post route for the transmission of the mails of the United States.

The bill was referred to the committee on post-offices and post roads.

☞ Mr. Chas. Minot has resigned as superintendent of the Erie Railway, and will be succeeded by H. F. Sweetzer, Esq., the present superintendent of the Atlantic and Great Western Railway.

☞ Hon. Dudley S. Gregory has resigned his position as Controller of the Erie Railway.

Allegheny Valley Railroad

A meeting of the stockholders of the Allegheny Valley Railroad Company was held at Pittsburg on the 15th inst., for the purpose of considering a contract with the Mahoning and French Creek Railroad Company, for the lease and extension of the Allegheny Valley Railroad, with a view of ratifying or rejecting the same. Mr. F. R. Brunot, the President of the road, made a few remarks in explanation of the object for which the meeting had been called, and then read the proposed contract to the stockholders. He also read a resolution adopted by the Board of Directors favoring the proposed lease and calling the meeting. The contract was then discussed at length by Messrs. Brunot, and others, and the ground taken that it was better not to act finally on a matter so important without further consideration. A resolution, was adopted, that the contract be published, and a copy placed in the hands of each stockholder; and that the meeting adjourn to assemble again on the first Thursday of January next. There was a very large attendance, and much interest in the proceedings was manifested.

Erie Railway.

The earnings of this road for the fiscal year ending September 30, 1864, were:

From passengers		$2,523,005
" freight		9,885,087
" miscellaneous		133,388
		$12,551,480
Operating expenses	$8,318,085	
Rents, taxes, etc.	739,668	
		9,057,753
		$3,493,727
Interest on bonds	$1,237,605	
Dividends on common stock	1,090,136	
Dividends on preferred stock	596,897	
		2,924,638
Surplus income		$569,089
Capital stock Sept. 30, 1864		$24,228,800
" " " 1863		19,973,200
Increase		$4,255,600
Bonded debt Sept. 30, 1864		$17,822,900
" " 1863		19,831,500
Decrease		$2,008,600
Total stocks and bonds:		
September 30, 1864		$42,051,700
" 1863		39,804,700
Increase		$2,247,000

New York Central Railroad.

The following gentlemen have been elected directors of this company for the ensuing year: Dean Richmond, Buffalo; Richard M. Blatchford, New York; Erastus Corning, Albany; John H. Chedell, Auburn; Alonzo C. Paige, Schenectady; John V. L. Pruyn, Albany; Nathaniel Thayer, Boston; Livingston Spraker, Palatine Bridge; Cornelius L. Tracy, Troy; Charles H. Russell, New York; Hamilton White, Syracuse; Henry H. Martin, Albany; James H. Banker, New York.

Inspectors of next Election—George Dexter, Albany; Rufus G. Beardslee, New York; Stephen Groesbeck, Albany.

☞ The directors of the Pennsylvania Railroad Company have given the stockholders the privilege of subscribing to their stock at par to the amount of ten per cent. on their respective interest.

Mining Intelligence.

Products of Lake Superior Mines for October.

	Tons.	lbs.
Quincy	140	1,530
Pewabic	85	563
Franklin	81	560
Isle Royale	33	104
Grand Portage	25	939
Huron	25	1,753
Douglass	2	1,459
Sheldon and Columbia	7	523
National	50	625
Total, 9 mines	451	8,056

At 48 cents per pound, a net ton of copper (2,000 pounds) brings $960, making the October product of these mines worth $432,960.

Iron Business of Lake Superior.

The increase of the iron business in the Lake Superior region furnishes a gratifying exhibit of the prosperity of that section of the country. The shipments of iron ore from Marquette for ten years past compare as follows:

Year.	Tons.	Year.	Tons.
1855	1,447	1860	116,998
1856	8,567	1861	45,430
1857	26,184	1862	115,721
1858	31,035	1863	208,787
1859	65,674	1864	225,119

Atlantic and Great Western Railway.

The following is the traffic of the Atlantic and Great Western Railway since Jan. 1, 322 miles being opened:

	Passengers, &c.	Freight.	Total.
January	$38,615	$168,683	$207,298
February	50,189	178,852	229,041
March	60,518	166,215	226,733
April	63,992	133,275	197,267
May	57,193	157,486	214,679
June	73,654	240,867	314,521
July	82,665	249,433	332,098
August	95,077	310,999	406,076
September	135,502	310,542	446,044
October	103,121	288,726	396,847
November	107,814	273,996	481,810
Total	$868,340	$2,479,074	$3,352,414

Railroad Earnings--Monthly.

The earnings of the Cleveland and Pittsburg Railroad for the month of Nov., were $220,062 63
Corresponding month of 1863 177,652 97
Increase $42,409 66

The earnings of the Erie Railway for the month of Nov., 1864, were $1,204,908 00
Corresponding month last year 1,024,649 00
Increase $180,259 00

The earnings of the Norwich and Worcester Railroad for the month of November, 1864, were $53,726 00
Corresponding month of previous year. 43,623 00
Increase $10,103 00
From June 1, to Nov. 30, 1864, are $344,283 00
Same time in 1863 262,771 00
Increase $81,512 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the month of Nov., 1864, were $444,522 61
Corresponding month of previous year 332,360 00
Increase $112,162 61

The earnings of the St. Louis, Alton and Terre Haute Railroad for Nov., 1864, were $202,966 34
Corresponding month of previous year 143,747 82
Increase $59,218 52

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending Dec. 16, 1864, was as follows:

Passengers	$20,541 18
Freight and live stock	38,813 24
Mails and sundries	1,851 34
Total	$61,205 76
Corresponding week of 1863	54,323 71
Increase	$6,882 05

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Dec. 7, 1864, were:

	1864.	1863.
Passengers	$2,675 53	$2,127 71
Freight	6,048 61	6,816 79
Express	104 16	104 16
Mails	296 58	296 58
Total	$9,124 88	$9,345 24

Receipts from January 1st to Dec. 7:

1864	$550,008 15
1863	388,381 48
Increase	$161,626 67

The earnings of the Marietta and Cincinnati Railroad for the 1st week in December:

	1864.	1863.
Passengers	$7,938 11	$4,134 18
Freight	10,140 99	11,154 07
Mail, express & telegraph	1,079 58	907 00
Total	$19,208 68	$16,195 25
Total since Jan. 1	$944,205 96	$657,557 56

The following is a comparntive statement of the earnings of the Chicago and Northwestern Railway for the second week of December:

	1863.	1864.
Passengers	$21,025 60	$34,640 29
Freight	69,609 41	77,754 37
Express	1,851 52	1,433 66
Mail	1,286 12	1,405 62
Total	$93,772 65	115,233 94
Increase 22-88 per cent.		$21,461 29

The earnings of the Michigan Southern and Northern Indiana Railroad for the 2d week of December, 1864, were $80,365 00
Corresponding week of previous year. 74,379 00
Increase $5,986 00

The earnings of the Michigan Central Railroad for the 2d week in Dec., 1864, were $76,344 63
Corresponding week of previous year. 70,454 42
Increase $5,790 21

The earnings of the Cleveland and Toledo Railroad for the 2d week in Dec. were $45,312 00
Corresponding week of previous year. 42,786 00
Increase $2,526 00

The earnings of the Toledo and Wabash Railroad Company for the second week of December 1864, were $50,089 00
Corresponding week of previous year. 21,328 00
Increase $28,761 00

The earnings of the Grand Trunk Railway for the week ending Dec. 10, 1864, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$40,363 00
Express, freight, mails and sundries	3,124 00
Freight and live stock	76,988 00
Total	$120,470 00
Corresponding week, 1863	120,978 00
Decrease	$508 00

The earnings of the Chicago and Rock Island Railroad for the 2d week in November, 1864, were $75,183 00
Corresponding week of previous year. 45,020 00
Increase $30,163 00

Department of the Interior.

REPORT FROM THE PENSION OFFICE.

Hon. Joseph H. Barrett, Commissioner of Pensions, has made an interesting report of the transactions of his office, from which we take the important passages, and make a synopsis of what could be conveniently abbreviated.

REVOLUTIONARY PENSIONERS.

On the 1st of last January there were but twelve of these pensioners remaining. An act of April, 1864, provided an additional hundred dollars to each of them, to be paid on and after the 1st of January, 1864. Since then seven are known to have died.

The number of original applications on behalf of widows of Revolutionary soldiers, admitted during the last fiscal year was 10, with a yearly amount of pensions equal to $932 21.

ARMY PENSIONS.

There were added to the invalid rolls, almost exclusively under the Pension Act of July 14th, 1862, during the year, 16,770 pensioners, at an aggregate yearly rate of $1,224,340 20. The rates of pension of 192 invalids, previously enrolled, were increased during the same period by an aggregate yearly amount of $6,143 60.

The total number of original applications of widows, orphan children, dependent mothers and dependent sisters, also, with few exceptions, under the last named act, admitted during the year, was 22,198, at an aggregate annual rate of $2,333,222. The pensions of five widows, previously enrolled, were increased at an aggregate annual rate of $30.

The whole number of army pensioners who had been paid within the fourteen months preceding June 30th, 1864, was as follows:

Class.	Number of Pensioners.	Yearly am't of Pensions.
Invalids	22,767	$1,624,388 80
Revolutionary pensioners	1,430	115,217 43
Widows, (other than Revolutionary,) mothers and orphans	25,433	2,676,579 00
Total	49,630	$4,416,185 23

The actual payments of army pensions during the last fiscal year were as follows:

Invalids	$1,409,943 01
Revolutionary pensioners, (including expense of disbursing agencies)	166,757 89
Widows, mothers and orphans	2,763,667 70
Total	$4,340,368 60

NAVY PENSIONS.

The number of navy invalid pensioners added to the rolls during the year, was 271, at an aggregate annual rate of $17,702. Of the pensioners of this class previously enrolled, 7 had their pensions increased during the year, by an aggregate annual sum of $225.

Original applications of widows, orphan children, dependent mothers, or dependent sisters, of deceased officers or seamen of the navy, were admitted to the number of 248, at an aggregate annual rate of $33,762.

The total number of navy pensioners who had been paid within fourteen months, preceding the close of the fiscal year, was as follows:

	Number of Pensioners.	Yearly am't of Pensions.
Invalids	712	$46,173 10
Widows, orphans & mothers	793	133,018 00
	1,505	$179,191 10

The whole amount of navy pensions paid during the year was as follows:

Invalids	$30,578 26
Widows, orphans and mothers	133,215 66
Privateer invalids	454 00
Total	$164,247 92

GENERAL AGGREGATE.

The total number of army pensioners inscribed on the rolls during the year was 39,068, at an aggregate annual rate of $3,558,494 41.

The total number of army pensioners on the rolls was 49,630, at an aggregate annual rate of $4,416,185 23.

The total number of navy pensioners inscribed on the rolls during the year was 519, at an aggregate annual rate of $50,464. The total number of navy pensioners on the rolls was 1,505, at an aggregate annual rate of $179,191 10. Whole number of pensioners, 51,135, at an aggregate annual amount of $4,595,376 33.

COMPARISON WITH PREVIOUS YEARS.

The following table shows the number of pensioners, of the several classes, during the last three years:

Class of Pensioners.	1862.	1863.	1864.
Revolutionary soldiers	30	18	12
Widows of "	1,850	1,573	1,418
Army invalids	3,878	7,248	22,767
Widows, orphans & mothers, (army)	1,485	4,820	25,433
Navy invalids	421	544	712
Widows, orphans & mothers, (navy)	483	577	793
Total	8,417	14,780	51,135

The annual aggregates and total yearly payments during the same years were as follows:

	Annual Aggregate.	Total am't paid.
1862	$921,076 69	$790,384 76
1863	1,371,716 40	1,025,139 91
1864	4,595,376 33	4,504,167 92

BOUNTY LAND.

During the year ending September 30th, 1864, there were 1,812 land warrants issued, granting, in the aggregate, 286,960 acres of public land, as follows;

Under the act of February 11th, 1847:

20 warrants, 160 each				3,200 acres.
Under the act of March 3d, 1855, and supplementary act:				
1,740 warrants, 160 acres each				278,400 "
30 "	120	"		3,600 "
22 "	80	"		1,760 "
1,792				283,716 "

The whole number of acres of bounty land granted during the last three years was 635,900.

THE PENSION ACT OF JULY 14TH, 1862.

During the first quarter of the current fiscal year, the admissions under this act have been as follows:

	July.	Aug.	Sept.	Total.
Invalids (army)	972	878	822	2,672
Widows, orphans and mothers, do.	1,634	1,849	2,382	5,865
Navy pensioners, during the same months,				108
Aggregate				8,645

Assuming the admissions of this quarter as a basis, and taking the average rate per annum of these three classes from those on the rolls during the last fiscal year, we have the following results for the current year:

Class.	No.	Av'ge rate per annum.	Amount.
Invalids, (army)	10,688	$73 00	$780,224 00
Widows, &c., do	23,380	105 00	2,454,900 00
Navy pensioners	432	99 16	42,837 12
Total	34,500		$3,277,961 12
Add amount on rolls June 30, 1864.			4,595,376 33
Total apparent amount for year ending June 30, 1865			$7,873,337 45

Carriers of Luggage.—Construction of Statute, Excursion Trains.—Contract.—Carrier's Lien.

The late case of Ramsey against the The North-Eastern Railway Company, was an action brought against that company for the alleged unlawful detention of a portmanteau, containing personal luggage and samples belonging to the plaintiff, a commercial traveller.

The facts which appeared in evidence were as follows:

The North Eastern Railway Company are in the habit of running excursion trains to and from the various watering places on the coast, for which, besides the ordinary tickets, they issued others at a lower rate of charge on the condition (advertised by placards and handbills,) that persons availing themselves of these tickets should carry with them no luggage. Towards the end of October (1862) the plaintiff, who wished to go from Scarborough to Whitby and thence to York, went to the railway station at Scarborough with a portmanteau containing the articles before mentioned. Having got a porter to place the portmanteau in the luggage-van, the plaintiff proceeded to the booking office, and there obtained from the clerk a ticket—a first-class day-ticket, having the word "Excursion," printed upon it,—for which he paid five shillings; the price of an ordinary day-ticket for the same journey being nine shillings. The course of the journey was from Scarborough to Rillington, thence to Malton, where those passengers who are going to Whitby, get out and proceed by another train. When the train arrived at Malton, the plaintiff asked the guard to take the portmanteau out of the van, intending to leave it at Malton, in order that it might on his return from Whitby, go on with him to York. The guard declined to do this, telling him, that, as it was not booked for York, it must go on with him to Whitby. On his arrival at Whitby, the plaintiff went to the Commercial Inn, whence he sent the boots to the station for the portmanteau. The station-master refused to give it to him unless he paid three shillings and one penny for the carriage, 2 shillings from Scarborough to Malton, and 1 shilling and a penny from Malton to Whitby.

On his cross-examination, the plaintiff denied that he had seen the company's placards announcing that no luggage was allowed to be carried by passengers travelling with excursion tickets; but he admitted that he had seen a smaller hand-bill containing the same announcement.

On the part of the plaintiff reliance was placed upon the 39th section of the company's consolidation act of 17 and 18 Vict. C. CCXI, which enacts that "passenger travelling upon the said railways may take with him his ordinary luggage, not exceeding 150 pounds in weight for first-class passengers, and 100 pounds in weight for second and third-class passengers, without any extra charge being made for the carriage thereof;" and it was insisted that this provision was imperative upon the company under all circumstances.

On the part of the defendants it was submitted that the 39th section of the statute applied to passengers travelling in the ordinary way, and did not extend to prevent the company from making special bargains for the exclusion of luggage from excursion-trains, which from that nature required special arrangements which would be frustrated by the trouble and delay necessarily attendant upon the conveyance of luggage.

The cause was tried before Baron Martin and a jury, at the last Spring (1863) Assizes at York. The Baron, however, ruled that the act of parliament entitled every passenger to carry with him the stipulated quantity of personal luggage, and that no regulation of the company could deprive him of that right, and consequently that the plaintiff was entitled to a verdict.

The jury, accordingly returned a verdict for the plaintiff, damages 40 shillings.

The defendants' counsel in Easter Term last (1863) obtained a rule *nisi*, for a new trial, on the ground of misdirection on the part of the learned judge in "telling the jury that the company's act of 1854 entitled the plaintiff to have his luggage carried with him free."

Erle, C. J. I am of opinion that this rule should be made absolute.

The learned judge who tried the cause having before him the 39th section of the company's act, 17 and 18 Vict. C. CCXI. which enacts that "every passenger travelling upon the said railways may take with him his ordinary luggage, not exceeding 150 pounds in weight for first-class passengers and 100 pounds in weight for second and third-class passengers without any extra charge being made for the carriage thereof," thought that the words "every passenger" were to be taken in their literal sense, and therefore that one who came, and in consideration of a reduced fare renounced the right to carry luggage with him, but who had surreptitiously put his luggage into the train, might still at the end of the journey insist upon the right which that section gives to a first-class passenger. Such was the opinion of that very learned judge. But with all deference to him, I cannot assent to the proposition. I think the 39th section must be taken to mean every passenger choosing to claim that right in the first instance, not every passenger who by a pretended renunciation of the right induces the company to carry him at a reduced rate. It is undoubtedly competent to any man to renounce a privilege which is given to him by a statute. The plaintiff is, as it seems to me, in the same situation as he would have been in if, having got a 9 shilling ticket he had gone back to the clerk and got him to exchange it for a 5 shilling excursion-ticket, on his agreeing to go without luggage, and had then, without the knowledge of the company's servants, put his portmanteau into the van again. I think it is of great importance that no encouragement should be given to those who consider the laws of truth and honesty not obligatory upon them when dealing with railway companies. If, then, it was competent to the plaintiff in this case to renounce his right to have his luggage carried with him, do the circumstances create a right in the company to charge him for the carriage of it? Although he intended to have it carried gratis, do the facts raise an implied promise on his part to pay them a reasonable sum for the carriage of it? I am of opinion, that, although the circumstances created no obligation on the company to carry the portmanteau safely so as to render them liable if it had been lost on the journey—as in the case where a passenger has palmed off merchandise as personal luggage—still it by no means follows that a party who thus uses the services of the company is not bound to pay for them what they are reasonably worth. I take it to be a wide general principle that you need not have an express contract to create an obligation to pay for goods delivered or services performed; but, where these have been obtained by means of deception, the law will imply a contract to pay what is usual and reasonable. In Chitty on Contracts, 7th edit. 19, it is said: The general rule as to the sufficiency of the consideration seems to be, that it may arise either—first by reason of a benefit resulting to the party promising, or to a third person, by the act of the promise, or secondly by reason of the latter sustaining any loss or inconvenience, or subjecting himself to any charge or obligation, however small the benefit, charge, or inconvenience may be; provided such act be performed, or such inconvenience or charge incurred, with the consent, express or implied, of the promiser or, in the language of pleading, at his request." That is sound law. Under ordinary circumstances, the charge for the carriage of a package like this from Scarborough to Whitby would be 3 shillings and a penny. The plaintiff caused that service to be performed for him, although he intended to have it performed without payment. According to the law which is clearly laid down in Scarfe *vs.* Morgan, 4 M and W. 270, I think the company were entitled to insist upon that lien. But it is said that they claimed too much, and that the excessive claim is a waiver of their right. They claimed 3s, 1d., being 2s. for the carriage from Scarborough to Malton and 1s. 1d. from the latter place to Whitby; and, inasmuch as the portmanteau was carried the latter distance against the plaintiffs will, it is said that the company are not entitled to charge for it. But I am of opinion that these may be considered as two separate claims; and the plaintiff was not entitled to have back his portmanteau until he had tendered what the company were lawfully entitled to claim. Further, am opinion that, when the train arrived at Malton, the guard did his duty to the company when he refused to allow the portmanteau to be left there at the risk of the company, and told the plaintiff, that, as he had brought it as luggage, I must go on with him. On the arrival of the portmanteau at Whitby, I think the company were perfectly justified in detaining it until paid for its carriage the whole distance.

The rule must be absolute for a new trial.

Rule absolute.

Lynn and Boston Horse Railroad.

A dummy engine has been contracted for by the Lynn and Boston Horse Railroad, to be ready for delivery on or about the 1st of January. Should the experiment prove successful, it will not only effect a large reduction of expenses, but afford a great saving of time and add much to the comfort of passengers. The receipts of the road for the year ending Nov. 30, 1864, were $129,926 62, being an increase of $41,241 37 over those of the year previous. The road has been kept in good condition, the usual four per cent. semi-annual dividend will be paid free of State and Government taxes, and a surplus of $8,000 will be left in the Treasury.

☞ The Western Railroad Company has increased its fares about 10 per cent.

Tramway on Mt. Cenis.

The work of tunnelling the Alps for railroad purposes is so slow compared with the necessities of internal trade and travel between France and Italy, that it is contemplated to build a railroad 48 miles long over the mountains on one of the military roads constructed by the first Napoleon. The tunnel will not be completed in less than twelve years, but the railroad can be built in two. When it is remembered that the summit of the pass through the mountains is seven thousand feet above the level of the sea, with gradients at some points of one in twelve, the descent equally rapid, the difficulties of the undertaking may be imagined. A locomotive expressly for such ascents and descents has been constructed. The railway will be covered with galleries of wood, iron and stone, to protect it from avalanches and snow drifts. The project has been favorably received by the Italian government, and English capitalists propose to build it. It will shorten the overland route to India five hundred miles.

Finances of the Sanitary Commission.

The Sanitary Commission has issued a financial report, giving an account of its receipts and disbursements from June 1, 1861, to October 1, 1864. The full exhibits is as follows:

Total amount of receipts..... .....$3,083,124 58

EXPENDITURES.

Supply department...	$1,742,383	17
Medical inspection ...	119,935	69
Special relief.....	251,100	68
Hospital directory....	47,564	94
Statistical department.	14,241	98
Publications	38,800	37
Expense	124,279	03
Cash in hands of ag'ts.	64,027	90
Miscellaneous	65,624	79
Total amount of expenditure	$2,467,958	55
Bal. of cash in hands of G. T. Strong, Esq., Treasurer, N. York, October 1, 1864....	615,166	03
	$3,083,124	58

The heavy expenditures since the 1st of October had on the 1st of December reduced this balance of $615,166 to $351,921.

The Three Years Treasury Notes.

Secretary Fessenden gives notice of the readiness of the Treasury Department to redeem on presentation, by payment in lawful money or by conversion into bonds as authorized by law; the Three Years Treasury Notes, bearing interest at a rate of seven and three-tenths per centum, issued under the act of July 17, 1861. Interest will cease on all such Treasury notes after three months from this date, at which time, under the law, the right of conversion ceases. Holders will therefore govern themselves accordingly.

☞ The transfer books of the Milwaukee and Prairie du Chien Railway Company will stand closed from the 16th to 31st Dec. inst., both days inclusive, for the purpose of taking the vote on the question of proposed lease of McGregor Western Railroad, as stated in Circular of the President of 8th of December. None but registered holders can vote.

☞ The Branch Railroad between Three Rivers and Arthabaska, is now finally completed, and is to be run by the Grand Trunk Company, of whose system of railways it forms a part.

Canadian Immigration.

The Department of Agriculture and Statistics at Quebec has completed the returns of immigration into Canada for the year 1864. From them it appears that the arrivals up to the 15th of October were 18,420, being an increase of 417 over the arrivals during the corresponding period of last year. Of this number 1,064 were cabin, and 17,356 steerage passengers. Seventy-seven sailing vessels conveyed 6,985, and thirty-four steamships, 10,585, making one hundred and eleven vessels that arrived with immigrants. The percentage of deaths on the passage was 32. Nearly two-thirds of the entire number remained in Canada. The number assisted to emigrate by charitable societies and private individuals was 960. The number that arrived from England was 681 cabin and 8,846 steerage passengers; from Ireland, 178 cabin and 3,389 steerage; from Scotland, 155 cabin and 2,678 steerage; from Germany, 4 cabin and 2,125 steerage; Norway and Sweden, 46 cabin and 5,198 steerage; and from Belgium (Antwerp,) 118 steerage. The nationalities of the immigrants are thus given: English, 2,681; Irish, 4,599; Germans and Russians, 2,276; Norwegians and Swedes, 5,418; Danes, 120; Belgians, 116; and Americans, colonists, etc., 653.

☞ The Mayor of Providence has vetoed resolutions taxing the Boston and Providence, and Providence and Worcester Railroads for the use of certain streets in that city, and directing that they shall keep the streets in repair, &c. The reason for the veto is that the corporations are already sufficiently taxed upon property held in that city. He says the Boston and Providence Company are now making improvements upon their proprrty in that city at a cost of $30,000, and the Providence and Worcester Company are expending $50,000 in a similar manner.

☞ The following table shows the aggregate of American and English steam tonnage which entered the port of New York from British ports during each year, from 1850 to 1863:

	American.	English.
1850	3,951	48,065
1851	54,785	41,880
1852	63,359	59,554
1853	73,314	31,388
1854	75,302	78,256
1855	66,092	88,650
1856	71,578	39,185
1857	48,649	137,678
1858	38,431	141,903
1859	2,989	183,354
1860	None.	221,724
1861	None.	256,857
1862	None.	231,043
1863	5,923	401,210

☞ The following will show the value of the different descriptions of dry goods imported at New York for the past eleven months:

Manufs. of	1862.	1863.	1864.
Wool	$25,671,200	$27,698,600	$30,952,700
Cotton.....	7.952,900	7,164,000	8,263,500
Silk	10,970,300	14,489,400	15,959,000
Flax.....	6,640,400	9,464,800	11,043,100
Miscellan'ous	2,419,500	3,346,800	3,812,800
Total ...	$52,654,300	$31,883,500	$70,031,100

OFFICE MARIETTA AND CINCINNATI R. R. COMPANY, Chillicothe, O., Dec. 17, 1864.

TO STOCKHOLDERS.—The transfer books of this Company, at the agency in New York and at this office, will be closed from the first to the fifteenth of January proximo inclusive.

31-52 WM. E. WATSON, Secretary.

Travelers Insurance COMPANY,

HARTFORD CT.,

INSURES AGAINST

ACCIDENTS of EVERY DESCRIPTION,

CAPITAL, - - $500,000.

FIVE DOLLARS ANNUAL PREMIUM

Will insure $5,000 against accidental loss of life while traveling by any public conveyance.

TEN DOLLARS PREMIUM

Secures a policy for $5,000 and also $25 per week compensation for personal injury, incapacitating the assured from his ordinary business.

TWENTY-FIVE DOLLARS PREMIUM

Secures a full policy for $5,000 and $25 per week compensation for all and every description of accident, traveling or otherwise.

Policies for $500, with a $3 per week compensation, can be had for $3 per annum, or any other sum between $500 and $5,000 at proportionate rates.

INSURANCE TICKETS

Will soon be on sale at all the Railway Stations covering the passenger with $3000 Insurance in case of fatal accident, and **$60 Per Month** compensation for personal injury—at the rate of 10 cents for 24 hours travel.

JAMES G. BATTERSON, President.

RODNEY DENNIS, Secretary.

HENRY C. MARSHALL, General Ticket Agent.

EDGAR FORMAN, Agent,

161 Fulton St., cor. Broadway, New York.

OFFICE OF THE PITTSBURG, FORT WAYNE AND CHICAGO R. R. COMPANY, PITTSBURG, Dec. 15, 1864.

DIVIDENDS.—The Board of Directors have declared a Dividend of TWO AND A-HALF Per Cent. (free of Government tax) on the Capital Stock, for the quarter ending December 31st inst., and of THREE AND A-HALF Per Cent. (less the Government tax) on the Third Mortgage Bonds, for the six months ending December 31st inst., the latter in anticipation of that due April 1, 1865, both payable on and after January 17, 1865, at the Company's Office in this city, and by the transfer Agents, WINSLOW, LANIER & CO., No. 52 Wall street, New-York, to the holders as registered at the respective offices.

The transfer-books will close on the 21st inst., at 2 o'clock P. M., and will reopen on the 17th day of January thereafter. By order of the Board,

51-52 W. A. BARNES, Secretary.

NOTICE to holders of the remaining unconverted shares of Galena and Chicago Union Railroad Stock: The dividend of Three and One-Half Per Cent., subject to government tax, declared payable on and after the first December, instant, on the Preferred Stock of the Chicago and North Western Railway Company, will also be paid on and after this date at the Company's Office, in New York, or Chicago, to the parties in whose names unconverted shares of the Galena and Chicago Union Railroad Company now stands, upon the presentation of the certificates at either of said offices for the indorsement thereon of the payment of the dividend, such unconverted shares amounting to 3,136, out of 60,284 shares, and much of which is understood to be held in trusts, or by agents, and persons not as yet enabled to convert the same.

By order of the Board of Directors.

JAMES R. YOUNG, Secretary.

New York, Dec. 16, 1864. 51-52

FOR SALE.

20 Platform Cars—4-8½ or 4-10 Gauge.
2 Locomotives 4-8½ Gauge, 24 Tons, 15×20 Cylinder.

American Railroad Journal.

New York, Saturday, December 31, 1864.

The Closing Year.

Our present number marks the close of the year 1864, and of the 37th volume of the AMERICAN RAILROAD JOURNAL. To our long attached and faithful patrons we tender our thanks, assuring them that our future exertions will fully equal those of the preceding years.

We have not found it necessary to resort to any of the usual methods to increase our circulation or advertising, the good sense and obvious interest of the public being our reliance for our success.

The JOURNAL may well claim to have been a useful, if not indispensable agent in the dissemination of the most important and valuable information. While its speciality is railroads, and the arts connected with their construction, maintenance and prosperity, it has embraced many other subjects intimately blended with them, such as finance, commerce and navigation.

The former has swelled to large proportions, from the circumstance that nearly thirteen hundred millions of dollars have been invested in the construction of nearly thirty-five thousand miles of railways, and the latter has derived most of its activity from these internal channels of transportation. In addition to these, our pages have been largely filled with statistical tables of value, so that we venture to say no great work on any subject regarding the wealth, resources or progress of this country can ever be compiled without reference to the columns of the AMERICAN RAILROAD JOURNAL. Neither with regard to finance, railway history, the money market, navigation or useful inventions, can such valuable materials be obtained so fully or so readily elsewhere as in the volumes we have given to the public during the last 33 years. So much for ourselves.

The country during the past year has been visibly emerging from its difficulties. Engaged in a terrific struggle to maintain itself, its union, its institutions, and its principles, it has been most sorely tried. A nation always disposed to peace was dragged into war, and into the worst kind of wars, one between its own citizens, and every drop of blood shed by us in our defence has been accompanied by bitter tears. But a good cause, a patriotic people, and a superintending Providence have carried us thus far through our most serious difficulties, and recent events have assured us that we are near the end of them all.

During this struggle, the very dangers we have encountered have unexpectedly added to our prosperity. Our paper system, a necessity for the hour which we could not escape from, has added largely to the active and immediate means and resources of the people, and thus their products have been largely increased. Debtors have been enabled to clear themselves from their chains, our manufactures have largely advanced, high wages have rewarded labor, which if very severely taxed has had superabundant means of meeting taxation, with the full opportunity of economy notwithstanding, in all the great staples of food, and thus while few have been impoverished in the loyal States by the visitation of war, a very large number have been very prosperous. Invited by this circumstance our immigration has been so largely increased that it is computed the losses in battle have been more than replaced by emigration from Europe.

Nor has our effective commerce been so much injured as has been supposed. The tonnage entering the ports of the United States, has been during the past year 7,511,284 tons, only less by 763,912 tons, than it was in 1860, which was the most prosperous year in this respect the country has ever known.

The manufacturing interests have been very successful, being on the increase, and all of them making large profits for their owners.

Our railways have been used to their utmost capacity and are being extended wherever there is a propriety in their extension, though we must remember that all the great natural lines of communication were early appropriated, and the work of centuries accomplished in a generation. We must therefore look beyond the Mississippi and Missouri for the principal future enlargement of our present system.

Our inventors were never more active or successful. In the construction of ships of war, of ordnance, of labor saving machines, and a vast many useful aids to agricultural industry, we have outstripped all rivals. There is a practical common sense, allied to American ingenuity which makes an American machine the best which can be devised.

In money matters the market has been easy during the whole year. The Government has raised all it wanted without difficulty, and it has paid its interest in gold, several times in advance. Its currency, depreciated as it has been in relation to gold, has been a great assistance to the people, and so popular as to be universally preferred by them to all other kinds. And above all, the unanimity displayed at the recent elections, a sublime spectacle, and viewed as such all over the world, has settled the solidarity of the popular will, and assured all nations of the stability of the institutions in whose favor it was expressed.

We seem thus to stand upon a rock, firm as the everlasting hills, and we have nothing now to do but to pursue our national career; every citizen doing his best for himself and his country, and at the same time kindly and forgivingly to receive back to our friendship those misguided men, who in attempting to injure us have nearly ruined themselves. Let the broad folds of the National flag once more cover us all.

Report of the Secretary of the Interior.

This department of the Government is very well filled by Mr. Usher, and the annual report from his pen is unusually interesting. The following is a synopsis of the most important statements:

Public Lands.

The United States have always possessed one peculiar advantage over all other nations. They were from the first the owners of a vast domain, known as the Public Lands. In other countries whatever of the soil was remaining beyond that owned by individuals, has been generally appropriated by the Sovereign, but with us the people are the real owners of all surplus property. One thousand four hundred millions of acres comprised this property, and of this in spite of the land appropriations from time to time made by Congress to States, Educational and other institutions and Railway companies, there still remain one thousand millions of acres. A population of 10,000,000, each with a farm of 100 acres would absorb the whole. If this land should rise in value to $5 or 10 per acre in the course of 30 years as it has in all the new territories, and as it would, if that population should accrue, we should have five thousand or ten thousand millions of dollars from these lands, and our public debt would be spunged out long before the end of a single generation even without our present direct taxation.

In this view of the subject would it not be wise in Congress to make these remaining lands the basis of a great sinking fund for that purpose? The report makes the following statement:

During the first sixty years of the present century, the average income from sales was two and three quarter millions of dollars per year, and the quantity disposed of by sales, and for military bounties, was about two hundred and five millions of acres.

During the last ten years the income from lands was less than during the preceding decade. This war occasioned by the large quantities of land—granted for internal improvements and for military and other purposes—which have competed, in the market, with the lands of the United States; and more recently, by the passage of the Homestead law, under which large quantities have been entered at nominal rates. The annual receipts from ordinary sales for four years past have been as follows:

For the year ending June 30, 1861...	$884,887 30
" " " " 1862...	125,048 20
" " " " 1863...	136,077 95
" " " " 1864...	678,007 21

The depressing influences of civil war have been felt during the last three years, but the results for that just closed demonstrate a revival of the annual demand for the public lands, particularly for settlement and cultivation.

During the year ending June 30, 1864, public lands have been disposed of as follows:

Acres sold for cash.....	432,773 90
Acres located with military warrants.	515,900 00
" " agricultural scrip.	214,418 14
Acres certified to States for railroad.	857,180 87
Acres taken under the Homestead law.	1,261,592 62
Acres disposed of during the year...	3,281,865 52
During the quarter ending Sept. 30, 1864, the aggregate quantity taken for the same purpose was	939,476 90
Making a total of.....	4,221,342 42

The cash receipts for sales, homestead and location fees for the same five quarters, were $1,019,446 44.

The aggregate quantity of public lands surveyed, but not disposed, was on the 30th September last 133,517,587 acres. This has been the average quantity for several years past. The amount surveyed annually has been about equal to that disposed of annually.

Among the various most recent grants by the Government is that referred too in the following statement:

Under the acts of Congress of July 1, 1862, and July 2, 1864, making grants of land to aid the construction of railroad and telegraph lines to the Pacific coast, the initial point of the main line of railroad from the Missouri river westward has been fixed at Omaha, Nebraska, and the definite location of the road for one hundred miles west from that point has been approved by the President. The route of the Pacific Railroad of California has been selected and a map of the preliminary location thereof, from Sacramento eastward to the great bend of the Truckee River, in Nevada, has been filed in this department. The lands along these routes for twenty-miles, on both sides, have been withdrawn from market, pursuant to the requirements of the act of 1862.

This we think the very best disposition that could have been made of the land referred to. The construction of the Pacific Union Railroad will do more for the Country generally than any other work of similar character, ever projected on this continent.

Mineral Lands.

During the past year additional discoveries of precious metals, particularly of silver, have been made in the region flanking, on eastward, the extended mountain ranges of the Sierra Nevada. A vast belt of some one or two hundred miles in width, and eight or nine hundred in length, embracing portions of Idaho, Nevada and Arizona, is rich in silver ore. Owing to the remote locality of these mines, and the difficulty of transportation thereto, but little machinery well adapted to the rapid and economical reduction of the various ores has been introduced. In that portion of Nevada, through which the Pacific Railroad will pass, many rich veins have been found, and it is estimated by persons familiar with the subject, that, if the mines now opened there were supplied with the proper machinery, they would yield $10,000,000 per month. In the same region vast beds of salt have also been found, which, from its value in the process of separating the silver in the ores, has given a fresh impulse to mining. When we reflect that the region of the country in which deposits of the precious metals abound, includes large portions of three States and six Territories, and that the richest veins of ore heretofore discovered are as yet but slightly developed, whilst new discoveries are constantly made, it will be perceived that the annual product of the mines in the United States must soon reach a magnitude without precedent in the history of mining operations.

The wealth imbedded in the rocks of that extensive region is actually inexhaustible, and it will furnish, in future years, indirectly, a principal part of our means of liquidating the debt contracted by the Government for the overthrow of the great rebellion. As a measure tending to accelerate the reduction of these vast mineral deposits into available wealth, and to strengthen the public credit by an authentic publication of our vast resources, I respectfully recommend that provision be made for the appointment of experienced and skillful mineralogists to make a scientific examition of the principal mining localities, and of the mineral regions generally, and to report the results. Their reports should be printed and widely circulated. An appropriation would be required for those purposes. Much interest has been manifested in favor of the establishment of a bureau of mines and minerals, to which the administration of all details in respect to this important subject should be committed. I am satisfied that such legislation will, before many years, be found necessary, if it has not already become so.

The report recommends a system of taxation in reference to these mines, such as a moderate license fee for working, and a percentage on the products, the whole under the direction of the Bureau of Internal Revenue. One per cent. on the latter it is estimated would produce more than the present income tax. We also think that if the Government would establish mints throughout the mining States and territories, it would be gladly paid several per cent. for the conversion of the gold into coin of convenient denominations. One of the greatest losses sustained by the miners is in the inaccurate assays, and the want of a currency for their daily transactions.

The report suggests some enactments to protect the rights of miners, and to irrigate by dams, &c., the valley of the Colorado River.

Railroads.

There can be doubt that the public resources would be much increased by the immediate working of the mines to the extent of their capacity, and by the settlement of those regions by an enterprising and industrious population, though no direct income should be derived from the sale of the lands. It is, therefore, worthy of consideration, whether it would not be expedient to grant all, or such portions of the lands, as are requisite to insure the construction of the necessary railroads, and the conversion of the sterile lands to a condition of fertility. The benefits resulting from such roads would not be confined to the product of the mines. A new highway, at all times exempt from obstruction by snow, would be open to the Pacific. Passing by the valley of the Rio Grande to El Paso, it would receive a large portion of the rich commerce of Central and Western Mexico. These benefits are so obvious and of such surpassing importance, that I do not hesitate in expressing my earnest conviction that the Government should embrace any suitable opportunity which may be offered to secure the completion of a railroad upon the terms suggested.

It appears from a communication of Gen. Dix, the President of the Union Pacific Railroad Company, that it has, since the adjournment of Congress, expended more than half a million of dollars upon the main line of the road leading westward from Omaha, of which one hundred miles have been permanently located, and forty miles are in process of construction.

The company has surveyed lines to Salt Lake City, through the South Pass, Laramie Plains, Bridger's Pass, by way of Timpanagos and Weber Rivers, to determine the most feasible route. Parties have also been engaged in explorations in Colorado Territory, through Berthold's Pass and up the Cache la Poudre River; and also in examining the topography of the country in the vicinity of the 100th meridian of longitude, and in locating the line from Omaha to Fort Kearney. Considering the limited time which has elapsed since the action of Congress enabled this company to prosecute the work with energy, satisfactory progress has been made, and the country has no reason to apprehend any tardiness in the prosecution of this great enterprise.

The progress made in the construction of the branch road in Kansas, known as the Union Pacific Railroad, Eastern Division, has not met the reasonable expectations of the public. There was just reason to believe that the second section of forty miles of that road would have been rapidly approaching completion, if not actually completed by this time; instead of which, forty miles only of the track are laid, and that not yet in a condition to be examined by the Commissioners appointed by the President to inspect and report upon the work.

For this unexpected state of affairs the company is not altogether without excuse. The assassination of its contractor in July last, soon after the adjournment of Congress, the continued insurmountable difficulties of obtaining the necessary

materials, either by river or rail, from causes known to all, prevented them for a time from prosecuting the work. Since these difficulties have been partially removed, a commendable energy has marked the conduct of the company. The first section of the road to Lawrence, to which place the track is laid, will undoubtedly be open to the public and in use within a few days. The company in California is also making satisfactory progress with its portion of the road.

The President has appointed George Ashmun of Massachusetts, Springer Harbaugh of Pennsylvania, Charles T. Sherman of Ohio, Jesse L. Williams of Indiana, and Timothy J. Carter of Illinois, to be Directors, on the part of the United States, in the Union Pacific Railroad Company, and these gentlemen have accepted the appointment. The wisdom of Congress in providing for the appointment of such officers cannot be doubted.

Being impressed with the conviction of the importance of securing the interest of the Government in the roads connecting with the main line, and the faithful compliance by the companies constructing them, with the terms and conditions upon which they are entitled to the munificent bounties offered by Congress, I should not hesitate to recommend, if it were deemed practicable, that such directors should be *ex officio* members of the board or other governing authority of each of such companies. I submit this subject to the consideration of Congress, with the hope that some means will be devised, by which a supervisory control over the action of such companies may, within proper limits, be conferred upon the directors on the part of the United States.

INDIANS.

The report contains some excellent suggestions in relation to the Indians, as to treaties in regard to their lands, and their removal from them. They are not, however, of sufficient interest to induce us to republish them.

PENSIONS.

As we gave in our issue of last week an abstract of the condition of the pension fund it is not necessary to allude to it again in this place.

The remainder of the report is occupied with the subjects of the patent office, showing the inventive character of our people, the census, the bureau of statistics, the New York Courts, and the slave trade.

We quote that portion what relates to the

PATENT OFFICE.

The business operations of the Patent Office for the year ending Sept. 30, last, have been very satisfactory. During the period above named, 6,740 applications for patents and 989 caveats were filed; 29 applications also were made for the extension of patents previously granted. During the same period 4,843 patents, including reissues and designs, were issued, and 40 extensions granted. The number of applications awaiting the payment of the final fee required by law before patents can be issued has largely increased, numbering now over 1,000. The finances of the office are in a prosperous condition, as appears by the following short statement:

The balance in the Treasury to the credit of the patent fund on Oct. 1, 1863, was $37,732 63. The receipts of the office to Sept. 30, 1864, amounted to $230,838 60, making a sum total of $268,571 23. The expenditures during the same period were $212,453 84, leaving a balance of $56,117 39 on hand Oct. 1, 1864, being $18,384 76 more than the balance as exhibited on Oct. 1, 1863.

The document gives a clear idea of the immense responsibilities and important duties of the department.

☞ At a special meeting of the stockholders of the Boston, Hartford and Erie Railroad Company, it was voted to consolidate with the New York and Boston (Air Line) Railroad.

Michigan Central Railroad.

The financial condition of this company, on the first of December, 1864, is exhibited in the following report:

INCOME ACCOUNT.

July 1, 1864.—To Div. of 6 per cent, and div. of 6 per cent. extra with government tax	$797,773 00
Nov. 30.—U. S. tax on former div's.	54 60
" " surplus.	10,256 00
" " pass. & rec'ts.	44,306 86
Annual payments towards S. F's	84,500 00
Operating account, exclusive of interest and exchange, from June 1, 1864, to Dec. 1, 1864	1,189,183 80
Interest and exchange account, from June 1, 1864, to Dec. 1, 1864	330,608 62
Balance to new account	600,834 66
	$3,057,517 54
June 1 1864.—By balance of Income Account, per Treasurer's Report	$1,002,894 06
Nov. 30.—Receipts of Road, from June 1, 1864, to Dec. 1, 1864	2,054,623 48
	$3,057,517 54

The foregoing account shows the net receipts of the road for six months ending 1st inst., after deducting operating, interest, and exchange accounts, but excluding the amount paid to the Sinking Funds, to be $480,213 60. After deducting the amount paid to Sinking Funds, the balance is $395,713 60. Adding the balance to credit of this account, June 1st, $1,002,894 06 less the July dividend, $797,773, the amount to credit of Income Account is $600,834 66.

The Income Account, as here stated, does not include a large amount due from the U. S. Government for transportation during the last six months.

The Operating Expenses include over $70,000, paid on account of the new Grain House in Detroit, and some other expenditures of a permanent character.

The Company is free from floating debt.

The sum invested in the Sinking Funds amounts to $693,721 42.

The balance of Income Account, 1st Dec., as per above Report	$600,834 66
Deduct amount of dividend payable-able Jan. 3, 1865, including Government Tax	398,886 00
Leaves a balance to Income Acc't of.	$201,948 66

Western Maryland Railroad.--Its Extension to Cumberland.

We learn that on the 9th inst. a corps of engineers, under the direction of W. W. Taylor, Esq., the Engineer of the Western Maryland Railroad Company, completed the alignment of the route for the extension of the Western Maryland Road from Hagerstown to Cumberland. The construction of this road would be a great public benefit, and we see nothing to prevent it. The great commercial interests of Chicago, Pittsburg and the Northwest, in conjunction with the coal trade of Western Maryland, and especially the commercial interests of Baltimore, and the interests of all property-holders in Baltimore, all conspire to urge the prompt completion of the work from Hagerstown to Cumberland.

We understand that the length of the road by the recent survey is 79 miles, and that the grades are moderate, and can be reduced still lower. The line is entirely on Maryland soil, but will not only promote the interests of Maryland citizens, but equally reward the interests of New York and other capitalists who are largely concerned in the coal trade of Alleghany county, as well as the great commercial interests of our enterprising sister city of Pittsburg. But above and beyond all, the Pittsburg, Fort Wayne and Chicago Railroad Company are deeply and directly interested in this enterprise, which a connection with the Pittsburg and Connellsville Railroad will place Chicago in direct daily communication with Baltimore and Washington city. A combination of these interests would soon render this enterprise an accomplished fact.—*Cumberland Civilian.*

Finances of Pennsylvania.

The receipts and disbursements of the State Treasury, as given in the recent report of the Auditor General are as follows:

Balance Nov. 30, 1863	$2,147,331 70
Receipts from Dec. 1 1863, to Nov. 30, 1864	4,733,313 02
Total	$6,880,644 72
Disbursements	4,938,441 09
Balance Dec. 1, 1864	$1,942,203 63

Included in the expenses of 1864 were considerably over one million of dollars for military defense and for repelling the rebel raiders on the border, for which, it is presumed, the State will ultimately be indemnified by the National Government.

The New Point Bridge.

We understand that all the preliminary arrangements for the erection of this important structure have been completed, and there seems little doubt even that the work will be commenced at an early day. It has been decided, after due consideration of the subject, to build the structure of iron, on what is known as the lattice style, and as our fellow-townsman, MR. SCHULTZ, one of the most experienced bridge-builders in the country has the contract for the job, the work will no doubt be carefully and expeditiously executed. The erection of this bridge will prove a great convenience to those living across the river, while the immense traffic which must pass over it will render the stock a safe and highly profitable investment. It is a most important undertaking in all respects, and we wish it every success.—*Pittsburg Chronicle*

St. Stephen's Branch R. R.

This road connecting St. Stephens with Lawrence on the line of the St. Andrews and Quebec railroad, distance 19 miles, is to be commenced immediately. The contract has been made with Lawrence M. Myers, Esq., who has been connected for several years in the construction of roads in this and other states. The whole line is to be built, including the laying of the track, and ready for running by 1st of December next. The Calais Advertiser says the conditions are that he is to commence operations before the first of January, 1865, and expend in labor on said road by the first day of July, one hundred thousand dollars; then the Trustees agree to give him up the Charter of the road, government grant, &c. If he fails to fulfill his part of the agreement, that ends the matter and the present Company stands as it did before such agreement was entered into.—*Portland Press.*

The New Castle and Franklin Railroad.

At a recent meeting of the directors of the New Castle and Franklin railroad, it was determined that a subscription of $300,000 to the capital stock was necessary to build that portion of the road lying between New Castle and Brownsville, and that there should be no further expenditure of money until that amount of stock should be subscribed. This determination of the directors is an evidence that they intend acting in good faith with the stockholders of the company. If the amount of stock should be subscribed, it will be a sufficient basis for the issue of bonds with which to build the road, and will justify the directors to put the line under contract at once.—*Pittsburg Chronicle.*

Union Pacific Railroad.

St. Louis, Dec. 24, 1864.—The formal opening of the Union Pacific Railroad, from Kansas City to Lawrence, Kansas, took place on Monday and Wednesday. Daily trains are now running between the points named.

American Railroad Journal.

Saturday, December 31, 1864.

Stock Exchange and Money Market.

The gold barometer the last week gave tokens of great disturbance. On Monday it marked 208 a very considerable decline from its previous range. On Tuesday, however, it went up about 9 per cent., and the reason given for the advance was that Hardee had escaped from Savannah with 15,000 men. Political economists would be apt to receive this explanation with some grains of allowance. Perhaps they would rather believe that the shorts were temporary sufferers, and had to pay any price that was demanded of them. A cotemporary suggests that the 25,000 or 33,000 bales of cotton captured at Savannah, should be immediately shipped to Liverpool, turned into gold, and in this form be returned to the United States. We think this a feasible proposition and a good one. We know that while Mr. Chase was Secretary of the Treasury, by an error in a telegram, a much larger amount of specie was remitted to England from San Francisco than was ordered to be sent there; he was advised to bring it back to the United States by a direct remittance. The only objection he made to the proposition was that it would have to come back in a British steamer, which, with all due respect, was no reason at all. If it had come over to the extent of about four millions as it might have done, it would have helped gold a good way on its fall at a time when such a result would have been extensively beneficial.

So at the present time the same result might be obtained by the sale of the Savannah cotton abroad. For the cotton speculators in England, as we see by the last advices, have renewed their operations in this staple to a great extent, about $130,000,000 being now invested in the hope of a further rise, founded on an entire misconception of the result of the late Presidential election. They argue because Mr. Lincoln was re-elected, the war will last for many years longer, especially for two reasons, viz.: that he will designedly protract the war for the benefit of his party, and next because the confederates more exasperated than ever will hold out more vigorously. Therefore the supply of cotton will still be on the smallest scale from the Southern States. Now in these opinions, time and not a long time either, will show they have been entirely mistaken. The result will in all respects be quite the reverse. The event alluded to, gave new power to our policy, invigorated our army, and has conduced to its triumphs. These latter assure us that ere long, the whole of the cotton held in the South will be liberated and in market, and we may count, that as much as one year's crop will find its way into the hands of both foreign and domestic manufacturers. The English prints estimate that a decline of one half of the present price abroad, which advanced 30 per cent upon the calculation already alluded to, would produce a loss of upwards of sixty millions of dollars to the present holders of the stock in hand and contracted for in India and Egypt.

If Mr. Fessenden would therefore place the captured cotton at Savannah in the foreign market and bring home to the Treasury the proceeds in gold which it is estimated at present prices would be nearly six millions of dollars, it would be an operation that would be equal to a great victory. It would hit the right people both in England and New York, and make an immense difference in our currency, and money market.

We learn that several of the associated Banks of this city have wisely, even if reluctantly, determined to come into the National system. Among them are the Park Bank, the Mercantile, Broadway Bank and Bank of the Republic. Sooner or later they will all adopt this measure as they lose nothing by it, but gain a great deal. The total amount of National Bank currency is at the present moment about $74,000,000 equal to half we believe of the other bank circulation afloat. It must eventually supersede all other kinds because it approaches nearest a national currency, and is at par every where from its character and availability.

With regard to the National finances we can

not learn what policy is yet decided upon by the Secretary of the Treasury. We are informed that he has issued a circular announcing that the subscriptions to the 10-40s which are now quoted at 102 will be suspended on the last day of the present month. What is to be the alternative loan for the public remains to be seen. The coupon 6s of 1881 stand well in the market, selling at 116; the registered 6s of 1881 have advanced to 111, the 7-30s to 120, and the 5-20s to 108. All this speaks well for Government securities, which as the war approaches its close, must go up to a high figure.

We believe it is the true policy of the Government to stop the further issue of gold bearing interest bonds, not because we think we shall fall short in the receipts at the Customs for that purpose, but because the negotiation of future currency loans will be rendered so much easier.

The present gold bonds will then probably rise to 150, just as the California and other gold bonds have risen, and will be too dear for ordinary investors. Currency 7 per cent bonds will then be the best and cheapest investments remaining, and will be absorbed as fast as they are offered to the public.

The Money Market is easy, easier than usual at this season of the year, but the rate keeps up. There are so many speculative operations afloat with the promise of large profits, that both capital and credit are liberally used to "await the triumph and partake the gale."

It is asserted by those who have access to the proper channels of information, that the *increase* in the amount of gold received for duties beyond that of 1863, in New York up to the 24th inst., will be $9,000,000, and it is *stated* that the whole receipts for the year will be $80,000,000, which will be about $20,000,000 more than the whole of the present charge for interest payable in gold. Such is the accumulation of capital owing to the large outlays of the Government, and so evidently near its termination is the rebellion, we believe that loans with the interest payable in paper would be readily and freely taken, for everybody must see that the war over and our expenditure cut down to the peace standard, a Government paper dollar will soon be the same as one in gold, and the public will neither know nor see any difference. This is the certain tendency of things when peace returns. The quotations for all Government stocks will then be regulated by the amounts of interest payable, rather than their form. Mr. Chase always contended, and in a recent speech reasserted that he never forgot the idea of an early resumption of specie payments, and never doubted his ability to secure this object with very short preparation. The revenue is turning out so much larger than was even hoped for, that one year's income if it could be applied to the redemption of the outstanding legal tenders, would enable the Treasury to retire them in a single year, if it could be relieved from the necessity of further loans.

A cotemporary publishes a plan of substituting taxes on sales instead of the many which now produce the revenue. The proposition is to make the collection by means of stamps of various denominations affixed to each invoice or bill of goods or personal property every time a sale occurs. The amount of transfers of property of this nature is thousands of millions every year, and it is supposed the revenue from this source alone would be $700,000,000 per annum.

This is a startling assertion but has foundation. Our readers will remember that we have for a long time recommended the principle, though we have not attempted to put it in a practical form. Every one who buys or sells does so in the expectation of an advantage and a profit. Every ordinary transaction of this kind is voluntary, and the stamp would never hinder the ratification of a bargain any more than it does now. There is a good deal of force therefore in the proposition referred to. If the necessary revenue could be obtained in this way we should get rid of many of our present annoyances in the shape of taxation, which though we loyally submit to and are willing to bear, are yet a great annoyance.

Railway shares and securities are dull but firm. The changes in rates are given in our usual tables.

The balance in the Sub-Treasury on Tuesday was $22,668,270.

The aggregate value of the imports of general merchandise, other than dry goods and specie, at this port for the week ending December 27, was $1,636,390 against $2,916,434 in 1863, and $1,667,936 in 1862.

The exports from New York for the week ending December 27, were $1,619,706 against $3,424,351 in 1863, and $2,951,636 in 1862. The shipments of specie since January 1, have been $49,080,000. The exports since January 1, have been $209,751,386 against $169,324,807, in 1863, an increase of $40,426,578. The customs gold revenue at New York, specially pledged to the payment of the interest on the funded and fundable debt of the United States from January 1 to December 24, was $66,520,935.

The value of foreign goods imported into the port of Boston for the week ending December 23, were $147,428, against $318,872 for the corresponding week in 1863. The exports were $522,331 16, against $358,939 42 for the corresponding week in 1863.

The foreign exports from the port of Baltimore during the past week were valued at $39,467.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Central Pacific Railroad.

San Francisco, Dec. 22.—The report of the Central Pacific Railroad, (the California end of the Pacific Railroad,) shows the earnings of the thirty-one miles of the road for the seven months it has been in operation to be one hundred and three thousand dollars in gold, of which forty-eight thousand dollars in gold was net profit. The road is graded twelve miles further into the mountains.

New Castle and Franklin Railroad.

A meeting of the stockholders of this company will be held at Newcastle, Pa., on the 9th of January next for the purpose of electing directors, etc.

Finances of Albany.

The receipts and disbursements at the office of the City Chamberlain for the fiscal year ending November 1, 1864, were:

Balance from previous year	$103,600 22
Receipts from November 1, 1863, to Nov. 1, 1864	759,936 82
Total	$863,537 04
Disbursements	796,981 34
Balance Nov. 1, 1864	$66,555 70

Delaware and Hudson Canal Company.

There will be apportioned among the stockholders of this company, on the 12th of January next, 12,500 shares of new stock in the ratio of one share to every seven shares of stock then held by each; certificates of stock so apportioned will be ready for delivery on and after the first day of January, (the same day on which the usual cash dividend will be paid.) No scrip will be issued for fractions of a share, but the number of shares representing the aggregate of such fractions will be sold at public auction on the 26th of January, and the net proceeds paid to the stockholders on and after the 1st of February next, according to their respective interests. The Government tax on the above mentioned apportionment will be paid by the company.

Cedar Falls and Minnesota Railroad

The first regular train over the Cedar Falls and Minnesota railroad was run on the 1st of December. Great credit is due the officers of the road for the energy displayed in pushing forward the work.

The Albany Bridge.

Hon. John A. Griswold gives notice to the opponents of the Albany Bridge that the Congressional Committee, to whom the subject has been referred, will hear parties, *pro* and *con.*, on Friday, January 6th.

Northern Central Railway.

The work of laying the second track on this line is progressing rapidly. The rails will, it is said, all be down within a short time, when there will be a double track from Baltimore to Sunbury.

New England Mutual Life Insurance Co.

The annual meeting of this company was held in Boston on the 21st inst. The following gentlemen were elected directors for the ensuing year, viz: Willard Phillips, Thos. A. Dexter, Marshall P. Wilder, Sewell Tappan, Wm. B. Reynolds, Geo. H. Folger, Francis C. Lowell, James S. Amory, Charles Hubbard, Homer Bartlett, Benj. F. Stevens. Mr. Stevens, Vice President of the Company, was elected in place of the late Charles P. Curtis, Esq. The report of the directors exhibits a highly satisfactory condition of affairs.

☞ The Boston and Worcester Railroad Company propose to construct a road from their present location in Albany street, across Fort Point Channel and over the South Boston flats to deep water, and to construct and use wharves on said flats, under such provisions as the General Court shall deem proper; and authority for the said extension will be asked at the coming session of the Legislature.

☞ The receipts into the treasury of Wisconsin last year amount to $2,550,648; expenditures, $2,443,027. The whole amount of State indebtedness is $2,150,000.

Railways in England.

We learn that the question is being agitated pretty freely in England, of the Government's taking possession of all the railways in that country under an act of Parliament which had been almost lost sight of.

In 1844 an act of Parliament was passed entitling the Government to take possession of every railway, branch or section of a line thereafter constructed, upon giving 25 years purchase of the divisible profits, in no case to exceed 10 per cent. It is thought that by this measure fares can be largely reduced, and that the example of the Belgian railways worked by the Government with great economy and success may be safely followed.

The Lake Tunnel.

The work on the tunnel under Lake Michigan, at Chicago, is said to be progressing at the rate of twelve feet per day. Eleven hundred and thirty feet are already finished. In the course of the mining many curious kinds of earth and stone have been discovered, which are being collected and placed in a cabinet. A Chicago paper says: "Petroleum has been found in large quantities, and several stones from which the oil issued freely were exhibited to the visitors. Sulphate of iron has also been discovered in many places. At present there is nothing taken out but a sort of blue clay that is very much of the consistency of beeswax. It becomes very hard as soon as exposed to the air, and has proved to be a most excellent substance for grading."

Wealth and Resources of Maine.

This State is the tangent of the Union, and touches the British provinces at the extreme North Eastern point of our States. Its boundary line was for a long time disputed by the British Government, and was at one time referred to the King of the Netherlands for his adjustment and decision. This decision made in 1831 was unsatisfactory to all parties, and the difficulty which at times assumed a serious aspect was not settled until 1842 by the Ashburton treaty. Perhaps no negotiation was ever attended from first to last with so many curious incidents. Some of these were made the subject of an address in this city by the late Daniel Webster.

The neighboring province of New Brunswick affords a good opportunity of contrasting in some particulars the progress made by a free state and a foreign possession.

Maine contains 31,766 square miles or about 20,330,240 acres very nearly of the same size as New Brunswick. It was originally a part of Massachusetts, and was admitted into the Union in 1820. In 1860 its population was 628,279 having almost doubled in ten years. It contains eleven principal cities and towns of which the most flourishing and populous are Portland and Bangor, the former containing 26,341 inhabitants, and the latter 16,407. Biddeford is the next in rank having a population of about 10,000. The others vary from 3,500 to 9,000.

The improved land consists of 2,677,216 acres, and the unimproved 3,023,539 acres.

The value of the improved is $78,690,725, and of the implements of husbandry used in their cultivation $3,289,327.

The live stock is as follows: 60,638 horses, 104 asses and mules, 147,315 milch cows, 79,792

working oxen, 149,827 other cattle, 452,472 sheep, 54,783 swine.

The animal products were butter 11,687,781 lbs., cheese 1,799,862 lbs., wool 1,495,073 lbs., animals slaughtered, in value $2,780,179, and wax and honey 323,454 lbs.

The cereal crops were as follows: wheat 253,877 bushels, rye 123,290 bushels, Indian corn 1,546,071 bushels, oats 2,988,939 barley 802,109 bushels, buckwheat 339,520 bushels.

The commercial crops were, Tobacco only 1,583 lbs., hops 102,987 lbs., hemp 50 tons, flax 2,997 lbs.

The miscellaneous crops were as follows:

Peas and beans bushels	246,918
Irish potatoes "	6,374,617
Sweet " "	1,435
Wine gallons	3,165
Hay tons	975,716
Clover seed bushels	48,851
Grass seed "	6,307
Flax seed "	489
Maple sugar lbs	306,742
" molasses	
Sorghum "	
Silk cocoons	73

The value of the orchard products was $501,767, of market gardens $194,006, and of home made manufactures $490,787.

The manufacturing establishments are 3,582 in number with a capital of $22,000,000 using annually raw material of the value of $20,861,452 employing about 40,000 operatives, and turning out fabrics of the value of $36,075,498. The following table gives the value of the principal articles of production. At the head of them all stands

Lumber	$6,784,981
Cotton goods	6,636,623
Leather	2,011,034
Wool and mixed goods	1,674,800
Boots and shoes	1,661,915
Clothing	1,632,946
Flour and meal	1,576,863
Fish	1,050,755
Steam engines and machinery	681,295
Agricultural implements	339,180
Iron castings	429,896
Iron bar and rolled (5,300 tons)	332,000
Printing	294,937
Furniture	286,584
Illuminating gas	148,852
Spirits (452,000 gallons)	142,500
Malt liquors (7,230 bbls.)	36,169
Soap and candles	53,637
Jewelry, silverware	34,240
Musical instruments	32,850

The total value of the exports and imports in 1860 was $5,375,630. The total movement of tonnage the same year was 510,000 tons. The total tonnage owned in the State, much of it employed elsewhere is 801,941 tons. The Railways in 1863 were 509 miles in extent, and their cost of construction was $17,788,316. They are 14 in number and the longest is the Atlantic and St. Lawrence 78 miles, being a part of the trunk line to Quebec, Montreal.

The artifical navigation works consist of the Cumberland and Oxford Canal from Portland to Sebago pond 20 miles, and an improvement in the Saco river which gives it boat navigation for 30 miles.

The public debt of the State in 1860 was $1,162,727.

The surface of the Country is elevated and mountainous. The lands on the Kennebec and St. Johns are very fertile. The forests are extensive and valuable, the coast is indented with good harbors, its quarries furnish large quantities of the best granite, its rivers salmon in abundance, and its sea fisheries are very lucrative.

The neighboring province of New Brunswick is also very flourishing, having as large a commerce but not so much population. The soil is also represented as being generally fertile, the river St. John is one of great importance, heading in the State of Maine and affording an outlet to both countries for large amounts of lumber. Through the effect of the Reciprocity treaty both are doing well, and though the lumber trade of both was at one time over done from speculation, it is now carried on with great regularity and success.

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending Dec. 23, 1864, was as follows:

Passengers	$20,096 38
Freight and live stock	38,718 70
Mails and sundries	5,230 42
Total	$64,045 50
Corresponding week of 1863	57,712 15
Increase	$6,333 35

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Dec. 14, 1864, were:

	1864.	1863.
Passengers	$2,278 84	$2,137 28
Freight	5,540 44	6,647 70
Express	104 16	104 16
Mails	296 58	296 58
Total	$8,220 02	$9,185 67

Receipts from January 1st to Dec. 14:

1864	$558,228 17
1863	397,567 15
Increase	$160,661 02

The earnings of the Marietta and Cincinnati Railroad for the 2d week in December:

	1864.	1863.
Passengers	$8,095 08	$4,303 40
Freight	13,157 71	11,676 70
Mail, express & telegraph	1,079 58	907 00
Total	$22,332 37	$16,887 10
Total since Jan. 1	$966,538 33	$674,444 66

The earnings of the Grand Trunk Railway for the week ending Dec. 17, 1864, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$34,309 00
Express, freight, mails and sundries	3,124 00
Freight and live stock	75,865 00
Total	$113,298 00
Corresponding week, 1863	111,967 00
Increase	$1,331 00

The earnings of the Cleveland and Toledo Railroad for the 3d week in Dec. were $48,707 00
Corresponding week of previous year.. 40,643 00
Increase $8,004 00

The earnings of the Toledo and Wabash Railroad Company for the third week of December, 1864, were $50,900 00
Corresponding week of previous year. 17,869 00
Increase $33,031 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the 3d week of December, 1864, were $92,639 00
Corresponding week of previous year. 71,373 00
Increase $21,266 00

The earnings of the Michigan Central Railroad for the 3d week in Dec., 1864 $86,240 00
Corresponding week of previous year.. 59,632 95
Increase $27,807 05

The earnings of the Chicago and Rock Island Railroad for the 3d week in December, 1864, were $88,572 00
Corresponding week of previous year.. 46,905 00
Increase $41,667 00

The following is a comparative statement of the earnings of the Chicago and Northwestern Railway for the 3d week of Dec., were $131,756 00
Corresponding week of 1863 79,993 00
Increase $51,761 00

The Railway Crossings.--Highway.--Negligence.

The recent case of the Manchester, South Junction and Attrincham Railway Company, appellants, and Fullarton, respondent, was an action brought by James Alexander Fullarton, the plaintiff below, against the Manchester, South Junction and Attrincham Railway Company to recover damages for alleged negligence and misconduct of their servants, in discharging steam through the mud-cocks of one of the engines on their line; in consequence whereof the plaintiff's horses took fright, ran away with and broke the carriage to which they were harnessed, and injured themselves.

At the hearing before the judge of the County Court of Lancashire, holden at Manchester, England, on the 1st of January last, the following facts were proved:

Close to the Attrincham station the defendants' line of railway crosses on the level a turnpike road leading from Attrincham to Timperley and Stockport, on which there is a considerable traffic. At the crossing there are, as usual, gates, which, when any train or engine is approaching, are closed across the road on each side of the line. These gates are in charge of the railway company's servants.

On the 7th of September, 1862, a train arrived at the Attrincham station at 1.30 P. M., on its way from Bowden to Manchester. This train drew up alongside the platform, to enable passengers to alight and get in, and being rather long the engine was obliged to draw up a little beyond the end of the platform, and in fact just on the level crossing.

Before the train arrived, the gates between the level crossing and the road had been closed, and they remained closed till the train left.

At the time that the train was alongside the platform and the engine in the position described, the plaintiff's carriage, which was drawn by two thoroughbred and spirited horses, was on the turnpike road on the Timperley side of the line, about twenty-five to thirty yards from the crossing, waiting to pass when the gates should be opened. The reason of the carriage being so near the crossing was, that the gates having been open previously to allow a cab to cross the line, they, just as the plaintiff's carriage was about to cross, were suddenly closed in consequence of the coming up of the above train.

The plaintiff's horses had often traversed the road in question, and been near the crossing when trains and engines were about without being frightened.

On the way from Bowden to Attrincham, the

engine driver of the train alluded to had been blowing off the water made by the condensed steam and left in the cylinders of the engine, through the mud-cocks in front of the engine. As he entered the station and passed along the platform he discontinued to do this, and whilst the engine was standing on the level crossing during the time the passengers were getting in and out of the train, the steam was not being blown through the mud-cocks. Immediately on the train proceeding to start on its way to Manchester, and whilst the engine was still on the level crossing, the driver whistled, and again commenced blowing off at the mud-cocks. The steam rushing out of the taps in front of the engine made a loud hissing noise, and raised a cloud of steam, which not merely enveloped the forepart of the engine, but extended itself also through the gates on the side towards the plaintiff's carriage and horses.

It was proved, that as soon as the whistle was heard, the plaintiff's horses began to prance, the coachman, however, having them well in hand; but that the moment the mud-cocks were opened, and the cloud of steam ejected, the horses turned right round and went with great force and violence against a wall at the side of the road. The horses were much cut, the pole of the carriage broken, and damage done to the extent afterwards awarded.

The learned judge was satisfied, upon the proof, that although it is necessary occasionally to relieve the cylinder by blowing off from the mud-cocks, it is quite unnecessary and unusual to do so in passing through this station or level crossing.

It was proved also that the hissing noise and cloud of steam above alluded to are the necessary consequence of blowing off at the mud-cocks, as was well known to the servants of the company in charge of the engine at the time. It was also proved, that at the time this was done, the company's servants in charge of the engine had seen and were aware of the plaintiff's carriage, and horses being where they were at the time, they having made a remark to that effect to a person at the station. It was proved also that the same coachman had driven the same horses for upwards of a year in the plaintiff's carriage without any accident.

The learned judge was satisfied upon the evidence that there was no fault in the plaintiff's coachman either in being where he was at the time or in the way he managed his horses. He was also satisfied upon the evidence, that the accident was altogether caused by the blowing off the mud-cocks at the level crossing.

He came to the conclusion that this, under the circumstances, was negligence on the part of the company through their servants. And he ruled, that at a level crossing like this, where there is considerable traffic, and where horses, carriages, and carts are continually passing, the company are bound to use reasonable care in the management of their trains and engines; and he found that under the circumstances they had not done so.

The counsel for the defendants objected, that there was no evidence of negligence on the part of the company's servants; and that if there were any negligence, it was not such as under the circumstances of the case would in law render the defendants liable.

The learned judge overruled the objections, and found a verdict for the plaintiff with £40 damages.

Erle, C. J.—Mr. Jones (counsel for the appellants,) has failed to convince me that the county court judge, in finding that there was evidence of negligence on the part of the servants of the company, came to a wrong conclusion. It appears that the plaintiff's horses were using the road as of right, and that the company were also as of right exercising the power given them by their act of crossing the highway; and if there had been nothing to show that they were not exercising their rights in the ordinary way and with due and reasonable care, the company undoubtedly would not be liable for the misfortune which has happened. But I am of opinion, that the evidence abundantly shows that the company by their servants exercised their right of crossing the highway in an inconvenient and improper manner. Whilst near the gate which separates the railway from the road, the driver blew off the steam from the mud-cocks in front of the engine, so that the plaintiff's horses became enveloped therein and frightened, and so became unmanageable. It is clear that the company have not used their railway with that attention to the rights, and the safety of the Queen's subjects which under the circumstances they were bound to exercise. The decision of the learned judge must therefore be affirmed.

The rest of the Court concurring.

Appeal dismissed, with costs.

Practical Information for Emigrants.

The advantages offered to immigrants from Europe to the United States are without a parallel. The following letter from the new and flouring State of Minnesota explains in a simple manner how these advantages may be realised:

By the Homestead act of Congress, any person, the head of a family, male or female, can select any Government land not exceeding one hundred and sixty acres. This is secured to them at the Land Office in that District, by paying three dollars for the entry and papers. They then make their improvements, and establish themselves for a home, which they must occupy for five years, in good faith, when, by paying ten dollars more, they receive a patent from Government. This is their homestead. No creditor can touch it at any time; and if a man is economical and industrious, prosperity must follow. Now, why not make this fact known in your cities, and by this means induce your charitable societies to assist hundreds of families to come here, and be healthy and happy, where they are sure of support and a good livelihood, instead of being dependent upon the good will of those who are already perplexed to find the means of assisting all that are dependent upon them for daily bread? Why not originate Homestead Aid Societies in all our large cities, for the purpose of assisting all who desire it to come to the West and make homes, where health, wealth and happiness must follow? The same could act in conjunction with societies here.

Our educational system, supported by the liberal land grants of Congress, insures for every child in our State a liberal education, and religious instruction goes hand in hand with the school.

Manufactories of all kinds are springinig into existence on our unsurpassed water-powers. Railroads are rapidly being built, and the great overland telegraph to Europe will undoubtedly be completed through our State to Pembina next season, the wire from that point to Fort Garry has already been delivered.

To capitalists we offer great inducements in our advantages for wool raising, our immense water powers, and in our railroads. The roads now in operation—particularly the St. Paul and Pacific—have just put into the market some sixty thousand acres of the land granted them by Congress, which is mostly located in old established counties through which the road passes, and a branch is being built. These lands are offered on the very best of terms to the actual settler, while to any one desiring to invest they present excellent inducements. The increase in value must be permanent, as all wild speculation has totally disappeared, and we are now moderately moving in a healthy pace of prosperity.

☞ The Carleton (N. B.) *Sentinel* says that Mr. Buck is now rapidly progressing with the survey of the Wolhaupter route for the Branch Railway. It appears that he has received orders to make a survey of the Fish Creek route, which it appears presents facilities for continuation beyond Woodstock to Canada.

Delaware and Hudson Canal Co.

The amount of coal mined and forward upon the railroad of this company for the year ending December 13, 1864, was 886,841 07 tons, against 827,557 18 tons in 1863—an increase of 59,283 09 tons.

☞ The Carlisle, Pa., *Democrat*, says that the "Pine Grove estate," situated in Cumberland county, Pa., was sold on the 26th ult., to the South Mountain Iron Company, for the sum of $1,500,000. The revenue stamps on the deed amounted to $1,500.

☞ The Pottsville *Miners' Journal* of December 24th says: "Among the many changes that have and are about taking place in the Coal Trade of this County, we learn that Messrs. Heckscher & Co., who have so long been engaged in Coal Operations are about to discontinue their business, and that their several collieries will be worked after the first of January, by the New York and Schuylkill Coal Company, (formerly the Forest Improvement Company,) proprietors of the extensive tract of Coal lands formerly owned by the Coster family of New York. Among those who are interested in this Company, Moses Taylor, Charles A. Heckscher and John J. Phelphs, are prominent."

☞ It is stated that the Eastern Railroad Company are having their coal-burning locomotives changed to burn wood, and that the same course is being adopted by the Boston and Maine Railroad Company.

☞ The earnings of the New York Canals during the season just closed were $4,346,265 52; and the expenditures $1,028,909 46—leaving a balance of $3,317,356 06. The earnings are about one million dollars less than last year.

☞ It is reported that a contract has been made to build the Air Line Railroad between Woonsocket and New Haven, and that the work will soon be commenced between Pascoag and Woonsocket.

Maryland Coal Trade.

During the present year 258,430 tons of coal have been shipped from Cumberland over the Chesapeake and Ohio Canal, against 225,366 tons in the previous year. The number of boats cleared in 1864 was 2,363, and in 1863 the number was 2,065. The canal is now closed by ice, and navigation has ceased for the season.

Interest and Dividends.

The Panama Railroad Company have declared a dividend of 4 per cent. out of the earnings of the road for the three months ending 31st inst., and 1 per cent. out of the earnings of Steamers, Sailing Vessels, &c., payable on the 5th of January next.

The Fitchburg Railroad Company has declared a dividend of $4 per share, free of Government tax, payable Jan. 2.

The Rome and WatertoUn road will pay, 16th of January, at the Mercantile Bank, a dividend of 5 per cent. and the government tax.

The Eastern Railroad Company has declared a dividend of 3 per cent., free of Government tax, payable Jan. 2.

The Eastern Railroad Company (in New Hampshire) has declared a dividend of 3 per cent. payable Jan. 2.

The Hartford and New Haven Railroad Company have declared a quarterly dividend of $3 per share.

The coupons on the bonds of the Evansville and Crawfordsville Railroad Company, due January 1, 1865, will be paid at the office of the Farmer's Loan and Trust Co.

The interest on the first mortgage bonds of the Milwaukee and St. Paul Company, due on the 1st of January next, will be paid at the office of the Company, No. 25 William street, on and after the 3d of January, 1865.

The United States Trust Company will pay, 3d of January, the quarterly dividend of 1¼ per cent. on the stock of the Joliet and Chicago, and the Alton and St. Louis roads.

The coupons due January 1, 1865, on the Special Mortgage Bonds of the Cleveland, Painesville Ashtabula Railroad Company, issued to the Sunbury and Erie Railroad Company, will be paid at the Ocean Bank.

The interest due on the first of January next, on the bonds of the Minnesota Central Railroad Company, will be paid at the office of the Company, No. 25 William street, room No. 8.

The interest due on Kansas State Bonds, Jan. 1, 1865, will be paid at maturity at the Banking House of Winslow, Lanier & Co., in New York city.

The coupons of the first mortgage bonds of the Chicago and Alton Railroad, Joliet and Chicago Railroad, Dubuque and Sioux City Railroad, and Dubuque Southwestern Railroad (preferred), due January 1, 1865, will be paid by Messrs. M. K. Jesup & Co.

The coupons due January 1, of the first mortgage bonds of the Sacramento Valley Railroad Company, will be paid on presentation, in gold coin, less Government tax, at the office of Schuchardt & Gebhard.

The coupons of the mortgage bonds of the Central Pacific Railroad Company of California, due January 1, will be paid in coin at the office of Eugene Kelly & Co.

The following coupons due January 1, 1865, will be paid at the office of Duncan, Sherman & Co., Bankers: "Chicago City Municipal Bonds; Chicago City Water Loan Bonds; Albany City 6 per cent. Bonds."

The transfer books of the Marietta and Cincinnati Railroad Company will be closed from 31st December to 15th January, preparatory to the annual meeting of stockholders.

The interest coupons of the Jersey City Water Loan bonds, due January 1, will be paid on presentation at the Merchant's Bank, this city.

☞ The lake harbor appropriation bill gives Buffalo, $50,000; Cleveland, $50,000; Chicago, $50,000; Milwaukee, $50,000; Racine, $25,000; Kenosha, $25,000; Sheboygan, $20,000; Grand Haven, $25,000.

☞ The total population of Montana Territory is put down at 15,822. It is claimed that large accessions have been made since the census was taken.

☞ The receipts in the Treasury of California during the fifteenth fiscal year of the State's organization, ending June 30, '64, were $2,096,437
Expenses 2,093,228

Receipts exceeds expenses $3,209

The total debt on the 1st of December, 1864, was $4,910,187, in which is not included the old Indian war debt, which is practically repudiated, as successive Legislatures have refused to make any provision for its payment.

☞ The shipments of gold from California this year to Nov. 23d, were $51,884,062, against $41,345,640 to same time in 1863—an excess of $10,538,422. The annexed figures show the aggregate amount of gold brought from California to this port by sea in each year since 1854:—

1854.....	$46,533,116	1860.....	$33,490,409
1855.....	41,682,524	1861.....	34,870,557
1856.....	40,319,929	1862.....	24,882,846
1857.....	34,222,904	1863.....	11,905,478
1858.....	36,179,344	1864.....	12,952,967
1859.....	39,975,750		

Total in eleven years $356,515,824

☞ About seventeen miles from Portland, Oregon, is an iron ore of the variety known as "limonite," said to be suitable for making pig and bar iron, and which produces about sixty per cent of pure iron. Specimens were exhibited at the late Mechanics' Fair in San Francisco.

☞ Among the new railway schemes which will come before the British parliament next session is one for the construction of a railway under the River Mersey, for the connection of Liverpool to Birkenhead.

☞ Engineers are engaged in locating a route for a railroad from Pinegrove to Lebanon, Pa. The enterprise is in the hands of the Reading Railroad Company, which warrants the expectation that it will be put through at an early day.

Chautauqua Central Railroad

This enterprise is not quite dead yet. A meeting in its behalf was to be held on the 8th inst., at Mayville. The call was signed by G. W. Whallon, Dan. Williams, Stephen Hunt, Martin Prendergast, W. P. Whiteside, Milton Smith, and others. —*Jamestown Journal Dec. 9.*
